Declining, Yet Shining Oak Agencies

From the award-winning author of *Altered Carbon* and *Broken Angels*—a turbocharged new thriller set in a world where killers are stars, media is mass entertainment, and freedom is a dangerous proposition . . . A coup in Cambodia. Guns to Guatemala. For the men and women of Shorn Associates, opportunity is calling. In the superheated global village of the near future, big money is made by finding the right little war and supporting one side against the other—in exchange for a share of the spoils. To succeed, Shorn uses a new kind of corporate gladiator: sharp-suited, hard-driving gunslingers who operate armored vehicles and follow a Samurai code. And Chris Faulkner is just the man for the job. He fought his way out of London's zone of destitution. And his kills are making him famous. But unlike his best friend and competitor at Shorn, Faulkner has a side that outsiders cannot see: the side his wife is trying to salvage, that another woman—a porn star turned TV news reporter—is trying to exploit. Steeped in blood, eyed by common criminals looking for a shot at fame, Faulkner is living on borrowed time. Until he's given one last shot at getting out alive. . . .

Black Widow Marvel Entertainment

The epic mini-series collected for the first time! Earth, 2020. United States Special Forces Major Laurence "Prophet" Barnes and the soldiers of Raptor Team thought their deployment on the Lingshan islands was a basic covert op against North Korean forces. They couldn't have been more wrong. Archaeologists had awoken a nightmare on the island that had lain buried for millions of years — the Ceph, an alien race utterly hostile to human life. In a battle that stretches across the solar system and back, can Prophet and Raptor Team stop the aliens and save mankind? *Zoo Poo* Del Rey

In *Thirteen*, Richard K. Morgan radically reshapes and recharges science fiction yet again, with a new and unforgettable hero in Carl Marsalis: hybrid, hired gun, and a man without a country . . . or a planet. Marsalis is one of a new breed. Literally. Genetically engineered by the U.S. government to embody the naked aggression and primal survival skills that centuries of civilization have erased from humankind, Thirteens were intended to be the ultimate military fighting force. The project was scuttled, however, when a fearful public branded the supersoldiers dangerous mutants, dooming the Thirteens to forced exile on Earth's distant, desolate Mars colony. But Marsalis found a way to slip back—and into a lucrative living as a bounty hunter and hit man before a police sting landed him in prison—a fate worse than Mars, and much more dangerous. Luckily, his "enhanced" life also seems to be a charmed one. A new chance at freedom beckons, courtesy of the government. All Marsalis has to do is use his superior skills to bring in another fugitive. But this one is no common criminal. He's another Thirteen—one who's already shanghaied a space shuttle, butchered its crew, and left a trail of

bodies in his wake on a bloody cross-country spree. And like his pursuer, he was bred to fight to the death. Still, there's no question Marsalis will take the job. Though it will draw him deep into violence, treachery, corruption, and painful confrontation with himself, anything is better than remaining a prisoner. The real question is: can he remain sane—and alive—long enough to succeed?

NEW YORK TIMES BESTSELLER • NOW AN EXCITING SERIES FROM NETFLIX • The shell that blew a hole in his chest was only the beginning in this “tour de force of genre-bending, a brilliantly realized exercise in science fiction.”—The New York Times Book Review In the twenty-fifth century, humankind has spread throughout the galaxy, monitored by the watchful eye of the U.N. While divisions in race, religion, and class still exist, advances in technology have redefined life itself. Now, assuming one can afford the expensive procedure, a person's consciousness can be stored in a cortical stack at the base of the brain and easily downloaded into a new body (or “sleeve”) making death nothing more than a minor blip on a screen. Ex-U.N. envoy Takeshi Kovacs has been killed before, but his last death was particularly painful. Dispatched one hundred eighty light-years from home, re-sleeved into a body in Bay City (formerly San Francisco, now with a rusted, dilapidated Golden Gate Bridge), Kovacs is thrown into the dark heart of a shady, far-reaching conspiracy that is vicious even by the standards of a society that treats “existence” as something that can be bought and sold.

REMEMBERING YOUR STORY

Wipf and Stock Publishers

Welcome back to the brash, brutal new world of the twenty-fifth century: where global politics isn't just for planet Earth anymore; and where death is just a break in the action, thanks to the techno-miracle that can preserve human consciousness and download it into one new body after another. Cynical, quick-on-the-trigger Takeshi Kovacs, the ex-U.N. envoy turned private eye, has changed careers, and bodies, once more . . . trading sleuthing for soldiering as a warrior-for-hire, and helping a far-flung planet's government put down a bloody revolution. But when it comes to taking sides, the only one Kovacs is ever really on is his own. So when a rogue pilot and a sleazy corporate fat cat offer him a lucrative role in a treacherous treasure hunt, he's only too happy to go AWOL with a band of resurrected soldiers of fortune. All that stands between them and the ancient alien spacecraft they mean to salvage are a massacred city bathed in deadly radiation, unleashed nanotechnology with a million ways to kill, and whatever surprises the highly advanced Martian race may have in store. But armed with his genetically engineered instincts, and his trusty twin Kalashnikovs, Takeshi is ready to take on anything—and let the devil take whoever's left behind.

Remembering Your Story invites readers to connect their faith stories with others and with God's story as revealed in scripture. Morgan guides readers to deeper memories of God's presence in

This revised edition of Morgan's work reflects his workshops, seminars, and conversations concerning spiritual autobiography. It also more intentionally focuses on faith stories. Morgan includes a chapter titled "Stories Connect Generations," which connects older and younger generations and encourages intergenerational ministries in the church.

Light of Setting Suns Upper Room Books

One hundred years from now, and against all the odds, Earth has found a new stability; the political order has reached some sort of balance, and the new colony on Mars is growing. But the fraught years of the 21st century have left an uneasy legacy . . . Genetically engineered alpha males, designed to fight the century's wars have no wars to fight and are surplus to requirements. And a man bred and designed to fight is a dangerous man to have around in peacetime. Many of them have left for Mars but now one has come back and killed everyone else on the shuttle he returned in. Only one man, a genengineered ex-soldier himself, can hunt him down and so begins a frenetic man-hunt and a battle survival. And a search for the truth about what was really done with the world's last soldiers. *BLACK MAN* is an unstoppable SF thriller but it is also a novel about prejudice, about the ramifications of playing with our genetic blue-print. It is about our capacity for violence but more worrying, our capacity for deceit and corruption. This is another landmark of modern SF from one of its most exciting and commercial authors.

Altered Carbon: Download Blues Random House Digital, Inc. Richard Belzer and David Wayne are back to set the record straight after *Dead Wrong*; this time they're going to uncover the truth about the many witness deaths tied to the JFK assassination. For decades, government pundits have dismissed these "coincidental" deaths, even regarding them as "myths" as "urban legends." Like most people, Richard and David were initially unsure about what to make of these 'coincidences'. After all, events don't "consult the odds" prior to happening; they simply happen. Then someone comes along later and figures out what the odds of it happening were. Some of the deaths seemed purely coincidental; heart attacks, hunting accidents. Others clearly seemed noteworthy; witnesses who did seem to know something and did seem to die mysteriously. Hit List is a fair examination of

the evidence of each case, leading to (necessarily) different conclusions. The findings were absolutely staggering; as some cases were clearly linked to a "clean-up operation" after the murder of President Kennedy, while others were the result of 'other forces'. The impeccable research and writing of Richard Belzer and David Wayne show that if the government is trying to hide anything, they're the duo who will uncover it.

MAJOR NEW NETFLIX SERIES FEB 2018 This must-read story is a confident, action-and-violence packed thriller, and future classic noir SF novel from a multi-award-winning author. Four hundred years from now mankind is strung out across a region of interstellar space inherited from an ancient civilization discovered on Mars. The colonies are linked together by the occasional sublight colony ship voyages and hyperspatial data-casting. Human consciousness is digitally freighted between the stars and downloaded into bodies as a matter of course. But some things never change. So when ex-envoy, now-convict Takeshi Kovacs has his consciousness and skills downloaded into the body of a nicotine-addicted ex-thug and presented with a catch-22 offer, he really shouldn't be surprised. Contracted by a billionaire to discover who murdered his last body, Kovacs is drawn into a terrifying conspiracy that stretches across known space and to the very top of society. For a first-time SF writer to be so surely in command of narrative and technology, so brilliant at world-building, so able to write such readable and enjoyable SF adventure, is simply extraordinary.

Altered Carbon Gollancz

In the distant future, the human body is a temporary and interchangeable commodity - if you can pay. For the interstellar elite, bodies are swapped out and reused without a second thought. You never grow old; you never die. However, some bodies are more temporary than others ... Takeshi Kovacs was once a member of the Envoy Corps, stormtroopers for the Interstellar Earth Protectorate, ultra-lethal adepts in switching bodies across the stars. While he served, he was known by a variety of names--Mamba Lev, One Hand Rending, the Icepick--all testament to his capacity for rapid response and extreme violence in whatever flesh he wore. Now he's out of the service and trying to live a different life. But the Protectorate hasn't changed its spots, no matter what world Kovacs drifts to, and with that old combat rage still burning deep inside him, will he ever really be able to walk away? Created by Richard K. Morgan, *Altered Carbon* was previously adapted as a Netflix television series. This original graphic novel, written by Rik Hoskin (Brandon Sanderson's *White Sand*/Pierce Brown's *Red Rising*, expands upon the *Altered Carbon* universe.

"Compelling . . . a rare find . . . a very special gift. This book of growing older stories is must reading for all ages, especially older adults. Written in fascinating style, these stories can do more to combat ageism than any book I have read in recent years." -- Miriam Dunson, former Associate for Older Adult Ministry, Presbyterian Church (USA) "Most older people we have known may not have made the history books, but they have made the history--of our families, our churches, our communities, our nations. Richard Morgan teaches us to once again listen to the stories of our elders because they are our history, our real history. Morgan helps us see--through the stories and words of those best suited to offer useful answers, namely those who have already been there--that for Christians aging is an experience we do not have to confront alone." -- Stephen Sapp, Dean of Religious Studies, University of Miami, Coral Gables, Florida "As one highlight involved in recording life biographies of people of all ages, Autumn Wisdom has special meaning for preserving the stories of people in the third age of life. If we don't preserve these stories in some way, they are lost. As the ancient saying states, 'If we lose the stories of older people, we lose a library!' These are eighty-one stories of older people which will not be lost." -- Beth Sanders, Director of Life Bio (www.lifebio.com)

For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

Altered Carbon Simon and Schuster
Richard L. Morgan has carved a niche as a bestselling author and an authority on older adult ministries and concerns. Now, he chronicles his own transition to a retirement community. Morgan speaks frankly about the losses and realities as he approached his own not-yet-frail "fourth quarter" (after age 75). Drawing from his journals of those sometimes-agonizing months, he takes us through his decision to move to a long-term facility and the first

year of settling in. "The retirement community became my home, and I must confront the inevitable illnesses of old age ... every day," Morgan writes. "While I could not minimize the difficulties and issues I faced in this new lifestyle, it gave me a view of this life as an insider. I became a participant, not an observer [as before in my ministry]." Morgan addresses the fears of life after 75: loss of health, cognitive ability, short-term memory, independence and status. Fifty-two scripture passages, meditations and prayers offer hope for those along this intense pilgrimage. As one reviewer says, "Settling In speaks loudly of the continuing call of a God with hands outstretched, who is always challenging us to further horizons, larger concerns and constantly surprising us with news to love and be loved." Morgan's soul-baring reflections are invaluable for those considering a move to a retirement community, current residents, their family and friends, and staff of facilities.

"This is a book of mature wisdom--straightforward, lucid, inspiring. Richard Morgan has grasped two essential realities: that people live as well as die in nursing homes and that God meets people here with unyielding love." --Henry C. Simmons, former Director of Center on Aging, Union Presbyterian Seminary "Dick Morgan has creatively and insightfully reflected the struggles of aging as lived in the never failing presence of God. The reader is provided an image of the human spirit strengthened by God to give life perspective and purpose, even when the body becomes more frail. The Scripture readings, devotions, and prayers will resonate with each caregiver, care receiver, and family member as they face together the adventures and challenges of a rich new phase of life." --W. Ray Inscoe, Director of Pastoral Care, Westminster Canterbury, Richmond, VA "As a chaplain in a long care facility, I often discover that residents are without devotional reading to nourish their faith. This work will be a source of inspiration and comfort to older people who are struggling with what meaning their life has in a nursing home, when 'someone else takes [them] where they do not want to go.' It makes them aware that God still has a plan for their lives." --Philip Jamison, Chaplain, Redstone Highlands, North Huntingdon, PA
