General Anatomy and Physiology Biology 110 General Anatomy Physiology one functional unit of tissues. anatomy. study of the biological form of an organism. physiology. study of the biological functions an organism performs. 39 terms. Vocab.bio 110 physiology anatomy Flashcards and Study Sets | Quizlet Students in Biology 110 will learn the basic principles of human anatomy and

physiology. Course Competency (Performance Measure): Students will demonstrate knowledge by applying basic biological principles to understand the relationship between the structure and function of cells, tissues, and organs within organ systems and to describe the integration of organ systems in each of the following areas: BIO 110 - General Anatomy and Physiology BIO 110- I - General Anatomy and Physiology (online) Science Department Semester: Summer 2014 Catalog Course Description: This course is a general introduction to the anatomy and physiology of the human body. Emphasis is on the organ systems of the human and their interrelationships. Prerequisite(s): RDG 100 or ESL 100 Credit Hours: Lecture: 3.0 BIO 110- I General Anatomy and
