WHY MUSIC MOVES US

Routledge

The study of pre-existing film music is now a well-established part of Film Studies, covering 'classical' music and popular music. Generally, these broad musical types are studied in isolation. This anthology brings them together in twelve focused case studies by a range of scholars, including Claudia Gorbman, Jeongwon Joe,

Raymond Knapp, and Timothy Warner. The first section explores art music, both instrumental and operatic; it revolves around the debate on the relation between the aural and visual tracks, and whether pre-existing music has an integrative function or not. The second section is devoted to popular music in film, and shows how very similar the functions of popular music in film are to the supposedly more 'elite' classical music and opera. Case studies in part 1: Eyes Wide Shut, Raging Bull, Brief Encounter, Detective, The Godfather Part III, three versions of the Carmen story (DeMille's, Preminger's and Rosi's), Amadeus, The Birth of a Nation, M: Eine Stadt sucht einen Mörder, Needful Things, Rat Race. Case studies in part 2: various films by Almodóvar, Young Frankenstein, Pulp Fiction, Trainspotting, Amelie, High Fidelity, Ghost World, Heavenly Creatures, The Virgin Suicides, and the video Timber by Coldcut.

For Unto Us a Child Is Born Alfred Music

The Hispanic contribution to the making of the United States has been blatantly glossed over by most historians for the past three hundred years, despite the gallant effort of a handful of them who sought to do justice and set the record straight. This misrepresentation of the historical facts has rendered a whole nation to become oblivious to its true beginnings and formation, crippling its character and jeopardizing its future. This book, based on established and undisputed historical records, is a new attempt to bring out the whole truth, to make us realize how this nation really came into being. The making of present-day United States did not begin in 1607, nor was it confined to thirteen

unsettled colonies barely occupying a minute portion of a vast continent. We need to set the historical clock back and then forward, from 1513 on through well past 1776, and give due credit to Spain and other Hispanic countries, such as Mexico, for laying down many of the foundations that made us what we are today. We need also to be proud of our Hispanic heritage, and trumpet it with equal fervor and appreciation as we do it with other less deserving ones. It is only then that we would be able to define our character both as a nation and as a people.

Beginning in the 1930s, men and a handful of women came from India's many communities—Marathi, Parsi, Goan, North Indian, and many others—to Mumbai to work in an industry that constituted in the words of some, "the original fusion music." They worked as composers, arrangers, assistants, and studio performers in one of the most distinctive popular music and popular film cultures on the planet. Today, the songs played by Mumbai's studio musicians are known throughout India and the Indian diaspora under the popular name "Bollywood," but the musicians themselves remain, in their own words, "behind the curtain"—the anonymous and unseen performers of one of the world's most celebrated popular music genres. Now, Gregory D. Booth offers a compelling account of the Bollywood film music industry from the perspective of the musicians who both experienced and shaped its history. In a rare insider's look at the process of musical production from the late 1940s to the mid 1990s, before the advent of digital recording technologies, Booth explains who these unknown musicians were and how they came to join the film music industry. On the basis of a fascinating set of first-hand accounts from the musicians themselves, he reveals how the day-to-day circumstances of technology and finance shaped both the songs and the careers of their creator and performers. Booth also unfolds the technological, cultural, and industrial developments that led to the enormous studio orchestras of the 1960s-90s as well as the factors which ultimately led to their demise in contemporary India. Featuring an extensive companion website with video interviews with the musicians themselves, *Behind the Curtain* is a powerful, ground-level view of this globally important music industry.

Lilus Kikus and Other Stories by Elena Poniatowska Oxford University Press

For the last fifty years, the German Occupation of France has been regarded as a period characterised by four things: cold, hunger, the absence of freedom and above all fear; a time when the indigenous population was cruelly and consistently oppressed by the army of occupation. The people of France were either bold members of the Resistance or craven collaborators. In this riveting and provocative study, Robert Gildea reveals a rather

different story, a story which shows that the truth lies - as so often - somewhere in between. 'Excellent... a peculiarly rich book, enlightening about conscription, forced labour, the role of the Catholic Church, sex between German soldiers and French women ('horizontal collaboration') and much else' Frank McLynn, New Statesman 'Gildea's revisionist account is the most convincing and lucid that I have read. Rather as his Oxford colleague Roy Foster did for Irish history (when he rubbished the "400 years of national suffering" version that has had such disastrous consequences), Gildea has succeeded in giving us a startlingly original view of what we thought was a familiar period.' "Put briefly, this is a superb collection of essays. They are lucidly and eloquently written, and make their points with wit and clarity. They are full of perceptive, highly stimulating, and occasionally provocative illustrations of how practice connects to theory (and vice versa) without getting bogged down in academic language. The contributors include a combination of exceptionally admired film music scholars, and of musicologists renowned for their keen insights into the cultural contexts of music production and reception. This book is an excellent resource and compelling read."—Derek B. Scott, author of *From the Erotic to the Demonic: On Critical Musicology*

"In this guide, Cooper considers Herrmann's musical technique and theorizes some of the ways in which music can be meaningful in film. He also explores nonmusical contexts of the film, including the screenplay's relationship to the popular novel from which it was adapted, as well as the contribution of director Joseph L. Mankiewicz, the performances of Gene Tierney and Rex Harrison, and the editing of Dorothy Spencer. Cooper also provides a quantitative, evidence-based study of the score. A rundown of all the cues in Herrmann's manuscript is followed by an examination of the score as a musical artifact. In his evaluation of the overall approach to the soundtrack, the author considers the musical detail of the score's structure, its themes, and their orchestration.
