Over the course of a thirty-year career, Samuel Freedman has excelled both at doing journalism and teaching it, and he passionately engages both of these endeavors in the pages of this book. As an author and journalist, Freedman has produced award-winning books, investigative series, opinion columns, and feature stories and has become a specialist in a wide variety of fields. As a teacher, he has shared his expertise and experience with hundreds of students, who have gone on to succeed in both print and broadcast media. In Letters to a Young Journalist, Freedman conducts an extended conversation with young journalists—from kids on the high school paper to graduates starting their first jobs. Whether he's talking about radio documentaries or TV news shows, Internet blogs, or backwater beats, shoeleather research or elegant prose, his goal is to explore the habits of mind that make an excellent journalist. It is no secret that journalism's mission is seriously imperiled these days, and Freedman's provocative ideas and fascinating stories offer students and journalists at all levels of experience wise guidance and professional inspiration.

"O'Reilly Media, Inc."

This is a book about Microsoft 365 Excel, or Excel 365. No other version in history has as much power, as many features or more possibilities than does Excel 365. With a new formula calculations engine and many new built-in functions, creating formula solutions and business models in Excel 365 is dramatically easier than at any time in the history of spreadsheets. In addition, with the new data tools like Power Query, Power Pivot and Power BI, performing data analysis to make data driven decisions can be easily done on data with different structures, with different sources and on small and big data alike. With this exciting new Excel 365 version, we will learn three types for formulas: Worksheet, M Code and DAX, and we will learn three types of Reporting/Dashboarding tools: Standard PivotTables, Data Model PivotTables and Power BI Visualizations. This means that the New Excel 365 is the only app that matters in our age of analytics and data driven decisions. Who is this book/class for? Everyone. The book starts at the beginning and moves you to an advanced level by telling a logical story about how to use Excel to solve calculation-based problems and answer crucial questions.

This book is primarily designed for students preparing for various competitive examinations. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help the students preparing for competitive examinations, seeking admission to universities or schools, or prepare for job interviews. Second, it will also be helpful for those studying SEYCHELLES. This book contains more than 49 questions from the core areas of SEYCHELLES. The questions are grouped chapter-wise. There are total 1 chapters, 2 sections and 49+ MCQ with answers. This reference book provides a single source for multiple choice questions and answers in SEYCHELLES. It is intended for students as well as for developers and researchers in the field. This book is highly useful for faculties and students. One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.
