They Have Feelings Too John Wiley & Sons
The first book in the field written expressly for veterinary technicians by leaders in the field, *Small Animal Emergency and Critical Care, 2nd Edition* is efficiently organized for quick access to dozens of common, life-saving protocols and procedures. Section I includes chapters on assessment, equipment, and therapies and techniques. Every procedure is thoroughly illustrated and described in step-by-step detail with important drug information. Section II addresses specific systemic problems such as hematologic, cardiovascular, and gastrointestinal emergencies; shock; and trauma. Total team management of the critical patient is emphasized throughout. Logically organized by physiologic sign to help busy practitioners prioritize interventions Helpful equipment lists are provided at the beginning of most chapters. Technician Tips highlight specific

procedures using diagrams, photos, and detailed instructions. New chapters cover isolation of the critically ill, infectious patient; client communication including triage, both in the waiting room and on the phone; and restraint techniques, sampling techniques, and common emergencies related to birds and exotics. Expanded Pain Management, Respiratory Emergencies, and Urologic Emergencies chapters include practical information on a wide variety of presenting problems. Expanded coverage of basic lab equipment, fluid therapy, and oxygen therapy provides the most current information.

One Man, One Medicine, One Health Wiley-Blackwell

This practical guide to small animal ophthalmic emergencies is ideal for the non-specialist veterinarian. From a problem-oriented approach, it describes ocular emergencies and gives information for immediate palliative measures and long-term treatment. Clinical pathways, diagnostic flowcharts, bullet points, and

easy-to-follow line diagrams provide instant access to the correct diagnosis and management of ocular emergencies. Tinted boxes highlight important issues, key information, and additional material on background pathogenesis and treatment rationale. The emphasis on differential diagnosis and treatment options, as well as recommendations on when to refer a case to a specialist, makes this book an essential consulting room reference for every veterinary practitioner. Written at an appropriate level for the non-specialist veterinarian, making it a practical guide for managing small animal ophthalmic emergencies. Provides instant access to the correct diagnosis and management of ocular emergencies with clear, easy-to-use diagnostic flowcharts. Highlights key information and important issues in tinted boxes throughout the text, making clinical facts accessible to busy practitioners.

No other quick reference comes close in covering the diagnosis and treatment of hundreds of diseases in dogs and cats. Etienne Cote's *Clinical Veterinary Advisor: Dogs and Cats*, 2nd Edition is like six books in one -- with concise topics within sections on diseases and disorders, procedures and techniques, differential diagnosis, laboratory tests, clinical algorithms, and a drug formulary. Revised from cover to cover, this edition includes dozens of new topics. It also includes free access to a fully searchable companion website featuring an electronic version of the text, all of the book's images, a searchable drug formulary, and 150 Client Education Sheets in both English and Spanish. Section I: Diseases and Disorders provides at-a-glance coverage of nearly 800 common medical problems, arranged alphabetically for immediate access. Entries include a definition, synonyms, epidemiology, clinical presentation, etiology and pathophysiology, differential diagnosis, workup, treatment, prognosis and outcome, plus pearls and considerations. Concise descriptions simplify diagnosis and treatment. Section II: Procedures and Techniques offers illustrated, step-by-step instructions for understanding and performing 111 important clinical procedures. Section III: Differential Diagnosis displays nearly

every possible cause for 260 different clinical disorders. Section IV: Laboratory Tests summarizes essential information needed for interpreting more than 150 lab tests. Section V: Clinical Algorithms provides decision trees for the diagnostic and therapeutic decision-making processes involved in managing 91 of the most common clinical conditions/disorders. Section VI: Drug Formulary is a compilation of dosages and other relevant information for more than 300 new and current medications. 410 illustrations and photographs depict disease processes and related concepts. A companion website includes the complete text of the book in a fully searchable format, allowing quick access to information, and all of the book's images. It also includes 150 Client Education Sheets, each available in both English and Spanish. Clinical guidance added to diseases and disorders chapters helps you select appropriate tests and treatments for each case. 50 new client "how-to" handouts are added for a total of 150 client education sheets, helping to improve outcomes by informing clients. Technician Tips are inserted throughout nearly 800 diseases and disorders, providing specialized information for veterinary technicians. Enhanced electronic image collection on the companion website includes color images and additional figures not found in the text.

Written by today's leading experts, *Kirk's Current Veterinary Therapy, Volume XV* keeps you completely current with the latest in disease management for dogs and cats. It uses a clear and practical approach to medical disorders; the typical chapter includes both a brief guide to diagnosis and a detailed discussion of therapy. You'll gain quick access to information such as critical care; infectious, toxicologic, and dermatologic disorders; and diseases of the gastrointestinal, cardiovascular, respiratory, urinary, reproductive, neurologic, and ophthalmologic systems. From editors John Bonagura and David Twedt plus hundreds of expert contributors, *Kirk's Current Veterinary Therapy* enhances your skills in evidence-based treatment planning. "For the practitioner who wants to keep abreast of current therapies for a wide range of topics, ... CVT is the perfect reference." Reviewed by: Ryan Ong, WAVES Veterinary Hospital on behalf of Australian Veterinary Hospital, March 2015 Authoritative, easy-to-read coverage includes a brief approach to diagnosis with

detailed discussions of the latest therapies. An organ-system organization and a convenient index make it easy to find solutions for specific disorders. Treatment algorithms help you manage patients with difficult medical problems. A handy Table of Common Drugs, updated by Dr. Mark Papich, offers a quick reference to dosage information. 365 illustrations depict the pathophysiologic basis for therapy or show the management of a defined condition. A companion website includes valuable information still relevant from CVT XIV, an index, and drug formulary, all fully searchable; a collection of 300 images; references that link to PubMed; and clinical references on laboratory test procedures and interpretation, normal reference ranges, conversion tables, and more. Concise chapters are only 2-5 pages in length, saving you time in finding essential information. Expert contributors and editors provide scientific, up-to-date coverage of clinically useful topics, including broad, traditional, and controversial subjects. References indicate related material from earlier volumes of *Kirk's Current Veterinary Therapy*. NEW chapters cover the most important, emerging information on current diagnostic, treatment, and preventive challenges in today's veterinary practice. A new section on feline and canine nutrition covers important issues in nutritional health. 50 new chapter authors join hundreds of expert international contributors, all of whom are leading authorities in their fields. NEW! Availability as Pageburst ebook allows you digital access to this volume along with your library of other Elsevier references. Vet Confidential Elsevier Health Sciences The biography begins with Jim's birth and scrappy childhood in Chicago and takes the reader through his formal education to become a veterinarian at the Michigan State College and then earning a Master's in Public Health from Harvard. The reader is then taken through early work experiences, adventures in many countries engaging in and winning battles against deadly animal and human diseases, on through to his retirement from CDC in 1971 as the first U.S. Assistant Surgeon General for Veterinary Affairs. Family and personal experiences are weaved into the story to include real-life adventure, success, tragedy and humor. After leaving CDC, Dr. Steele began a prominent second career as a Professor of Environmental Health at the University of Texas, School of Public Health. There he compiled and edited the world's first comprehensive series of books

on diseases shared by animals and man, the CRC Handbook Series on Zoonoses. At the ripe young age of 96, he continues to lecture, consult, mentor, advise, write, and inspire. The story of Jim Steele's life is stirring to us all, in and outside the allied health professions. He is a true pioneer in the evolving philosophy of One Medicine, One Health, One World. He has been called by many of his colleagues, The Father of Veterinary Public Health.

Know the animals, respect the planet, love thy neighbor. Rowan Blogg is an Australian veterinarian of the highest distinction and I greatly admire his professionalism, which I observed for years at close range. In Any Kind of Danger he has extended his work into the environment and moral philosophy by tackling the complex issue of how we exploit animals. In the 19th Century William Wilberforce and other pioneers argued that our treatment of animals is a measure of our humanity. Peter Singer's Animal Liberation (1975) stimulated international interest in the subject. Dr Blogg's book should do the same. Rowan Blogg examines the role of wildlife on the planet, millions of years before our species became dominant, but how much habitat do we reserve for their natural life? How many species are under threat? The world's population will stabilise at about nine billion in 2050 – and this raises the fundamental issues of how much land, water and energy we will devote to raising animals for food. Is grazing an efficient or humane way of feeding our species? Industrial farming – out of sight and out of mind – involves inescapable cruelty. Chickens are raised on an A4 size of smaller 'scratching area', confined in multi-layered cages. Do animals have a right of access to sunlight and paddock for at least the great part of their lives? How does a cow giving birth cope with a crowded cattle truck? Do we turn our eyes away from the inevitable suffering involved in animal transport, especially life sheep exports? There are profound moral lessons to be learned from observing how we treat animals – and yet the issue will not be on the agenda for the next Federal or State elections. We are in Dr Blogg's debt for this thoughtful, passionate book. -Barry Jones, AO, FAA, FAHA. FTSE, FASSA Australian Minister for Science 1983-90

They Have Feelings Too is a memorable journey into the world of veterinary practice. As a young man fresh out of the United States Navy, Howard Hansen has a decision to make. What is he going to do with the rest of his life? Howard takes you through the hallowed university halls and into the Cal Davis's Veterinary stables to give you a glimpse of real life veterinary medicine. What happens when a staff of veterinary student are unknowingly exposed to rabies? Go into the surgery lab for large animals and follow the doctors as they prepare a highly strung black stallion for orthopedic surgery. Learn about the massive hydraulic operating tables and be in attendance as the chief surgeon operates on the stallion to stabilize a knee fracture. The new graduate with Doctor Of Veterinary Medicine behind his name chooses the specialty of small animal medicine. He finds employment as a staff veterinarian in a busy two man practice in Los Gatos, California. Hansen is exposed to office politics for the first time and encounters the diverse personalities of the boss's domineering wife and the tottering aged father who acts a primary assistant. Howard decides to broaden his experience and moves to a large eight man practice in San Francisco. Diverse personalities abound as do conflicts. Day to day animal maladies are seen and treated. The occasional pet with an odd or truly strange injury as the two headed kitten and the convulsing falcon makes their way through the clinic's front door. Mistakes are made by veterinarians, and sometimes with hilarious results. The final

episode of his career was his own one-man private practice. Howard moves his family to San Diego California where he purchases and successfully operates a veterinary hospital for 23 years. During his years of practice, Howard Hansen meets and introduces you to a wide spectrum of four legged, two legged and even a three legged amputee pets. He reminds us that not only the pets, but the owners too come in a
