A modern classic by Nobel Laureate J.M. Coetzee. His latest novel, *The Schooldays of Jesus*, is now available from Viking. Late Essays: 2006-2016 will be available January 2018. For decades the Magistrate has been a loyal servant of the Empire, running the affairs of a tiny frontier settlement and ignoring the impending war with the barbarians. When interrogation experts arrive, however, he witnesses the Empire's cruel and unjust treatment of prisoners of war. Jolted into sympathy for their victims, he commits a quixotic act of rebellion that brands him an enemy of the state. J. M. Coetzee's prize-winning novel is a startling allegory of the war between oppressor and oppressed. The Magistrate is not simply a man living through a crisis of conscience in an obscure place in remote times; his situation is that of all men living in unbearable complicity with regimes that ignore justice and decency. Mark Rylance (*Wolf Hall*, *Bridge of Spies*), *Ciro Guerra* and producer Michael Fitzgerald are teaming up to bring J.M. Coetzee's *Waiting for the Barbarians* to the big screen.

IN the midway of this our mortal life,I found me in a gloomy wood, astrayGone from the path direct: and e'en to tellIt were no easy task, how savage wildThat forest, how robust and rough its growth,Which to remember only, my dismayRenews, in bitterness not far from death.Yet to discourse of what there good befell,All else will I relate discover'd there.How first I enter'd it I scarce can say,Such sleepy dullness in that instant weigh'dMy senses down, when the true path I left,But when a mountain's foot I reach'd, where clos'dThe valley, that had pierc'd my heart with dread,I look'd aloft, and saw his shoulders broadAlready vested with that planet's beam,Who leads all wanderers safe through every way.

Midway upon the journey of our lifel found myself within a forest dark, For the straight-forward pathway had been lost.Ah me! how hard a thing it is to sayWhat was this forest savage, rough, and stern, Which in the very thought renews the fear.So bitter is it, death is little more; But of the good to treat, which there I found, Speak will I of the other things I saw there.I cannot well repeat how there I entered, So full was I of slumber at the momentIn which I had abandoned the true way.But after I had reached a mountain's foot, At that point where the valley terminated, Which had with consternation pierced my heart, Upward I looked, and I beheld its shoulders, Vested already with that planet's raysWhich leadeth others right by every road.Then was the fear a little quietedThat in my heart's lake had endured throughoutThe night, which I had passed so piteously.And even as he, who, with distressful breath, Forth issued from the sea upon the shore, Turns to the water perilous and gazes;So did my soul, that still was fleeing onward, Turn itself back to re-behold the passWhich never yet a living person left.After my weary body I had rested, The way resumed I on the desert slope, So that the firm foot ever was the lower.And lo! almost where the ascent began, A panther light and swift exceedingly, Which with a spotted skin was covered o'er!And never moved she from

Humankind has pervasively influenced the Earth's atmosphere, biosphere, geosphere, hydrosphere and cryosphere, arguably to the point of fashioning a new geological epoch, the Anthropocene. To constrain the Anthropocene as a potential formal unit within the Geological Time Scale, a spectrum of indicators of anthropogenically-induced environmental change is considered, and shown as stratigraphical signals that may be used to

characterize an Anthropocene unit, and to recognize its base. This volume describes a range of evidence that may help to define this potential new time unit and details key signatures that could be used in its definition. These signatures include lithostratigraphical (novel deposits, minerals and mineral magnetism), biostratigraphical (macro- and micro-palaeontological successions and human-induced trace fossils) and chemostratigraphical (organic, inorganic and radiogenic signatures in deposits, speleothems and ice and volcanic eruptions). We include, finally, the suggestion that humans have created a further sphere, the technosphere, that drives global change.

Dogs have become the subject of increasing scientific study over the past two decades, chiefly due to their development of specialized social skills, seemingly a result of selection pressures during domestication to help them adapt to the human environment. *The Social Dog: Behaviour and Cognition* includes chapters from leading researchers in the fields of social cognition and behavior, vocalization, evolution, and more, focusing on topics including dog-dog and dog-human interaction, bonding with humans, social behavior and learning, and more. Dogs are being studied in comparative cognitive sciences as well as genetics, ethology, and many more areas. As the number of published studies increases, this book aims to give the reader an overview of the state of the art on dog research, with an emphasis on social behavior and socio-cognitive skills. It represents a valuable resource for students, veterinarians, dog specialists, or anyone who wants deeper knowledge of his or her canine companion. Reviews the state of the art of research on dog social interactions and cognition Includes topics on dog-dog as well as dog-human interactions Features contributions from leading experts in the field, which examine current studies while highlighting the potential for future research

Rhizobia are bacteria which inhabit the roots of plants in the pea family and "fix" atmospheric nitrogen for plant growth. They are thus of enormous economic importance internationally and the subject of intense research interest. Handbook for Rhizobia is a monumental book of practical methods for working with these bacteria and their plant hosts. Topics include the general microbiological properties of rhizobia and their identification, their potential as symbionts, methods for inoculating rhizobia onto plants, and molecular genetics methods for Rhizobium in the laboratory. The book will be invaluable to Rhizobium scientists, soil microbiologists, field and laboratory researchers at agricultural research centers, agronomists, and crop scientists.

Frank E. Zachos offers a comprehensive review of one of today's most important and contentious issues in biology: the species problem. After setting the stage with key background information on the topic, the book provides a brief history of species concepts from antiquity to the Modern Synthesis, followed by a discussion of the ontological status of species with a focus on the individuality thesis and potential means of reconciling it with other philosophical approaches. More than 30 different species concepts found in the literature are presented in an annotated list, and the most important ones, including the Biological, Genetic, Evolutionary and different versions of the Phylogenetic Species Concept, are discussed in more detail. Specific questions addressed include the problem of asexual and prokaryotic species, intraspecific categories like subspecies and Evolutionarily Significant Units, and a potential solution to the species problem based on a hierarchical approach that distinguishes between ontological and operational species concepts. A full chapter is dedicated to the challenge of delimiting species by means of a discrete taxonomy in a continuous world of inherently fuzzy boundaries. Further, the book outlines the practical ramifications for ecology and evolutionary biology of how we define the species category, highlighting the danger of an apples and oranges problem if what we subsume under the same name ("species") is in actuality a variety of different entities. A succinct summary chapter, glossary and annotated list of references round out the coverage, making the book essential reading for all biologists looking for an accessible introduction to the historical, philosophical and practical dimensions of the species problem.

A powerful man finds the one woman who completes him. The second Moorehouse Legacy novel from New York Times bestselling author J.R. Ward writing as Jessica Bird. Ruthless might as well be Gray Bennett's middle name. When the renowned

Washington, D.C., insider talks, powerful people listen. But Gray hasn't come home to Saranac Lake to play politics. Or play at all. A tragedy has brought Gray Bennett back to face everything he thought he'd left behind. Including the most unlikely of women. The mousy redhead who used to run around the Moorehouse B and B—the one he never noticed—is now all fiery hair and lush curves. But sweet Joy Moorehouse is too innocent for a cynic like him. So Gray won't let himself lay a hand on her...until the night he can no longer resist the woman she has become. That's when he discovers a secret that leaves him gasping for breath—and wanting more. A reader-favorite story originally published as *His Comfort and Joy*.

"A classic of Japanese literature" (Chicago Sun-Times) and the first novel in the masterful tetralogy, *The Sea of Fertility*, set in 1912 Tokyo, featuring an aspiring lawyer who believes he has met the successive reincarnations of his childhood friend. It is 1912 in Tokyo, and the hermetic world of the ancient aristocracy is being breached for the first time by outsiders—rich provincial families unburdened by tradition, whose money and vitality make them formidable contenders for social and political power. Shigekuni Honda, an aspiring lawyer and his childhood friend, Kiyooki Matsugae, are the sons of two such families. As they come of age amidst the growing tensions between old and new, Kiyooki is plagued by his simultaneous love for and loathing of the spirited young woman Ayakura Satoko. But Kiyooki's true feelings only become apparent when her sudden engagement to a royal prince shows him the magnitude of his passion—and leads to a love affair both doomed and inevitable.

Originally published in hardcover in 1990 by St. Martin's Press. *A Stratigraphical Basis for the Anthropocene* Little, Brown Wild Dogs: The Natural History of the Nondomestic Canidae presents a comprehensive, current natural history of the nondomestic dog species. In this book, a prodigious amount of previously uncollected information is presented in a straightforward form. The organization of the book is alphabetical by genus, and, within each genus, alphabetically by Linnean species name. In some cases, very little is known about a species. In other cases, the amount of available information is enormous, and has been distilled to summary form. The volume is intended as a straightforward assemblage of material. It points the way toward, but is not intended to provide, a synthetic or theoretical big picture. The book is intended as a general reference work. Biologists, wildlife managers, mammalogists, conservationists, students, and carnivore specialists will find here information assembled nowhere else. Over 600 sources are included in the bibliography, so the book also serves as an entry to the literature for those seeking more technical or specialized knowledge. Naturalists and outdoorsmen will also enjoy discovering the particulars of familiar and unfamiliar canid species.

In 1970s New York, a forensic pathologist must use his professional skills to save his own daughter in this "harrowing" award-winning crime novel (The New York Times). In the gritty seventies, Manhattan is a dark, dangerous, and threatening place. One of the bright spots in this decaying metropolis is Paul Konig. As the city's chief medical examiner, he has developed an impressive reputation for his skills in forensic pathology—skills that will be put to the ultimate test when a dangerous psychopath kidnaps Konig's daughter. Awakened by phone calls featuring his daughter's desperate screams each night, Konig finds his life unraveling, not only personally but professionally. Between the case of a serial killer who leaves a trail of severed body parts in his wake, an investigation into the forensic work on an alleged prison suicide, and a nakedly ambitious deputy medical examiner, he is at the end of his rope, and it will take every ounce of his strength to save his own life—as well as his family's. Perfect for fans of Patricia Cornwell or Kathy Reichs, *City of the Dead* is a chilling thriller by the author of *Crawlspace* and a winner of the Grand Prix de Littérature Policière, featuring "a massive amount of authoritative detail" about the life of a coroner (Kirkus Reviews).
