Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.

Leading sixteenth-century scholars such as Martin Luther and Desiderius Erasmus used print technology to engage in dialogue and debate with authoritative contemporary texts. By what Juan Luis Vives termed 'the unfolding of words,' these humanists gave old works new meanings in brief notes and extensive commentaries, full paraphrases, or translations. This critique challenged the

Middle Ages' deference to authors and authorship and resulted in some of the most original thought - and most violent controversy - of the Renaissance and Reformation. *The Unfolding of Words* brings together international scholarship to explore crucial changes in writers' interactions with religious and classical texts. This collection focuses particularly on commentaries by Erasmus, contextualizing his *Annotations and Paraphrases on the New Testament* against broader currents and works by such contemporaries as François Rabelais and Jodocus Badius. *The Unfolding of Words* tracks humanist explorations of the possibilities of the page that led to the modern dictionary, encyclopedia, and scholarly edition.

This is an ambitious and wide-ranging biography of Erasmus of Rotterdam, one of the most famous Renaissance humanists. In part a riveting narrative account of the philosopher's journeys from his monastery to service with a great Burgundian bishop, and from there to Paris, England the Low Countries and

Switzerland, this comprehensive and definitive biography also looks at the history of ideas in which Erasmus played a vital role. Covering the formative years of Erasmus the humanist, this new study makes full analyses of all his early writings, including his Letters, his contributions to Renaissance dialogue and essay, and particularly his Adagia, the colloquies, and the Praise of Folly. After years of intensive research, and in an area which is essentially multidisciplinary, Professor Schoeck brings together serious historical, literary, theological and philosophical study in a unique way.

Inspired by Virgil's *Georgics*, this study conceptualizes Renaissance poetry as a domestic labor. When is literary production more menial than inspired, more like housework than heroics of the mind? In this revisionist study, Katie Kadue shows that some of the authors we credit with groundbreaking literary feats—including Michel de Montaigne and John Milton—conceived of their writing in surprisingly modest and domestic terms. In contrast to the monumental ambitions associated with the literature of the age, and picking up an undercurrent of Virgil's *Georgics*, poetic labor of the Renaissance emerges here as often aligned with so-called

women's work. Kadue reveals how male authors' engagements with a feminized georgic mode became central to their conceptions of what literature is and could be. This other georgic strain in literature shared the same primary concern as housekeeping: the necessity of constant, almost invisible labor to keep the things of the world intact. Domestic Georgic brings into focus a conception of literary—as well as scholarly and critical—labor not as a striving for originality and fame but as a form of maintenance work that aims at preserving individual and collective life.

to support decision-making. Combining a solid exposition of econometric methods with an application-oriented approach, this rigorous textbook provides students with a working understanding and hands-on experience of current econometrics. Taking a 'learning by doing' approach, it covers basic econometric methods (statistics, simple and multiple regression, nonlinear regression, maximum likelihood, and generalized method of moments), and addresses the creative process of model building with due attention to diagnostic testing and model improvement. Its last part is devoted to two major application areas: the econometrics of choice data (logit and probit, multinomial and ordered choice, truncated and censored data, and duration data) and the

econometrics of time series data (univariate time series, trends, volatility, vector autoregressions, and a brief discussion of SUR models, panel data, and simultaneous equations). · Real-world text examples and practical exercise questions stimulate active learning and show how econometrics can solve practical questions in modern business and economic management. · Focuses on the core of econometrics, regression, and covers two major advanced topics, choice data with applications in marketing and micro-economics, and time series data with applications in finance and macro-economics. · Learning-support features include concise, manageable sections of text, frequent cross-references to related and background material, summaries,

computational schemes, keyword lists, suggested further reading, exercise sets, and online data sets and solutions. · Derivations and theory exercises are clearly marked for students in advanced courses. This textbook is perfect for advanced undergraduate students, new graduate students, and applied researchers in econometrics, business, and economics, and for researchers in other fields that draw on modern applied econometrics.

How Chinese characters triumphed over the QWERTY keyboard and laid the foundation for China's information technology successes today. Chinese

writing is character based, the one major world script that is neither alphabetic nor syllabic. Through the years, the Chinese written language encountered presumed alphabetic universalism in the form of Morse Code, Braille, stenography, Linotype, punch cards, word processing, and other systems developed with the Latin alphabet in mind. This book is about those encounters—in particular thousands of Chinese characters versus the typewriter and its QWERTY keyboard. Thomas Mullaney describes a fascinating series of experiments, prototypes, failures, and successes in the century-long quest for a workable Chinese typewriter. The earliest Chinese typewriters, Mullaney tells us, were figments of popular imagination, sensational accounts of twelve-foot

keyboards with 5,000 keys. One of the first Chinese typewriters actually constructed was invented by a Christian missionary, who organized characters by common usage (but promoted the less-common characters for “Jesus” to the common usage level). Later came typewriters manufactured for use in Chinese offices, and typewriting schools that turned out trained “typewriter girls” and “typewriter boys.” Still later was the “Double Pigeon” typewriter produced by the Shanghai Calculator and Typewriter Factory, the typewriter of choice under Mao. Clerks and secretaries in this era experimented with alternative ways of organizing characters on their tray beds, inventing an input method that was the first instance of “predictive text.” Today, after more than a century of resistance

against the alphabetic, not only have Chinese characters prevailed, they form the linguistic substrate of the vibrant world of Chinese information technology. The Chinese Typewriter, not just an “object history” but grappling with broad questions of technological change and global communication, shows how this happened. A Study of the Weatherhead East Asian Institute Columbia University Fatal Discord Study in Europe English for Animal Husbandry is written to fulfill students' needs to learn Foreign Language for Specific Purposes. This book is designed to provide an opportunity for the students to develop their English skills more communicatively and meaningfully. It consists of twenty eight units. Each unit presents reading, writing, and speaking

section. Reading section consists of pre-reading, reading comprehension, and vocabulary exercises related to the topic of the text. In writing section, some structure and sentence patterns are completed with guided writing exercises. Meanwhile, in speaking section students are provided with models and examples followed by practical activities which are presented in various ways. The materials have been arranged and graded in accordance with their language levels. Above all, to improve the quality of this textbook, criticisms and suggestions for better editions are highly appreciated.

In this revelatory memoir, the former CEO of Sonic challenges established

thinking, offering counterintuitive career advice essential for every professional at all levels, whether you're just starting out or in the middle of your career. In his bestselling *Outliers*, Malcolm Gladwell introduced readers to the 10,000-hour rule—the foundation of success in any endeavor. But as Clifford Hudson reveals, there are serious pitfalls to this rule. What happens to those who spend years trying to achieve something that doesn't quite pan out? Do you really have to grind down the same path for many years, sacrificing priorities to become successful? In *Master of None*, Hudson turns expertise on its head and shows that by embracing variety and becoming more versatile, anyone can succeed and become more open to different opportunities in life. To do so,

he provides three basic rules that will see any professional through: Don't plan, explore Don't specialize, generalize Don't keep your head down, turn it up toward opportunity In this thought-provoking memoir, Hudson asks whether or not mastery is even necessary to succeed. Most people don't need to be experts in their field. Yes, the successful know more than the average person about a particular topic, and they often possess a better-than-average ability with a particular skillset; but not everyone who is successful is an expert, he makes clear. More importantly, in today's technology-driven environment, change is the only constant, including the nature of work and the skills required to do it. Over-investing in expertise is often riskier than learning to be adaptive

and open to new knowledge, ideas, and skills. Experience can also lead to overconfidence. And yet we continue to deeply value the expertise ideal. Groundbreaking and thought provoking, *Master of None* is a new way forward to help businesses and professionals at all levels thrive.

Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and

required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that

Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A

brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one.” –Jonathan Yardley, The Washington Post Book World

THE PSYCHOLOGY OF GLOBAL MOBILITY

JAPHETH KOGEI

Conflicting claims to authority in relation to the translation and interpretation of the Bible have been a recurrent source of tension within the Christian church, and were a key issue in the Reformation debate. This book traces how the authority of the Septuagint and later that of the Vulgate was called into question by the return to the original languages of scripture, and how linguistic scholarship was seen to pose a challenge to the

authority of the teaching and tradition of the church. It shows how issues that remained unresolved in the early church re-emerged in first half of the sixteenth century with the publication of Erasmus' Greek-Latin New Testament of 1516. After examining the differences between Erasmus and his critics, the authors contrast the situation in England, where Reformation issues were dominant, and Italy, where the authority of Rome was never in question. Focusing particularly on the dispute between Thomas More and William Tyndale in England, and between Ambrosius Catharinus and Cardinal Cajetan in Italy, this book brings together perspectives from biblical studies and church history and provides access to texts not previously translated into English.

Brian Cummings examines the place of literature in the Reformation, considering how arguments about biblical meaning and literary interpretation influenced the new theology, and how developments in theology in turn influenced literary practices. Bringing together genres and styles of writing which are normally kept apart (poems, sermons, treatises, commentaries), he offers a major re-evaluation of the literary production of this intensely verbal and controversial period. - ; Brian Cummings examines the place of literature in the Reformation, considering both how arguments about

Nonstop Love Live Give to Achi Europe - Space for Transcultural Existence? is the first volume of the new series, Studies in Euroculture, published by Göttingen University Press. The series derives its name from the Erasmus Mundus Master of Excellence Euroculture: Europe in the Wider World, a two year programme offered by a consortium of eight European universities in collaboration with four partner universities outside Europe. This master highlights regional, national and supranational dimensions of the European democratic development; mobility, migration and inter-, multi- and transculturality. The impact of culture is

understood as an element of political and social development within Europe. The articles published here explore the field of Euroculture in its different elements: it includes topics such as cosmopolitanism, cultural memory and traumatic past(s), colonial heritage, democratization and Europeanization as well as the concept of (European) identity in various disciplinary contexts such as law and the social sciences. In which way have Europeanization and Globalization influenced life in Europe more specifically? To what extent have people in Europe turned 'transcultural'? The 'trans' is understood as indicator of an overlapping mix of cultures that does not allow for the construction of sharp

differentiations. It is explored in topics such as (im)migration and integration, as well as cultural products and lifestyle. The present economic crisis and debt crisis have led, as side-result, to a public attack on the open, cosmopolitan outlook of Europe. The values of the multicultural and civil society and the idea of a people's Europe have become debatable. This volume offers food for thought and critical reflection.
