The concise history of the Bugatti Type
57, 57S, 64 & 101. The magnificent Type
57 was the final flowering of the genius
of Ettore and Jean Bugatti, and the last

truly new model from Molsheim, France.
Packed with over 300 images - mostly
contemporary - this book is recognised
as THE standard reference on the 57 and
its close relatives.

Given the fact that there are perhaps
400 billion stars in our Galaxy alone, and
perhaps 400 billion galaxies in the
Universe, it stands to reason that

somewhere out there, in the 14-billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. The sheer enormity of the numbers almost demands that we accept the truth of this hypothesis. Why, then, have we encountered no evidence, no messages, no artifacts of these extraterrestrials? In this second, significantly revised and expanded edition of his widely popular book, Webb discusses in detail the (for now!) 75 most cogent and intriguing solutions to Fermi's famous paradox: If the numbers strongly point to the existence of extraterrestrial civilizations, why have we found no evidence of them? Reviews from the first edition: "Amidst the plethora of books that treat the possibility of extraterrestrial intelligence,

this one by Webb ... is outstanding. ... Each solution is presented in a very logical, interesting, thorough manner with accompanying explanations and notes that the intelligent layperson can understand. Webb digs into the issues ... by considering a very broad set of in-depth solutions that he addresses through an interesting and challenging mode of presentation that stretches the mind. ... An excellent book for anyone who has ever asked 'Are we alone?'" (W. E. Howard III, Choice, March, 2003) "Fifty ideas are presented ... that reveal a clearly reasoned examination of what is known as 'The Fermi Paradox'. ... For anyone who enjoys a good detective story, or using their thinking faculties and stretching the imagination to the limits ... 'Where is everybody' will be

enormously informative and entertaining. ... Read this book, and whatever your views are about life elsewhere in the Universe, your appreciation for how special life is here on Earth will be enhanced! A worthy addition to any personal library." (Philip Bridle, BBC Radio, March, 2003) Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester, Stephen Webb has worked in a variety of universities in the UK. He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as well as several popular science books. His interest in the Fermi paradox combines lifelong interests in

both science and science fiction.

Adolf Hitler understood the importance of sport, and exercised his malign and dangerous influence to try to co-opt it for the Nazi cause. He intended to own the Olympic movement, housing it

permanently in Berlin from 1940 in a stadium seating 450,000 people. His hijack of the 1936 Games remains one of sport's most controversial events, using it as he did to promote Aryan supremacy and showcase the Nazi state. Austria was forced to withdraw from the 1938 football World Cup just days before it started because the country no longer existed. The boxing matches between Joe Louis and Max Schmeling in 1936 and 1938 came to represent democracy versus fascism. German technology crushed all comers in Grand Prix racing, as well as the Isle of Man TT. A government ministry was even set up to use physical fitness to prepare the population for war. Hitler understood that sport has many uses: this is how he used it.

NARCO BREAKDOWN The drug syndicate running the heroin pipeline from the Golden Crescent of Afghanistan, Iran and Pakistan crosses a line when it begins hijacking the narco-traffic markets controlled by Asia's Triads. When the ensuing turf war claims lives on America's streets, Mack Bolan prepares to do battle—without official sanction. The Executioner is willing to do or die to prevent a bloodbath on U.S. soil. In a retaliatory strike, Bolan hits New York's Chinatown, where a scorched earth message ignites fear and uncertainty. Exactly as planned. Now all he has to do is follow the panicked trail to the big predators across the ocean in France and Hong Kong. As his relentless pursuit

puts a savage enemy on the defensive, the Executioner homes in for the kill. To cripple both factions, he must successfully play the rivals off each other. Victory means both cartels go down in flames.

In the 1950s and early 1960s, Modena was the center of Italy's sports car and Grand Prix universe. There, engineers and artisans crafted cars for Ferrari,

Maserati, OSCA, ATS, and others, every day bringing an unending parade of new surprises to the famous Modena Autodrome for resting. As a young man, Graham Gauld traveled to the northern Italian villa several times, striking up relationships with famous drivers, engineers, and designers who granted him and his camera unprecedented access to their facilities. The result is this remarkable history which documents the fall of Italian carmakers from Grand Prix eminence, and their subsequent rise to dominance in international GT racing. All of the photos are from Gauld's private collection and are seen together here for the first time. Populated with fantastic cars, motorsport luminaries, and the author's rarefied memories, this splendid photo history is sure to interest all fans

of vintage racing and classic Italian machinery.

Years I looked for a book that had pictures of all the great cars I admired from modern megacars to favorite old classic to rare one-of-a-kind show pieces. I found one book with maybe a third of my dream cars. With help of some friends I decided to create CARS THAT MATTER, a handy photographic guide with lots of descriptions and historical notes about the most interesting, rare, and fun cars produced over the last century. Every car collector and wannabe collector I knew found something they'd not heard of in this first edition but I kept adding cars. Finally at 333 pages of brilliant images I decided to share this with the car-loving

world. I hope you like it.

 Cost and Value Management in Projects

Project manager's guide to achieving cost efficiency and value optimization—thoroughly updated with new cases, examples, and problem sets
 The newly revised and updated Second Edition of Cost and Value Management in Projects provides project managers with a thorough understanding of the various dimensions of cost and value in projects, along with the factors that impact them and the managerial approaches for achieving cost efficiency and value optimization. Whereas most cost management books discuss the topic from a tactical perspective, such as through the use of simple budgeting or Earned Value Analysis, this Second Edition addresses cost from a strategic perspective, examining project management decision areas that have

the potential to enhance value and providing an integrated framework for managing cost. The Second Edition includes updates to key topic areas such as project benefits realization, updated end-of-chapter exercises such as discussion questions and problem sets, updated case studies, and new spreadsheet analytic techniques and examples. Written by two highly qualified authors with significant experience in the field, *Cost and Value Management in Projects* includes information on: Value management through value planning, engineering, and analysis from the perspective of projects, and best practices on how to avoid common pitfalls in managing cost and value Organization strategy and project selection, organization structure

and culture, project definition (and contracts), and estimating project times and cost Developing project plans and schedules, managing risk, scheduling resources and cost, reducing project duration, leadership, performance measurement, and project closure Attainment of value in complex environmental settings and benefits of effective project management *Cost and Value Management in Projects* is an essential resource on the subject for stakeholders at all corporate and government levels, including executives measuring performance, middle level corporate managers, project and team managers, engineers, project team members, and business consultants, along with students in related programs of study.

“A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic.” —Bethany McLean, New York Times Book Review
Faster, Higher, Farther chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous

reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install “defeat devices” in diesel vehicles that unlawfully lowered CO2 levels during emissions testing, and how the fraud was committed, covered up, and finally detected. Faster, Higher, Farther is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.
