<p>Students to Explore New Frontiers and Local Solutions The Environment and You, Second Edition, by Norm Christensen and new co-author Lissa Leege, gives today's generation of students reason to be hopeful about environmental challenges by emphasizing the role that science plays in environmental problem solving and solutions. The text offers a solid foundation in</p>	<p>the science and demonstrates the role that science can play in influencing personal, community and global environmental issues. The new edition has added New Frontiers discussions that emphasize the interaction between new scientific discoveries, ethics, and policy; and Where You Live activities that invite students to use primary data sources to explore environmental</p>	<p>principles and issues in their local community. A new chapter organization also improves connections between chapters and integrates key concepts with relevant environmental issues. The textbook is closely integrated with MasteringEnvironmentalScience to support instructors and students using a wide variety of engaging assignments that incorporate videos, current</p>

 This loose-leaf, three-hole punched version of the textbook gives students the flexibility to take only what they need to class and add their own notes—all at an affordable price. For Introductory Environmental Science Courses (Non-Majors). Build and practice skills needed to understand complex environmental issues
 The Environment and You, 3rd

Edition, by Norm Christensen, Lissa Leege, and new co-author Justin St. Juliana, gives today's generation of students reason to be hopeful about environmental challenges. The authors draw on their pedagogical expertise and classroom experience to help students establish a reliable foundation in science. The unbiased approach of the text equips students with important analytical and

quantitative reasoning skills, including how to ask questions to seek information required to develop informed opinions. The authors strive to inspire students, by connecting the course to choices they can make as citizens and demonstrating the role science can play in influencing personal, community, and global environmental issues. With the 3rd Edition, new features include You Decide which presents complex environmental issues and invites students to take a position and consider the results of their position. New Misconceptions address common student misunderstandings related to matters of scientific fact and tackle them head on. The textbook is closely integrated with Mastering(TM) Environmental Science to support instructors and students with a wide variety of engaging assignments and activities. *Essential Environment* Addison-Wesley This teacher's book is designed to help you and your students achieve the outcomes of the Papua New Guinea Grade 5 Environmental Studies syllabus. There are four complete units with activities and ideas designed to encourage students to be

involved in 'hands on, minds on' experiences. Teaching and learning Environmental Studies is about: involving students in everyday experiences; offering a practical, hands-on approach to learning; involving the community; exploring students' feelings towards their natural environment; helping students develop to question information and

acknowledge the importance of evidence to support conclusions; empowering students to feel confident to take action.

readers) are unique. Enlisting the metaphor of waves, it traces monumental shifts in theory, research and practice related to reading education and literacy that represent developments that verge on revolutionary changes. Each of these waves is accompanied with a discussion of the aspirational reader that sets the stage for contemplating these shifts

and their significance. The discussions trace the research and theoretical developments in a fashion that exemplifies the origins of the shifts and their influences"--

Welcome to a new introductory environmental science book that offers

students a reliable science foundation and inspires them to connect the course to the choices they can make as citizens. It's about science-informed by decades of careful research by generations of scientists and presented in a manner non-science majors understand. It's about solutions--offering a fresh alternative to "doom and gloom" by emphasizing problem

solving and scalable solutions so students can make more informed choices on actions to support the well-being of humans and the planet. It's about today's students--making navigating information, focusing, and learning easier for a wide range of students. It's written by a world-class scientist and dedicated teacher -- author Norm Christensen was elected Fellow of the American

Association for the Advancement of Science, is founding dean of the Nicholas School of the Environment, and has served as president of the Ecological Society of America.
