REMEMBERING JOY

A Smile in the Mind

The "virtuoso" author's memoir of his spiritual journey with famed Taoist philosopher Jolan Chang (The New York Times). Beginning with their first meeting over lunch at Lawrence Durrell's Provencal home, Durrell and Jolan Chang--renowned Taoist philosopher and expert on Eastern sexuality--developed an enduring relationship based on mutual spiritual exploration. Durrell's autobiographical rumination on their friendship and on Taoism recounts the author's existential ponderings, starting with his introduction to the mystical and enigmatic "smile in the mind's eye." From parsimony, cooking, and yoga to poetry, Petrarch, and Nietzsche, *A Smile in the Mind's Eye* is a charming tale of a writer's spiritual and philosophical awakening.

WHY RIGHT-BRAINERS WILL RULE THE FUTURE

One mistake can shatter dreams and shape the future. Alexis knows this first hand. Even though her memory of that day is hazy, she has spent the last ten years trying to put it behind her. Armed with the knowledge that her career will be her only legacy, Alexis works night and day to prove that she is more than just her last name. It's not only that she doesn't have time for love. She doesn't have the heart for it. After all, there's no point in starting something you can't finish. When she meets Adam, she's drawn to him in a way even she can't deny. The film student is dark and brooding and strangely charming. He's the perfect distraction from her mundane life. And, as if fate is pushing them together, he seems to be around every corner. It's enough to almost make her entirely forget about her past and take a chance. But Adam can recall every detail that she's forgotten. What she doesn't remember, he can't forget.

A MIND TO MIND CONVERSATION

Durrell's best-known work fused Western notions of time and space with Eastern metaphysics. Very little has been written about Durrell's work before the Second World War. With "A Smile in His Mind's Eye," Ray Morrison seeks to redress this neglect. *A Whole New Mind* BoD - Books on Demand "The need for scientific knowledge springs from a natural human curiosity to understand our world, but also from a genuine desire to help humanity. The great scientific discoveries have given us incredible knowledge about the natural world, have improved our lives through new technologies, and have taught us a great deal about the capabilities and the limitations of our human perspective." In *The Mind of Science: From Aristotle to Einstein*, author Michael Sidiropoulos takes you on a thought-provoking journey through the history of science from a philosophical standpoint. Beginning with the calculation of the size of the earth by Eratosthenes, chief librarian at the Library of Alexandria, Sidiropoulos for the most part avoids the use of mathematical formulas as he explores the ideas, and ideals, that lie behind scientific advancement throughout the ages. It's a fascinating voyage that will enrich you with a greater awareness of the interplay between science and philosophy-how they're similar, how they're different, and how they complement each other.

The Last Legend CreateSpace

A devoted employee of the FIA (Federal Intelligence Agency), Eurian lives a comfortable and secure life, spanned with bureaucratic conflicts and desires for promotion. He will find himself thrust into an international conflict to track down and stop a subversive cyberterrorist movement. His desire for a foreign assignment will finally be met, but not in the way he expected. Assigned to Kerploueck, a sleepy village at the far edge of the world, he will be forced to let go of the comfort and stability of his previous lifestyle. With this temporary assignment, the complacent bureaucrat finds himself a spy-but with none of the excitement and adventure he had dreamed of. He now must find new objectives to survive this wholly uninteresting assignment. What happens to the FIA and to the success of the worldwide search for the subversive cyber-terrorists will slowly drift away from Eurian's mind. Interestingly enough, when this book was started, internet spying, hacking, and cyberterrorism were

rhetorical discussions. Today, we live in a different reality. Truth and facts are not as important as swaying unmindful, gullible populations. George Orwell's "alternative facts" are common place and universally acceptable. With the ocean of information now accessible to anyone, individuals, organizations, and even governments are scrambling to control its sources and promulgate their agendas. This is the essence of "The Happy Fools." Following Eurian and his unanticipated quest for truth, many topics of modern society will be discussed. This book also serves as a compendium of the latest technologies, sciences, ideas and movements. Focusing primarily on the most pertinent latest developments, each providing hope and insights that could change our lives. The underlying prerequisite of being happy is to avoid stress and the unknown. Therein lies a potential philosophical issue. Shutting the doors to outside turmoil, to world problems and issues, is a good safeguard for happiness. Close-mindedness brings confidence, as the world's problems appear simple and the solutions two-sided. Inversely, knowledge creates a spirit of inquiry, a burning desire for more knowledge, spurring new questions that beg for answers, ultimately resulting in a loss of conviction and an understanding that we will never truly understand the world in its endless complexities. Do we choose closed-minded confidence, or a life dedicated to the pursuit of knowledge with the uncertainties, frustrations, and complexities that it yields?

The 3 Mindful Acts for Leaders AuthorHouse

The extraordinary story of one woman's ten-year medical and metaphysical odyssey that brought her physical, creative, emotional, and spiritual healing, by a MacArthur genius and two-time Pulitzer finalist. With a play opening on Broadway, and every reason to smile, Sarah Ruhl has just survived a high-risk pregnancy when she discovers the left side of her face is completely paralyzed. She is assured that 90 percent of Bell's palsy patients see spontaneous improvement and experience a full recovery. Like Ruhl's own mother. But Sarah is in the unlucky ten percent. And for a woman, wife, mother, and artist working in theater, the paralysis and the disconnect between the interior and exterior brings significant and specific challenges. So Ruhl begins an intense decade-long search for a cure while simultaneously grappling with the reality of her new face--one that, while recognizably her own--is incapable of accurately communicating feelings or intentions. In a series of piercing, witty, and lucid meditations, Ruhl chronicles her journey as a patient, wife, mother, and artist. She explores the struggle of a body yearning to match its inner landscape, the pain of postpartum depression, the story of a marriage, being a playwright and working mom to three small children, and the desire for a resilient spiritual life in the face of illness. Brimming with insight, humility, and levity, *Smile* is a triumph by one of America's leading playwrights. It is an intimate examination of loss and reconciliation, and above all else, the importance of perseverance and hope in the face of adversity.

When Isaac Smiles Sparkle Press, LLC

..".In the end, all your legends, your fables, your fantasies, they are all one story. One tale told by different tellers. One song sung by different singers. And all of them are a lie, born to hide a

greater truth. Just as this one will become, when your part in it is done." It's the first day of summer. No alarm clocks. No school. No homework. After nine long months of unrelenting torture, Milo can finally do what he's been dreaming of all year... absolutely nothing. With his door closed and his room dark, Milo can finally shut out the noise and hide from the world. Unfortunately for Milo, the world has other plans for him. As lonely and disconnected Milo Wolfe embarks on an unexpected journey to find a father he's never met, Milo will learn that nothing in his world is as it appears. And no one can be trusted, not the dead Russian wizard who dominates his dreams, not the mysterious green-eyed teen who seems to be stalking him, not even himself. Described as, "A subversively comic, action packed, quirky, coming of age, paranormal, science fiction, fantasy adventure for young adults and adults who still think of themselves as young adults," Douglas Lieblein, one of the writers and Executive Producers of Hannah Montana and Life With Boys, has created a debut novel full of unorthodox adventures, shocking surprises and a controversial hypothesis regarding humanity's symbiotic relationship with myth and the supernatural. If you're a fan of the Artemis Fowl series, read it again. It's really good. Then after you're done, if you've got nothing to do, read this book.

"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders

often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

From the author of the #1 national bestselling Musicophilia comes a truly visionary book: an exploration of the remarkable, unpredictable ways that our brains cope with the loss of sight by finding new forms of perception to create worlds as complete and rich as the no-longer-visible world. Following the phenomenal success of his international bestseller Musicophilia, the inimitable Oliver Sacks returns with another book on the extraordinary interaction between our brain and our senses — in this case, vision. In *The Mind's Eye*, Sacks examines questions ranging from

the primary experiences of how we perceive depth or color or motion to the complex matter of how different individuals have varied ways of thinking and experiencing or recreating the visual world. Like *The Man Who Mistook His Wife for a Hat* and *An Anthropologist on Mars*, Sacks's new book is based primarily on individual stories — including Sacks's own experience of an ocular tumor that left him unable to perceive depth. As always, he embeds these case histories in a rich historical and scientific context. Sacks goes beyond basic vision to explore perception, hallucination and the power of visualization, as well as the ocular effects of migraine, epilepsy and other conditions. Oliver Sacks is our perfect guide to the visual world, a realm that, it turns out, is much, much more complicated than we could have imagined.
