Written and Authorised by the UK's Leading First Aid Providers Elsevier Health Sciences

This is both an instructional and a reference guide designed to meet the needs of those interested in first aid as well as those who require an acknowledged qualification. It provides the necessary material for instructional courses.

125 Years of the Order of St John New Zealand, 1885-2010 Jones & Bartlett Pub

This title is directed primarily towards health care professionals outside of the United States. This portable, quick reference provides comprehensive coverage of first aid procedures and is highly illustrated. Its aim is to enable nurses to effectively and safely provide first aid outside their clinical working environment. However, the principles described will also be useful within the hospital setting and a section at the end of each chapter will describe the appropriate treatment once the patient reaches A&E.

Handbook of First Aid to the Injured Hassell Street Press

FIRST TO CARE: 125 YEARS OF THE ORDER OF ST JOHN IN NEW ZEALAND, 1885-2010 brings to life the history of one of our most ubiquitous and vital charitable organisations. The heavily illustrated book provides a vivid account of public-spiritedness, enterprise and innovation by people involved in St John over the past 125 years, peppered with occasional disputes and setbacks along the way. St John invented and popularised 'first aid' as we know it. It provided medical assistance from the sidelines of our sports fields from as early as 1891 and it played a leading role in disaster relief from its formative days. From humble beginnings it established a nationwide ambulance service that today is the envy of the St John fraternity worldwide.

How often do your primary school pupils have the opportunity to engage in open-ended, sustained

pieces of work that offer them choice and control? Do you find that the curriculum restricts openings to provide your pupils with real challenge? Is your school grappling with finding effective ways in which to elicit authentic pupil voice? Children as Researchers in Primary Schools is an innovative and unique resource for practitioners supporting children to become ‘real world’ researchers in the primary classroom. It will supply you with the skills and ideas you need to implement a ‘children as researchers’ framework in your school that can be adapted for different ages and abilities. Children in primary schools are accustomed to being set short-term goals and are often unaware of long-term aims or of the connections between the concepts and skills they are learning. In contrast, this book demonstrates that children engaging in the research process have authentic opportunities to apply invaluable personal, learning and thinking skills while managing their own projects, making their ‘voices’ heard and experiencing increased levels of engagement and self-esteem. Based on the author’s 4-year research study exploring the experiences of young researchers and teachers in primary schools, and on her considerable experience of training young researchers, this book also contains: the history and theory behind ‘children as researchers’ initiatives; a model for good practice based on successful real life case studies; questions for reflective practice; practical examples of research in the classroom; photocopiable resources; opportunities for self-evaluation. This comprehensive resource will be appeal to primary teachers, educational practitioners and students on CPD and ITT courses. It will also be of interest to teacher trainers, to academics involved in teaching and research and to all those interested in promoting children’s voices.

The Complete Guide to First Aid and CPR Guinness World Records

Beginning with an illustrated guide to the herbs and roots used in traditional Appalachian healing, “Mountain Folk Remedies” is a fascinating collection of historic remedies ranging from the practical (burdock tea will help aching feet) to the magical (carrying a buckeye in your pocket will help lessen arthritis). Foxfire has brought the philosophy of simple living to hundreds of thousands of readers, teaching creative self-sufficiency and preserving the stories, crafts, and customs of Appalachia. Inspiring and practical, this classic series has become an American institution. In July 2016, Vintage Shorts celebrates Foxfire's 50th Anniversary.

The current way of treating people at work has failed. Globally, only 30% of employees are engaged in their jobs, and in this fast-paced world that's just not enough. The world's best companies understand this, and have been quietly treating people differently for nearly two decades. Now you can learn their secrets and discover The Engagement Bridge™ model, proven to build bottom line value for companies through sustainable employee engagement. Companies with the best cultures generate stock market returns of twice the general market and enjoy half the employee turnover of their peers. Their staff innovate more, deliver better customer service and, hands-down, beat the competition. These companies outperform and disrupt their markets. They break the rules of traditional HR, they rebel against the status quo. Build it has found these rebels and the rulebreakers. From small startups to global powerhouses, this book shows that courage, commitment, and a people-centric mindset, rather than money and resources, are what

you need to turn an average business into a category leader. The book follows the clear and proven Engagement Bridge™ model, developed from working with thousands of leading companies worldwide on their own employee engagement journeys. The practical model highlights the areas that leaders need to examine in order to build a highly engaged company culture and provides a framework for success. Build it is packed with tips, tools and real-life examples from employers including NASDAQ, Unilever, IBM, KPMG, 3M, and McDonald's to help you start doing this not tomorrow, but today. Readers will learn: How employee engagement helps companies perform The key factors that drive engagement, and how they work together What the world's most rebellious companies have done to break the rules of traditional HR and improve engagement How to implement The Engagement Bridge™ model to boost productivity, innovation, and better decision-making Unique in this category, Build it is written from two sharply different perspectives. Glenn Elliott is a multi-award winning Entrepreneur of the Year, CEO and growth investor. He talks candidly about the mistakes and missteps he has made whilst building Reward Gateway into a \$300m category leader in employee engagement technology. Debra Corey brings 30 years experience in senior level HR roles at global companies such as Gap, Quintiles, Honeywell and Merlin Entertainments. She shares the practical tools and case studies that can kickstart your employee engagement plan, bringing her own pragmatic and engaging style to each situation.

First Aid : First on the Scene : Standard Level. Activity Book Random House Canada Psychological first aid, or PFA, is designed to mitigate the effects of acute stress and trauma and assist those in crisis to cope effectively with adversity. PFA is designed to be applied in emergencies, including disasters and terrorist attacks. In this essential guide, George S. Everly, Jr., developer of the Johns Hopkins RAPID PFA method, and Jeffrey M. Lating, his collaborator in its implementation, describe the principles and practices underpinning this psychological model in an easy-to-follow, prescriptive, and practical manner. They explain the history of PFA and persuasively demonstrate its powerful versatility. Mental health practitioners can apply PFA in all settings. It can also be used as a public-health tool to address mental health needs following critical incidents and as a means for building community resilience. Aimed at mental health practitioners, all first responders, and global health disaster teams such as Médecins Sans Frontières and the World Health Organization, The Johns Hopkins Guide to Psychological First Aid is the first book to thoroughly explain RAPID PFA. RAPID, a unique theoretically grounded and evidence-based PFA method, follows a set of easily understood principles. In each chapter, Everly and Lating provide a step-by-step approach and include a key point summary to emphasize essential elements. A unifying case exemplifies each phase of the RAPID PFA model in an ongoing dialogue that presents ideal PFA responses, examples of common mistakes, and various outcomes. In addition to their counseling experience in Kuwait after the Gulf War and in New York City after the September 11 attacks, the authors have traveled nationally and internationally to teach the RAPID PFA method in numerous public health, fire, police, military, and faith-based settings. Beneficial to those with little or no previous mental health training, this book is an essential tool for people who want to learn, to practice, or to retain their ability to use psychological first aid effectively.
