Pub. 15 / Circular E explains your tax responsibilities as an employer. It explains the requirements for withholding, depositing, reporting, paying, and correcting employment

taxes. It explains the forms you must give to your employees, those your employees must give to you, and those you must send to the IRS and the SSA. This guide also has tax tables you need to figure the taxes to withhold from each employee for 2017. References to "income tax" in this guide apply only to "federal" income tax. Contact your state or local tax department to determine if their rules are different. When you pay

your employees, you don't pay them all the money they earned. As their employer, you have the added responsibility of withholding taxes from their paychecks. The federal income tax and employees' share of social security and Medicare taxes that you withhold from your employees' paychecks are part of their wages that you pay to the United States Treasury instead of to your employees. Your employees trust that you pay the with-held taxes to the United States Treasury by making federal tax deposits. This is the reason that these withheld taxes are called trust fund taxes. If federal income, social security, or Medicare taxes that must be withheld aren't withheld or aren't deposited or paid to the United States Treasury, the trust fund recovery penalty

may apply. See section 11 for more information. Pub. 15-A includes specialized information supplementing the basic employment tax information provided in this publication. Pub. 15-B, Employer's Tax Guide to Fringe Benefits, contains information about the employment tax treatment and valuation of various types of non-cash compensation. Pub. 535 discusses common business expenses and explains what is and is not deductible. The general rules for deducting business expenses are discussed in the opening chapter. The chapters that follow cover specific expenses and list other publications and forms you may need. Including GAAP, IRS and SEC Regulations, Leases, and More Pearson Education

Ask a Manager John Wiley & Sons Pharmaceutical medicine is very, very big business. The top ten players earned more than \$200 billion in 2003. One drug, Pfizer's cholesterol pill Lipitor, had sales of more than \$9 billion. This kind of

money buys an awful lot of friends among doctors and politicians. Most of those involved in the formulation of public health policy seems happy with the present system. The trouble is that the public is starting to have doubts. There is a growing sense that the vast profits of drug companies and their control of the research agenda might not be that good for our health. Jacky Law takes the reader on a journey through the pharmaceutical business and shows how the public is quite right to be concerned about conventional medicine, as it has developed since the late 1970s. She tells a story of spectacular regulatory failure, phenomenally high prices, betrayal of the public interest and a growing awareness among ordinary people that things could be very

different. Sophisticated marketing and public relations, not scientific excellence, have helped corporations to preside unchallenged over matters of life and death. It is time, Law argues, for us to take responsibility for our health, not as passive consumers of pharmaceutical medicine, but as informed citizens.
