Transnational Business Problems Martinus Nijhoff Publishers

Strategic human rights litigation (SHRL) is a growing area of international practice yet one that remains relatively under-explored. Around the globe, advocates increasingly resort to national, regional and international courts and bodies 'strategically' to protect and advance human rights. This book provides a framework for understanding SHRL and its contribution to various forms of personal, legal, social, political and cultural change, as well as the many tensions and challenges it gives rise to. It suggests a reframing of how we view the impact of SHRL in its multiple dimensions, both positive and negative. Five detailed case studies, drawn predominantly from the author's own experience, explore litigation in a broad range of contexts (genocide in Guatemala; slavery in Niger; forced disappearance in Argentina; torture and detention in the 'war on terror'; and Palestinian land rights) to reveal the complexity of the role of SHRL in the real world. Ultimately, this book considers how impact analysis might influence the development of more effective litigation strategies in the future.

The issue of the human rights of people with mental disabilities has been ignored for decades by the international agencies vested with the protection of human rights on a global scale. It is only within the past several years that society has begun to understand that violations of persons' mental disability rights are violations of human rights. This is the first and only casebook that considers the intersection between international human rights law and comparative mental disability law; it provides a systematic investigation of all of the relevant issues. Topics covered include a comparison of civil and common law systems, an overview of international human rights law, an overview of regional human rights tribunals, an overview of U.S. constitutional mental

disability law, mental disability law in an international human rights context, comparative mental disability law (civil and common, scholarly articles and case law), the use of institutional psychiatry as a means of suppressing political dissension, the 'universal factors' in this area of law, and the globalization of disability law. This casebook provides an overview of the main international and regional legal standards related to the human rights of women and explores their development and practical application in light of contemporary times, challenges, and advances. It navigates the nuances of the ongoing problems of discrimination and gender-based violence, and analyzes them in the context of modern challenges, such as the COVID-19 pandemic, the MeToo movement and its aftermath, the growth of non-state actors, environment and climate change, sexual orientation and gender identity, and the digital world, among others. Incorporating lessons learned from her experiences as a practitioner and a law professor, the author navigates and provides snapshots of priority issues and themes in the field of the human rights of women. In each chapter, students are encouraged to reflect and answer questions alluding to the intricacies, challenges, and advances in the protection and exercise of women's rights in modern times. The chapters also include many case judgments, decisions, views, and general recommendations adopted by universal and regional bodies and courts advancing the development of women human rights issues. This analysis is complemented by key scholarship, reports, and statements produced in the area of the human rights of women and its different features. Students of issues concerning human rights, women, gender equality, and international law will attain a thorough understanding of the field through this contemporary casebook.

The title of the Hague Yearbook of International Law reflects the close ties which have always existed between the AAA and the City of The Hague with its international law institutions, and indicates the Yearbook's aim of devoting attention to developments taking place in the international law institutions based in The Hague. However, the Yearbook has a broader scope as

well: to offer a platform for review of new developments in the field of international law. As of the 2010 Volume, the Yearbook will be compiled by a new and expanded Editorial Board, offering fresh ideas and a new approach. A newly established Advisory Board has also been added, including ICJ Judge Bruno Simma, Serge Brammertz, Prosecutor of the International Criminal Tribunal for the Former Yugoslavia (ICTY), Jacomijn J. van Haersolte-van Hof, advocate (advocaat) at HaersolteHof and arbitrator (The Netherlands) and Professor Peter Hilpold, Innsbruck University (Austria). Sections have been created on public international law, private international law, international investment law and international criminal law, containing in-depth articles on current issues. The breadth of the Yearbook's content thus offers an interesting and valuable illustration of the dynamic developments in the various sub-areas of international law.

HAGUE YEARBOOK OF INTERNATIONAL LAW / ANNUAIRE DE LA HAYE DE DROIT INTERNATIONAL, VOL. 23 (2010)

Cambridge University Press

Human rights have traditionally been framed in a vertical perspective with the duties of States confined to their own citizens or residents. Interpretations of international human rights treaties tend either to ignore or downplay obligations beyond this 'territorial space'. This edited volume challenges the territorial bias of mainstream human rights law. It argues that with increased globalisation and the impact of international corporations, organisations and non-State actors, human rights law will become less relevant if it fails to adapt to changing realities in which States are no longer the only leading actor. Bringing together leading scholars in the field, the book explores potential applications of international human rights law in a multi-duty bearer setting. The first part of the book examines the current state of the human rights obligations of foreign States, corporations and international financial institutions, looking in particular at the ways in which they address questions of attribution and distribution of obligations and responsibility. The second part is geared towards the identification of common principles that may underpin a human rights legal regime that incorporates obligations of foreign States as well as of non-State actors. As a marker of important progress in understanding what lies ahead for integrating foreign States and non-State actors in the human rights dutybearer regime, this book will be of great interest to scholars and practitioners of international human rights law, public international law and international relations.

National Human Rights Institutions: Rules, Requirements, and Practice is an authoritative guide to National Human Rights Institutions (NHRI) in their important role as promoters and protectors of human rights at the national level. This book serves as both the first ever 'casebook' on the findings of the SCA, as well as a comprehensive reference for the requirements for compliance of NHRIs with the Paris Principles, and is a vital source of information on the actual practice of NHRIs. Since its earliest assessments of NHRIs in 1998, the Global Alliance of NHRIs' (GANHRI) Sub-Committee on Accreditation (SCA) has developed a substantive body of work that has examined the operation and practice of over 128 institutions in countries and territories from every part of the globe. Analysed and catalogued in their entirety into an accessible format for the first time, and covering all aspects of NHRIs' structure and functioning, as well as providing a thorough overview of how the SCA works in practice, this book is an indispensable resource for scholars and practitioners who wish to understand and learn how NHRIs operate at the national level, as well as what problems they face and ultimately, how they can be strengthened. Benefitting from the

unique insight of David Langtry, a member of the SCA for 11 years, this book is an essential source for all those interested in the role of NHRIs, and more broadly, of all state-established institutions intended to function independently.

INTERNATIONAL HUMAN RIGHTS LAW

Oxford University Press

International Human Rights Law provides a student-oriented examination of the law of international human rights. Although human rights are hardly a recent invention, the advent of their international protection is one of the most profound developments of the modern era. How governments treat their own citizens and others is no longer strictly an internal domestic matter but rather the concern of all humankind. International law is now a central feature of the effort to progressively achieve human freedom and dignity for all.

With an Introduction by Justice Alito, this Comparative Constitutional Law casebook stands apart from other casebooks. It focuses on the 15 constitutional democracies in the G-20 Nations: 1) the United States, 2) the United Kingdom, 3) France, 4) Germany, 5) Japan, 6) Italy, 7) India, 8) Canada, 9) Australia, 10) Brazil, 11) South Korea, 12) South Africa, 13) Indonesia, 14) Mexico, and 15) the European Union. The G-20 Nations together comprise 85% of the world's GDP and two-thirds of the world's population. Thus, this casebook maintains a better sense of relevance than similar books, which often focus heavily on esoteric jurisdictions. It is also less Euro-centric than competing books; most chapters include cases from Brazil, Mexico, and India. Substantively, this casebook compares the constitutional law of the selected countries with respect to fourteen topics: 1) constitutionalism - constitutional history, constitution-making, amendment, and secession rules; 2) the emergence and nature of judicial review; 3) the separation of powers, bicameralism, and comparative administrative law; 4) federalism; 5) bills of rights, birthright freedom and equality, and human dignity; 6) equal protection of the laws; 7) freedom of expression; 8) freedom of religion; 9) civil, criminal, and appellate procedure; 10) protection of economic liberties; 11) positive social entitlements and state action; and, finally, 12) constitutional guarantees of democracy. It concludes with ideas that are of particular relevance to U.S. constitutional law.

Pedagogically, this casebook contains more cases and fewer law review articles than competing books, making it teacher-friendly. It can be taught in a three-day weekly format, in a two-day weekly format, or in a once-a-week seminar format. It is accompanied by a comprehensive teacher's manual and suggested syllabi.

Modern Water Law provides a comprehensive text to study the range of legal issues and doctrines that affect water resources. This is a national book that uses many recent cases, bringing a fresh perspective to the field. The authors begin with private water use rights, including common law doctrines for riparian reasonable use and prior appropriation, as well as groundwater rights and the statutory schemes for administering water use rights. The book explores the range of public rights in water, including navigation, the public trust doctrine, federal reserved rights, and interstate water management. The book also introduces modern challenges and environmental protection goals, focusing on the energy-water nexus, water pollution, and endangered species conflicts. The final chapters combine these concepts in the context of complex watershed restoration challenges and water rights takings litigation.

Human Rights Advocacy in the United States Transaction Publishers

The Sixth Edition of Transnational Business Problems combines the best aspects of a conceptual, systemic approach and a problems approach. It provides a sophisticated intellectual framework for understanding the most significant contractual and regulatory issues in international business. At fewer than 600 pages, this compact book is ideal for a one-semester course. One Volume. Transnational Business Problems presents the important practical and policy aspects of international transactions in one reasonably-sized volume. Covers Systemic Issues First. Transnational Business Problems considers systemic issues first. Four introductory chapters discuss the role of the international lawyer, the resolution of international disputes, the relationship between international and domestic law, the extraterritorial reach of domestic law, and corporate social responsibility. Problems Approach. The introductory chapters are followed by eight problems, each focused on a different kind of transaction: transnational sales, agency and distributorship agreements, licensing, foreign direct investment, mergers and acquisitions, joint ventures, concession agreements, and international debt instruments. Each problem covers both contractual and regulatory issues. Nearly all begin with a sample contract. Sophistication. The book uses primary source materials--draft contracts, statutes, regulations, treaties, cases, and arbitral awards--that allow students, with help from the text, to work through issues in a realistic way. The book goes beyond the nuts and bolts of transactions to encourage consideration of broader policy issues: from the liability of corporations for human rights violations to restrictions on foreign investment; from the compulsory licensing of HIV drugs to the restructuring of sovereign debt. Geographical Diversity. Transnational Business Problems reflects the geographical diversity of business today. The problems focus on China, the European Union, the Andean Community, Mexico, and Brazil. Materials from other parts of the world are included in the introductory chapters. Intellectual Heritage. Transnational Business Problems grows out of a rich intellectual heritage that began with Milton Katz and Kingman Brewster's International Transactions and evolved into Henry Steiner and Detlev Vagts's Transnational Legal Problems. The book views

transnational business problems as a particular species of transnational legal problem that both generates and is influenced by transnational legal process. Fully Updated. The Sixth Edition of Transnational Business Problems is fully updated to account for developments through the start of 2019. The introductory chapters and many of the problems have been substantially revised. Every year between editions the authors provide an update in memo form that teachers can distribute as a supplement to their classes.

This pedagogically innovative book is the only law school case book focused on human rights advocacy in the United States. It illuminates a range of both hot topics and persistent theoretical and doctrinal issues while equipping students to thoughtfully engage these tools in their own practice of law. Readings and case studies expose students to the history, tools, and critiques of the U.S. human rights movement and the legal and practical challenges of human rights implementation in the United States. Skills exercises introduce practice-oriented approaches to

engaging human rights-based strategies, including practice before international treaty bodies as well as domestic policymakers. Additionally, the appendices offer the text of relevant human rights treaties. Appropriate for introductory and advanced seminars, as well as clinical and other experiential offerings, the materials engage students on a remarkable range of issues, including immigration, rights of indigenous peoples, racially discriminatory policing, and right to housing. Chapters also explore fundamental issues of federalism, sovereignty, judicial review, and legal ethics.
