The story of a boy who did not want to become a priest; the masterpiece of Romania's greatest storyteller. Recollections from Childhood (original title in Romanian, Amintiri din copilărie) is a highly entertaining recount of the author's idyllic childhood, disrupted by his parents' ambitions to have him enter priesthood."One of the main literary contributions of Romanian author Ion Creangă. The largest of his two works in the memoir genre, it includes some of the most recognizable samples of first-person narratives in Romanian literature, and is considered by critics to be Creangă's masterpiece." --Wikipedia

Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality,

but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

According to the AAPC, a Certified Professional Medical Auditor has a good understanding of the knowledge of medical documentation, fraud, abuse, and penalties for documentation and coding violations based on governmental guidelines, and is well trained on medical record auditing skills. Of the various topics covered in the exam, Auditing, Documentation, Regulatory Standards and Statistical sampling are among those that are most difficult. This book focuses on these exam topics: Auditing, Documentation, Standards and Statistical sampling.

Zero the Hero Legare Street Press

This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

"Pediatric otolaryngology is a rapidly expanding field with remarkable technological advances that have improved the quality of life for young patients. Many highly complex pediatric head and neck procedures are not commonly performed, resulting in a paucity of resources. Atlas of Pediatric Head and Neck and Skull Base Surgery by renowned surgeons Dan M. Fliss and Ari DeRowe and an impressive group of interdisciplinary innovators fills a gap in the literature. This richly illustrated atlas features detailed discussions and guidance on groundbreaking surgeries developed and currently performed by top academic surgeons in the field, many of whom contributed to this book. The introductory section lays a solid foundation of knowledge, covering pediatric anatomy, the distinctive topography of the skull base, anesthesia and pain control considerations, and imaging modalities. Fifty-four subsequent chapters encompass a rich spectrum of approaches and pediatric pathologies, organized by head and neck; skull base and craniofacial; airway, voice, and swallowing; trauma; and reconstruction sections. Surgical chapters include an introduction; evidence-based guidelines; preoperative, anesthetic, intraoperative, and postoperative considerations; techniques and positioning; extensive references; and more"--

The Lost Principle Albert Bonniers Förlag

This volume brings together contributions from leading specialists in syntax and morphology to explore the complex relation between periphrasis and inflexion from both a synchronic and diachronic perspective. The chapters draw on data from across the Romance language family, including standard and regional

varieties and dialects. The relation between periphrasis and inflexion raises questions for both syntax and morphology, and understanding the phenomena involved requires cooperation across these sub-domains. For example, the components that express many periphrases can be interrupted by other words in a way that is common in syntax but not in morphology, and in some contexts, a periphrastic form may be semantically equivalent to a single-word inflected form, with which it arguably forms part of a paradigmatic set. Patterns of this kind are found across Romance, albeit with significant local differences. Moreover, diachrony is essential in understanding these phenomena, and the rich historical documentation available for Romance allows an in-depth exploration of the changes and variation involved, as different members of the family may instantiate different stages of development. Studying these changes also raises important questions about the relation between attested and reconstructed patterns. Although the empirical focus of the volume is on the Romance languages, the analyses and conclusions presented shed light on the development and nature of similar structures in other language families and provide valuable insights relevant to linguistic theory more broadly.

This book examines on an international basis how small and medium-sized enterprises (SMEs) cope with the changing economic and social challenges, which are also reflected in financial and non-financial reporting. To this end, it presents six case studies from Germany, Hungary, Romania, Poland, Italy, and the United Kingdom, with a particular focus on integrated reporting (IR). The cases presented are drawn from collaborative research within the international network of INTEREST, an

international project on integrated reporting for SME transparency. The book will be of interest to researchers and practitioners.

Recollections from Childhood Nickelodeon

Coding as a Playground, Second Edition focuses on how young children (aged 7 and under) can engage in computational thinking and be taught to become computer programmers, a process that can increase both their cognitive and social-emotional skills. Learn how coding can engage children as producers—and not merely consumers—of technology in a playful way. You will come away from this groundbreaking work with an understanding of how coding promotes developmentally appropriate experiences such as problem-solving, imagination, cognitive challenges, social interactions, motor skills development, emotional exploration, and making different choices. Featuring all-new case studies, vignettes, and projects, as well as an expanded focus on teaching coding as a new literacy, this second edition helps you learn how to integrate coding into different curricular areas to promote literacy, math, science, engineering, and the arts through a project-based approach and a positive attitude to learning.

THE REFORM OF EDUCATION

Many people know the myth of Dracula, but very few know that he was in fact a real person, an fifteenth century ruler of the Romanian people. Still, less people realize that the books they read about the subject are mostly the product of the imagination of the authors. In *The Impaler: A Biography of Vlad III Dracula*, author Alexandru Buican aims to limit strictly to historical sources—Romanians, Hungarians, Turkish, Latin—letting them speak for themselves, intending no less than to give the book on the historical Dracula. However uncomfortable may be for the modern reader, the facts about real Dracula's life are presented with no exaggerations, without any attempt to avoid the psychological fact that made the fifteenth century scholar Michael Beheim, a contemporary, to refer to so bluntly: "From all the madmen and

all the / tyrants I have ever heard of / in this world / and under these skies, / within living memory, / no other has been more cruel."

"If you work with college-bound students, this book must be on your desk at all times." With more college options and higher college costs, students and parents need the advice and support of a well-informed school counselor to guide them through the college selection process. *College Counseling for School Counselors* gives counselors everything needed to build a successful college counseling program, no matter how many students they work with. After creating a framework for a strong curriculum, *College Counseling for School Counselors* shows how to explore all college options with students and families, including options for students with special needs and talents. The follow-up activities in each chapter give counselors resources that bring the ideas to life, and a three year calendar shows counselors how to introduce every idea at a manageable pace, building to a comprehensive college counseling program and strong individual college plans for every student. Busy, caring counselors will find everything they need in *College Counseling for School Counselors* to improve their college counseling program, and reach every student they work with.

In the summer of 1910, a race began. A race to be the first man at the South Pole, in Antarctica. Robert Falcon Scott, an Englishman, left London in his ship, the *Terra Nova*, and began the long journey south. Five days later, another ship also began to travel south. And on this ship was Roald Amundsen, a Norwegian. But Antarctica is the coldest place on earth, and it is a long, hard journey over the ice to the South Pole. Some of the travellers never returned to their homes again. This is the story of Scott and Amundsen, and of one of the most famous and dangerous races in history.
