"Responding to the linguistic and cultural diversity of the U.S. K-12 student population and an increasing emphasis on STEM, this book offers a model for professional development that engages teachers in transformative action research projects and explicitly links literacy to mathematics and science curriculum through sociocultural principles. Providing detailed and meaningful demonstrations of participatory action research in the classroom, Razfar and Troiano present an effective, systemic approach that helps preservice teachers support students' funds of knowledge. By featuring teacher and researcher narratives, this book centers teacher expertise and offers a

more holistic and humanistic understanding of authentic and empathetic teaching. Focusing on integrating instructional knowledge from ESL, bilingual, and STEM education, the range of cases and examples will allow readers to implement action research projects in their own classrooms. Chapters include discussion questions and additional resources for students, researchers, and educators"--

Learn the intricacies of managing Azure

AD and Azure AD Connect, as well as Active Directory for administration on cloud and Windows Server 2019 Key Features Expert solutions for the federation, certificates, security, and monitoring with Active Directory Explore Azure AD and AD Connect for effective administration on cloud Automate security tasks using Active Directory and PowerShell Book Description Active Directory is an administration system for Windows administrators to automate network, security and access management tasks in the Windows infrastructure. This book starts off with a detailed focus on forests, domains, trusts, schemas and partitions. Next, you'll learn how to manage domain controllers, organizational units and the default containers. Going forward, you'll explore managing Active Directory sites as well as identifying and solving replication problems. The next set of chapters covers the different components of Active Directory and discusses the management of users, groups and computers. You'll also work through recipes that help you manage your Active Directory domains, manage user and group objects and computer

accounts, expiring group memberships and group Managed Service Accounts (gMSAs) with PowerShell. You'll understand how to work with Group Policy and how to get the most out of it. The last set of chapters covers federation, security and monitoring. You will also learn about Azure Active Directory and how to integrate on-premises Active Directory with Azure AD. You'll discover how Azure AD Connect synchronization works, which will help you manage Azure AD. By the end of the book, you have learned about Active Directory and Azure AD in detail. What you will learn Manage new Active Directory features, such as the Recycle Bin, group Managed Service Accounts, and fine-grained password policies Work with Active Directory from the command line and use Windows PowerShell to automate tasks Create and remove forests, domains, and trusts Create groups, modify group scope and type, and manage memberships Delegate control, view and modify permissions Optimize Active Directory and Azure AD in terms of security Who this book is for This book will cater to administrators of existing Active Directory Domain Services environments

and/or Azure AD tenants, looking for guidance to optimize their day-to-day effectiveness. Basic networking and Windows Server Operating System knowledge would come in handy. [2020 Weekly Planner](#) Many artists and scientists – including Buffon, Goethe, and Philipp Otto Runge – who observed the vividly coloured shadows that appear outdoors around dawn and dusk, or indoors when a candle burns under waning daylight, chose to describe their colours as ‘beautiful’. Paul Smith explains what makes these ephemeral effects worthy of such appreciation – or how depictions of coloured shadows have genuine aesthetic and epistemological significance. This multidisciplinary book synthesises methodologies drawn from art history (close pictorial analysis), psychology and neuroscience (theories of colour constancy), history of science (the changing paradigms used to explain coloured shadows), and philosophy (theories of perception and aesthetic value drawn from Wittgenstein and Merleau-Ponty). This title will be of interest to scholars in art history, art theory, and the

history of science and technology.
