Human beings are

generally curious and wish to understand the world better. But many of us didn't have the luck to learn effective questioning techniques as children. We were not encouraged to form opinions and were rather scolded for being too curious. So we didn't learn how to properly question and assess the information we hear, read, and how to think for ourselves. But we can absolutely change that! And educate our children to be better equipped with critical thinking skills. Make better decisions. Don't be gullible.
