The guide offers an introduction to basic medical terminology on a level and in accordance with requirements of the university programmes of dentistry and general medicine in the Czech Republic. The course reflects local specifics of the Czech medical environment, most notably its strong focus on Latin grammar. The guide consists of two parts, one for each semester. However, the first section is to certain extent self-contained and as such it can be used by students of one-term courses (dentistry), while the second one is supposed to serve as an independent addition necessary only for students of general medicine.

Contains protocols for basic language skills most children with language disorder need to be taught in the initial stages of treatment. The protocols give scripted scenarios for teaching most of the bound morphemes of English that children with language disorder typically lack. These include: basic words; regular and irregular plurals; possessive; present progressive; prepositions; pronouns; auxiliaries and copula; regular and irregular past tense; articles; conjunctions; adverbs; regular third person singular. For each target skill, 20 exemplars are available for the clinician to base rate, treat, and probe for generalized production. Most children can be advanced to relatively complex social communication skill level training only when they have mastered the basic morphologic features.
