

processes of the normal, average student. However, over the past 20 years, mainstreaming and later inclusion has presented an additional challenge for educational psychologists and classroom teachers. This new book presents leading research from around the globe in all areas of educational psychology.

Mathematics and Science - Paper II is an attempt to make the process of teaching and learning an enjoyable experience. The book has been designed for the students appearing for the CTET Paper II, who opt for a career as a Mathematics/ Science teacher in schools. The book has been divided into two units - Mathematics and Science and covers CET syllabus thoroughly. The chapters provide in-depth explanations of the concepts in easy language. The pedagogical elements like activities, illustrative examples, figures, boxes, objective questions and summary acts as a learning aide and helps the students to grasp the subject to the core. Classroom simulation activities are to help budding teachers to deal with real-life classroom situations, while preparing for the examination.

The application of scientific principles to the study of sport and exercise demands of its investigators an understanding of the research process, and in particular the inter-related issues of research design and statistics. The topic of the book are:

Introduction to Research, Survey of Related Literature, Basics of Statistical Analysis, Statistical Models in Physical Education and Sports.

HTET (TGT) Trained Graduate Teacher (Level2) Social Studies (Class VI to VIII) Exam Guide Prabhat Prakashan

- How do children, individually and collectively, make meanings of their learning experiences?
- How can teachers become aware of children's meaning making on an ongoing basis?
- Is it possible and useful to create an integrated theory of student learning?
- How can classroom research enhance critical understandings of the situated nature of learning and teaching, while taking into account the systemic and educational policy contexts?
- How do differences, such as class, race, culture, gender and sexualities, interact with student learning?
- How can teachers respond effectively to the realities of today's diverse classrooms?
- What are the current and emerging issues in classroom research?

These are just some of the questions this book grapples with. It pays tribute to Professor Graham Nuthall's (1935-2004) research contributions - a pioneering and internationally renowned classroom researcher of teaching and learning from New Zealand. It has been written by emerging and experienced classroom researchers from several countries as part of a project aimed at building on and extending Nuthall's research and promoting the conducting, teaching and supervision of classroom research. The authors engage critically with theoretical, methodological and pedagogical possibilities of their research using Nuthall's work as a springboard. As a result, all authors make links between theory and practice. Further, several leading international researchers contribute comments on future directions for classroom research and its relevance for teaching and learning. Understanding teaching and Learning: Classroom Research Revisited would be of interest to practicing or prospective teachers and teacher educators, as well as scholars and students of teaching and learning.
