PENGUIN BOOKS
Social constructionism is the theory that people develop knowledge of the world in a social context, and that much of what we perceive as reality depends on shared assumptions. From a social constructionist perspective, many things we take for granted and believe are objective reality are actually socially constructed, and thus, can change as society changes.

Social Constructionism Definition - ThoughtCo
Social constructionism is a theory of knowledge in sociology and communication theory that examines the development of jointly-constructed understandings of the world that form the basis for shared assumptions about reality. The theory centers on the notion that meanings are developed in coordination with others rather than separately within each individual.

Social constructionism - Wikipedia
Social constructionism is the philosophy or academic approach that views human reality as artificially constructed by social processes. In other words, it views things that people commonly view as "real" as a flexible reality that is defined by processes of communication. The following are illustrative examples of social constructionism.

7 Examples of Social Constructionism - Simplifiable
'Social construction' is a central metaphor in contemporary social science, yet it is used and understood in widely divergent and indeed conflicting ways by different thinkers. Most commonly, it is seen as radically opposed to realist social theory.
