RODGERS WENDY

Small Business Sourcebook Jones &
Bartlett Publishers

The prior three editions of this book were
extremely well received for use in
undergraduate and graduate courses in
long-term care administration, and they

were also popular as fundamental
resources with practitioners as well as
for an array of other long-term care
practitioners and professions, including
housing managers, board members,
teachers, students, administrators,
owners, and health care professionals
who are seeking new directions in the
field. This, the fourth edition, has been
extensively revised. There is, for

example, the fundamental updating throughout to reflect structural and regulatory changes that have been occurring in the field as well as the introduction of recent research findings, evolving ideas, and new practices. In addition, there are new perspectives introduced by nine new chapter authors plus three entirely new chapters: monitoring clinical outcomes, spiritual care, and using information technology. The book is divided into six sections: The Evolution of Long-Term Care; Developing the Organization; Human Resource Management; Optimizing Health Care Outcomes; Creating a Supportive Living Environment; and Creating a Better Future. This new edition also has an additional author, Dr. Leslie Grant, whose seasoned scholarship and

visionary leadership will provide important, additional insight for the reader. The ideas presented are intended to provide a better understanding of the long-term care environment and to suggest ways of applying interdisciplinary knowledge for the administrator in this setting.

A Managerial Perspective Springer Publishing Company

The number of elderly and disabled adults who require assistance with day-to-day activities is expected to double over the next twenty-five years. As a result, direct care workers such as home care aides and certified nursing assistants (CNAs) will become essential to many more families. Yet these workers tend to be low-paid, poorly trained, and receive little respect. Is

such a workforce capable of addressing the needs of our aging population? In *Who Will Care for Us?* economist Paul Osterman assesses the challenges facing the long-term care industry. He presents an innovative policy agenda that reconceives direct care workers' work roles and would improve both the quality of their jobs and the quality of elder care. Using national surveys, administrative data, and nearly 120 original interviews with workers, employers, advocates, and policymakers, Osterman finds that direct care workers are marginalized and often invisible in the health care system. While doctors and families alike agree that good home care aides and CNAs are crucial to the well-being of their patients, the workers report poverty-level wages,

erratic schedules, exclusion from care teams, and frequent incidences of physical injury on the job. Direct care workers are also highly constrained by policies that specify what they are allowed to do on the job, and in some states are even prevented from simple tasks such as administering eye drops. Osterman concludes that broadening the scope of care workers' duties will simultaneously boost the quality of care for patients and lead to better jobs and higher wages. He proposes integrating home care aides and CNAs into larger medical teams and training them as "health coaches" who educate patients on concerns such as managing chronic conditions and transitioning out of hospitals. Osterman shows that restructuring direct care workers' jobs,

and providing the appropriate training, could lower health spending in the long term by reducing unnecessary emergency room and hospital visits, limiting the use of nursing homes, and lowering the rate of turnover among care workers. As the Baby Boom generation ages, *Who Will Care for Us?* demonstrates the importance of restructuring the long-term care industry and establishing a new relationship between direct care workers, patients, and the medical system.

Assisted Living Administration Jones & Bartlett Learning

Contains the knowledge essential to prepare for licensure and employment as a nursing home administrator. Using as its basis the guidelines of the National Association of Boards of Examiners of

Nursing Home Administrators, this work includes sections on: Distinguishing delirium from dementia; Psychosis from agitation; GERD; and Glycemic control.

AGING ARTFULLY

Jones & Bartlett Learning

A two-volume annotated guide to 26,670 listings of live and print sources of information designed to facilitate the start-up, development, and growth of specific small businesses, as well as 26,158 similar listings for general small business topics. An additional 11,167 entries are provided on a state-by-state basis; also included are 965 relevant U.S. federal government agencies and branch offices.

A Practical Guide to Long Term Care and Health Services Administration CRC

Press

Attitudes toward long-term care contain a strong residue of negativity in today's society and current problems with the system augment such perceptions.

Unless dealt with now, this will only get worse, as the 85-and-older crowd is the fastest growing part of the population, and the first wave of Baby Boomers is approaching 60. Exploring and delineate

The Nation's Long-term Health Care Crisis National Academies Press

The study of "the end of life" has become a major focus on medicine, the social sciences, ethics, and religion. This volume brings together the latest research on issues around death and dying, life's attributes as it nears death, planning and preparation for death, and care and intervention-related issues. This

evidence-based finding of this volume will help shape how we approach the topic for years to come.

Nursing Home Management Charles C Thomas Publisher

An introduction to the practice of nursing home administration, organized into five parts: management, personnel, finance, the industry's environment, and resident/patient care. Each section provides a working vocabulary and detailed description of activities associated with it. Intended to provide the essential information needed for those seeking licensure or employment as a nursing home administrator, the volume presents new information on the use of computer networks and client-server architecture in the nursing facility, updated information on the

theories of aging, and extensive new resources and regulatory material. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com).

More than a Link Springer Publishing Company

A comprehensive curriculum of practical methods for long-term care administration. Includes essential forecasting tools compiled and developed by more than 40 leaders in long-term care. Each chapter is followed by case studies, questions, and exercises. Instructor's manual available upon request.

Medical and Health Care Books and Serials in Print Springer Publishing Company

A guide to the information services and sources provided to 100 types of small

business by associations, consultants, educational programs, franchisers, government agencies, reference works, statisticians, suppliers, trade shows, and venture capital firms.

Focus on the End of Life: Scientific and Social Issues Oxford University Press, USA

This valuable book that will increase knowledge & comprehension about: The expanding role of the nursing home in the health care system & the intergration of the role into the continuum of care. The need for the nursing home to relate effectively to all its constituencies-residents, family members, medical professionals, community leaders. The value of a physician-a medical director-who identifies with the nursing home

organization & who provides a physician's input into the nursing home's decision process. The value of the medical director to the nursing home administration & the ways his or her services can be used fully in developing the nursing home's capabilities. The value of a medical director who assumes a leadership role among nursing home staff members & caregivers. The value of the medical director to the administration in analyzing & communicating the medical implications of the changing long-term care environment.

Improving the Quality of Long-Term Care
Springer Publishing Company

A refreshing new text that gives students a solid grounding in the principles, practices, and skills essential

to successful public health administration. With this text you get full coverage of traditional public health responsibilities -- assessing the burden of disease, preventing and controlling health threats, and developing policies and constituencies to improve health -- in a contemporary framework that fully reflects the ongoing transition from a public to a population health perspective. Each chapter ends with chapter reviews to reinforce major points; examples throughout the text demonstrate important major concepts; a real-life case study illustrates the application of leadership in public health.

Hearing Before the Subcommittee on Health and Long-Term Care of the Select Committee on Aging, House of

Representatives, One Hundred Second Congress, Second Session, April 24, 1992, Cleveland, OH. Russell Sage Foundation

Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the

characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care. *A People-oriented Perspective* Springer Publishing Company

This handbook is the definitive, comprehensive reference for long-term care administration. It provides new ideas, proven approaches, & practical suggestions for every aspect of long-term care facility management. Each chapter contains a collection of specialized, advanced expertise presented by long-term care administrators, consultants, academics, planners, attorneys, architects, & nurses.

Demonstrating that animal cruelty behaviours are another form of antisocial behaviour, alongside human aggression and violence, and almost without exception are carried out by the same individuals this book offers clear recommendations for future research on animal cruelty and future action aimed

at prevention.

The Entrepreneur's Resource Creative Long-term Care Administration

Create programs that make good use of the leisure time of the elderly, and of those who care for them! Caregiving is a vital issue in today's rapidly aging society. Each year, a greater number of elderly people find themselves in need of care, and at the same time, more elderly adults than ever are finding themselves in the caregiving role. Caregiving--Leisure and Aging blends the work of six experts in the field, exploring implications for future practice and research, examining caregivers and care receivers and their need for appropriate leisure and recreation activities, and sharing innovative recreation programs to help caregivers and those in their care

enrich the quality of their lives. Here you'll find: a review of literature which examines caregivers' health behaviors and discusses sleep improvement, home-based exercise, and several interventions the common factors found in successful leisure and activities programs for older adults and those who care for them in-depth case studies of three women who cared for their older husbands with dementia and the rationale behind their sacrifice of personal leisure time to provide this care a survey of rural and urban caregivers to individuals with Alzheimer's disease specific leisure education strategies that have been used successfully in caregiver support groups an examination of the innovative Family-based Structural Multisystem In-home Interventions

(FSMII) with a Computer Telephone Integration System (CTIS) project Caregiving--Leisure and Aging provides information and ideas regarding the importance of leisure both to those elderly people receiving care and also to the aging adults who selflessly deliver that care.

The Issues and Challenges for Long-term Care Jones & Bartlett Learning Long-term care in the United States has taken the nursing home as its benchmark, but the monetary, social, and psychological costs of nursing home care are all too high. This book challenges the current dominance of nursing homes as the principal institution of long-term care. It offers a series of alternative models where both services and housing can be provided in

a way that allows long-term consumers to enjoy dignified, "normal" lifestyles. It addresses the political and economic consequences of making this decision. The authors start with the premise that long-term care is designed to assist people who lack the capacity to function fully independently. They argue that no disabled person of any age should be required to forsake his/her humanity in exchange for care. The book rejects the artificial dichotomy between social and medical care, asserting that both play important roles in psychological and physical well-being of long-term care patients. The authors consider the need for competent and compassionate medicine and discuss the methods for improving both its coordination of care and its effectiveness. The book redefines

the meaning of safety and protection in long-term care, and how this goal can be accomplished without sacrificing quality of living. As the new millennium and the aging of baby boomers approaches, more creative approaches to providing better long-term care are required. This volume outlines a useful framework for the provision of effective and humane community-based programs that are both feasible and affordable. It will be an invaluable guide for geriatricians, public health professionals, family physicians, nurses and others who care for elderly patients.

Caregiving-Leisure and Aging

Springer

As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care

workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal

education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.
