*Accounting for Business: An Introduction*, second edition, has been thoroughly revised to provide vocational students with a comprehensive overview of key financial principles. Its business-oriented focus combined with a clear, concise writing style – an approach proven successful in the first edition – helps students gain competency in preliminary accounting concepts and applications in a practical way. Students will learn the principles that underpin the recording and control of business transactions. They will also learn how to build an accounting system for commercial businesses, ranging from the smallest enterprise to a larger trading business.

This book is not about selling products -- it is about selling yourself, your ideas, and your services. This book explains an innovative dialogue sales process, and the relationship sales principles that underpin it. In every sales situation, there is both a seller and a buyer and, at different times, either the buyer or the seller may take the lead. The dance they perform may or may not lead to a deal, but it will leave them knowing a little more about each other's strengths and weaknesses. These two dancers are "connected" and follow the same steps -- The five steps they follow are to plan, connect, dialogue, record, and follow up. The five steps are the basis of the dialogue process. In addition, this book provides easy-to-follow guidance for three groups of people:

1. Professionals wanting to sell their services and improve their business development; 2. Thought leaders, change agents, innovators, entrepreneurs, senior public servants, and advocates wanting to sell their ideas to others; 3. Mid-career job seekers and recent graduates aiming to sell themselves into a dream job role either full or part-time.

This book includes the original, peer-reviewed research papers from the 2nd International Conference on Electrical Systems, Technology and Information (ICESTI 2015), held in September 2015 at Patra Jasa Resort & Villas Bali, Indonesia. Topics covered include: Mechatronics and Robotics, Circuits and Systems, Power and Energy Systems, Control and Industrial Automation, and Information Theory. It explores emerging technologies and their application in a broad range of engineering disciplines, including communication technologies and smart grids. It examines hybrid intelligent and knowledge-based control, embedded systems, and machine learning. It also presents emerging research and recent application in green energy system and storage. It discusses the role of electrical engineering in biomedical, industrial and mechanical systems, as well as multimedia systems and applications, computer vision and image and signal processing. The primary objective of this series is to provide references for dissemination and discussion of the above topics. This volume is unique in that it includes work related to hybrid intelligent control and its applications. Engineers and researchers as well as teachers from academia and professionals in industry and government will gain valuable insights into interdisciplinary solutions in the field of emerging electrical technologies and its applications.

Auditing counts! With recent incidents at WorldCom, Enron, Xerox, Tyco, and other companies, auditing has never been so important. Auditing is perhaps our single best defense in ensuring the integrity of our financial reporting system. That's why this

new Eighth Edition of Boynton and Johnson's Modern Auditing focuses on decision making and the critical role auditors play in providing assurance about the integrity of the financial reporting system. Known for its clear writing and accessibility, this text provides comprehensive and integrated coverage of current developments in the environment, standards, and methodology of auditing. Features \* Real-world examples relate issues discussed in the chapter to ethics, audit decision making, and the integrity of the financial reporting system. \* Focus on Audit Decisions sections highlight key factors that influence an auditor's decisions. \* Includes discussion of the role of the Public Company Accounting Oversight Board (PCAOB) Auditing Standards, and a chapter feature highlights PCAOB standards that differ from Generally Accepted Auditing Standards for private companies. \* Expanded case material related to the integrated audit case (Mt. Hood Furniture) provides a variety of databases that allow students to utilize generalized audit software (IDEA) to accomplish various audit tasks. Multiple databases allow the case to be reused with different data from term to term. \* A flowchart style chapter preview begins each chapter. \* Chapter summaries reinforce important audit decisions included in the chapter. \* End-of-chapter material organized by audit decisions provides a clear link between audit decisions discussed in each chapter and the problem material.
