The True Story of the American Heroes on the Apollo 8 Spaceship Springer Science & Business Media

NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. "Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy."—Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis* By August 1968, the American space program was in danger of failing in its two most important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back against the wall, NASA made an almost unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America's greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who'd dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America's finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. "Rocket Men is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book."—The New York Times Book Review

[The Daring Odyssey of Apollo 8 and the Astronauts Who Made Man's First Journey to the Moon](#)

Severn House Publishers Ltd

- Details how exploratory probes sent to Mars in the 1970s triggered a plethora of anomalous events, particularly crop circles (glyphs), and how these events are messages from ET intelligence to help us send a human mission to Mars
- Reveals how the anomalous Cydonia region of Mars fits the Golden Ratio Spiral and looks at links between Martian formations and Earth's ancient sites
- Illustrated throughout with color photographs, maps, and diagrams

In this full-color study based on 25 years of research, Mary Bennett explores the ancient and modern connections between Mars and Earth as well as how extraterrestrial intelligences are trying to assist us in constructing a viable spacecraft to take a human crew swiftly and safely to Mars. She details how exploratory probes sent to Mars in the 1970s triggered over three decades of anomalous yet scientifically validated events, including crop circles, or crop glyphs. She explains how these formations, along with related events, encode advanced engineering concepts that offer solutions to the fundamental problems presently hindering long-haul crewed spaceflight—whether to the Moon, Mars, or beyond. Looking at the red planet itself, the author reveals the scientifically verifiable evidence pointing to intelligent design on the surface of Mars, specifically in the Cydonia region, which fits the Golden Ratio Spiral. She looks at the covert links between the Martian formations and Earth's ancient sites, such as the Avebury landscape in England and the Giza Complex. She describes how agencies concerned with space travel have been quietly mirroring areas of Mars through construction projects here on Earth,

revealing that many of the ET messages have already been partially decoded. Taking you from a complex on Mars to the Teotihuacán pyramids in Mexico, from phi ratios to the Pentagon, from the Great Pyramid to quantum computing, this exploration of the hidden influence of Mars shows that our abilities as a future space-faring species began in the ancient past and are now coming to fruition.

THE NASA HISTORY 50TH ANNIVERSARY EDITION

NYU Press

This book tells the story of Apollo 11 and dispels the myth that NASA faked the moon landings. The story is brought to life by exploiting the flight plan, mission report, in-flight transcripts (including conversations among the crew in the spacecraft that were not transmitted) and post-flight debriefing. It features scans recently produced by NASA of the original Hasselblad film. The final chapters discuss what was learned of the moon rocks, and reviews the follow-on missions. The author's impressive expertise and knowledge of the Moon landings shines through and seamlessly unites the myriad details of the mission.

The Nazis' Incredible Secret Technology Penguin

The landing site selected for the crew of Apollo 16 was in the lunar highland area of Descartes. NASA chose to send John Young to command the fifth lunar landing mission. Young had as much or more flight experience than any other member of the astronaut corps. He had circumnavigated the moon on Apollo 10 and he had flown two Gemini missions. Young would later go on to be the first commander of the Space Shuttle. The Descartes landing site was chosen because it appeared to be of volcanic origin. If it was, it might reveal secrets about the origins of the Earth. For three days Young and Duke embarked on their rover, away from the Lunar Module 'Orion', through rugged landscapes, in search of the origins of our world. Meanwhile Ken Mattingly shot hundreds of photographs and probed the moon's magnetic field from the Command Module 'Casper'. Back on Earth the political climate was beginning to turn against NASA and the remarkable risks and exploits undertaken by the crew of Apollo 16 went almost unnoticed. The three intrepid explorers and their spacecraft harvested a wealth of new data about the Earth-Moon system in an almost flawless performance of skills and bravado. Compiled here are many important documents about the mission including the complete debriefing in the crew's own words. The CD-ROM features an exclusive interview with Commander John Young and the complete footage shot at Descartes, over 2500 still pictures and 18 interactive panoramas. Running time: over 10 hours.

The exciting and inspiring true story of Apollo 8, the first crewed spaceship to break free of the Earth's orbit and reach the moon, by the best-selling author of Apollo 13. What's more exciting than spaceships and astronauts? How about a spaceship carrying the first astronauts ever to see the moon firsthand--on Christmas! The year was 1968, and the American people were still reeling from the spacecraft fire that killed the Apollo 1 crew a year earlier. On top of that, there were rumors that the Russian cosmonauts were getting ready to fly around the moon. NASA realized that they needed to take a bold step--and that they needed to take it now. They wanted to win the space race against Russia and hold true to President Kennedy's promise to put a man on the moon by the end of the decade. So in a risky move, a few days before Christmas of that year, they sent Frank Borman, Jim Lovell, and Bill Anders to the moon! This book about the exciting and inspiring true story of Apollo 8, the first crewed spaceship to break free of Earth's orbit and reach the moon, tells the story of these three brave men, the frantic rush to get their rocket ready, and the journey that gave the American people--and the world--a new look at the planet we live on and the corner of space we inhabit. Filled with the science and training required to put a person into space, and every detail of what it's like to live in a spaceship for days on end (including what happens when astronauts need to use the bathroom), this book is sure to leave kids clamoring for a spot on the next mission to outer space.

"An extraordinary delight for a reader of any age." —The New York Times Book Review Brian Floca explores Apollo 11's famed moon landing with this newly expanded edition of Moonshot! Simply told, grandly shown, and now with eight additional pages of brand-new art and more in-depth information about the historic moon landing, here is the flight of Apollo 11. Here for a new generation of readers and explorers are the steady astronauts clicking themselves into gloves and helmets, strapping themselves into sideways seats. Here are their great machines in all their detail and monumentality, the ROAR of rockets, and the silence of the Moon. Here is a story of adventure and discovery—a story of leaving and returning during the summer of 1969, and a story of home, seen whole, from far away.

Apollo 8: Man Around the Moon Mango Media Inc.

Moon Man is Bart Sibrel's revealing memoir recalling his harrowing journey investigating what really happened during America's famous "Apollo" missions. It features truly hair-raising and life-threatening encounters with agents from the US government's secret agencies. Sibrel's memoir divulges, for the very first time, his real-life espionage adventures while uncovering one of the CIA's greatest secrets, including Sibrel's discovery of privately recorded audio of an Apollo astronaut plotting his assassination by the CIA, which would not be necessary if the Apollo missions were real. Moon Man also exposes, for the very first time, the official CIA Code-Name for the real Apollo project, the military base where the first fake Moon landing was filmed, as well as the names of fifteen US government scientists and officials who were recorded in attendance for the first Moon landing falsification, some of whom are still alive today. This highly revealing information was provided to Sibrel by the Chief of Security of this secretive military base, who finally confessed his regrettable participation in this despicable government fraud on his deathbed. Bart Sibrel is an award-winning filmmaker, writer, and investigative journalist, who has produced television programs and documentaries for over thirty-five years. He has been employed by two of the three major US networks, worked as a television news reporter, and has produced segments for ABC, NBC, and CBS. Sibrel regularly speaks as a guest commentator regarding the Moon landing fraud, and has appeared as such on NBC, FOX, CNN, and HBO to discuss his films "A Funny Thing Happened on the Way to the Moon" and "Astronauts Gone Wild". Bart Sibrel grew up as a devout supporter of the supposed Moon landings, yet over the years, gradually began to recognize their unfortunate falsification. In Sibrel's mind, the claim that astronauts walked on the moon on the very first attempt with antiquated untried 1960s technology, when today with five decades of more advanced technology the US can only send astronauts one-thousandth the distance to the Moon, simply defies logic. Sibrel is convinced that until the Moon landing fraud is exposed, the governments of the world will continue deceiving the people under their care until their eventual demise. Sibrel.com

The story of Ken Johnston's archive of historic NASA photos and his decision to go public with evidence of the manipulation of those images from the Apollo moon missions is the stuff of legend in the alternative history community. The basic story is that Ken discovered a disturbing situation in the secret halls of our hallowed space agency. At the Lunar Receiving Laboratory, Ken was the Director of the Data and Photo Control Department, responsible for all the photographs and data generated by the contributing scientists from around the world. He also produced and edited the NASA Lunar Sample Information Catalog for each of the Lunar landing missions. One day, Ken enters the room where he sees strange activity. Given that he feels a sense of responsibility for the integrity of the NASA collection, he inquires as to what is going on. He spoke with several people who called themselves "strippers" because they were stripping out details in lunar images that might be hard to explain. That day, they were at the task of painting out the stars in particular lunar images. The unusually lame excuse given was that the stars in the lunar sky would "confuse people." This was alarming for Ken to discover. He found out also that "smudging out" anomalies on images was commonplace. Ken's story could be counted as a minority report in NASA's branded panorama of American heroics. The US Government and the American people had allocated

significant financial and other resources toward the goal of reaching the moon at the behest of our young President Kennedy. The idea was to see what was there, to share that information to the world, and elevate the knowledge of mankind. To discover that the artifacts of that effort might have been manipulated was highly disappointing. It is this scenario being asserted by Ken Johnston, the very human being, who at one time, had watch over the chain of evidence.

As a child I was fascinated by the Apollo Moon missions. As I got older the fascination never waned, until, approximately 15 years ago, I happened to watch a documentary on one of the Apollo missions. In that they discussed the method used for circumnavigating the Moon during the missions. As a trained pilot I remember questioning that method of navigation and from there I started to doubt the validity of the Apollo Moon missions itself, which led to subsequent years of research. This book is culmination of that research and the reasons why I believe that the Apollo Moon missions were faked. Included in Part 1 of this series I discuss the following key factors: □ The Saturn V rocket and the fraudulent claims on the powerful F-1 engines, without which the Apollo landings could not have taken place. □ The non-existent capabilities of the Apollo guidance computer and the fact that this computer was a fake. □ The conflicting and contradictory information regarding the radiation intensity between the Earth and Moon which would have prevented any manned lunar landing. □ The inadequate shielding for both the Command Module and Lunar Module which would have ended any manned mission outside of Low Earth Orbit in a matter of minutes if not seconds. □ And the incomplete, missing and/or destroyed documents along with the thousands of missing reels of telemetry tapes containing data that has been 'lost' forever

As the dust settles on the 30th anniversary of Apollo 11, information is now coming to light that throws into serious doubt the authenticity of the Apollo record. New evidence clearly suggests that NASA hoaxed the photographs taken on the surface of the Moon. These disturbing findings are supported by detailed analysis of the Apollo images by professional photographer David S Percy ARPS and physicist David Groves PhD. The numerous inconsistencies clearly visible in the Apollo photographic account are quite irrefutable. Recent research indicates that the errors evidenced in DARK MOON were deliberately planted by individuals determined to leave clues to the faking in which they were unwillingly involved. DARK MOON is the answer to the question-did the Apollo missions really land a man on the Moon and return him alive and well to Earth, or is the record incorrect?

Courier Dover Publications

This book is a groundbreaking contribution to the study of the UFO enigma, originally published over 30 years ago. In this book, Sanderson, a renowned zoologist with a keen interest in the paranormal, puts forward the curious theory that "OINTS"-Other Intelligences-live under the Earth's oceans. This underwater, parallel, civilization may be twice as old as Homo sapiens, he proposes, and may have developed what we call space flight." Sanderson postulates that the OINTS are behind many UFO sightings as well as the mysterious disappearances of aircraft and ships in the Bermuda Triangle. What better place to have an impenetrable base than deep within the oceans of the planet? Yet, if UFOs, or at least some of them, are coming from beneath our oceans or lakes, does it necessarily mean that there is another civilization besides our own that is responsible? In fact, could it be that since WWII a number of underwater UFO bases have been constructed by the

very human governments of our planet? Whatever their source, Sanderson offers here an exhaustive study of USOs (Unidentified Submarine Objects) observed in nearly every part of the world. He presents many well-documented and exciting case studies of these unusual sightings; more.

The decades-long love story of a NASA commander and the leader of the Astronaut Wives Club *Far Side of the Moon* is the untold, fully authorized story of the lives of Frank and Susan Borman. One was a famous astronaut—an instrumental part of the Apollo space program—but the other was just as much a warrior. This real-life love story is far from a fairy tale. Life as a military wife was beyond demanding, but Susan always rose to the occasion. When Frank joined NASA and was selected to command the first mission to orbit the moon, that meant putting on a brave face for the world as her husband risked his life for the space race. The pressure and anxiety were overwhelming, and eventually Susan's well-hidden depression and alcoholism finally came to light. Frank had to come to

terms with how his "mission above all else" mentality contributed to his wife's suffering. As Susan healed, she was able to begin helping others who suffered in silence from mental illness and addiction. Discover how Frank and Susan's love and commitment to each other is still overcoming life's challenges, even beyond their years as an Apollo commander and the founder of the Astronaut Wives Club.
