Some 28 million people in America and 350 million people

worldwide live with hearing loss. How do these people and their families cope? What are their experiences of pain, humor, and hope? What support do medicine and technology now offer them, and what is on the horizon? In this engaging and practical book, David Myers, who has himself suffered gradual hearing loss, explores the problems faced by the hard of hearing at home and at work and provides information on the new technology and groundbreaking surgical procedures that are available. Drawing on both his own experiences and his expertise as a social psychologist, Myers recounts how he has coped with hearing loss and how he has incorporated technological aids into his life. The

family and friends of the hard of hearing also face adjustments. Myers addresses their situation and provides advice for them on how best to alert loved ones to a hearing problem, persuade them to seek assistance, and encourage them to adjust to and use hearing aids.

ABC-CLIO

Generally regarded as the most important of the Civil War campaigns conducted in the Shenandoah Valley of Virginia, that of 1864 lasted more than four months and claimed more than 25,000 casualties. The armies of Philip H. Sheridan and Jubal A. Early contended for immense stakes. Beyond the agricultural bounty and the boost in morale a victory would bring, events in the Valley also would affect Abraham Lincoln's chances for reelection in the November 1864 presidential canvass. The eleven original essays in this volume reexamine common assumptions about the campaign, its major figures, and its significance. Taking advantage of the most recent scholarship and a wide range of primary sources, contributors examine strategy and tactics, the performances of key commanders on each side, the campaign's political repercussions, and the experiences of civilians caught in the path of the armies. The authors do not always agree with one another, yet, taken together, their essays highlight important connections between the home front and the battlefield, as well as ways in which military affairs, civilian experiences, and politics played off one another during the campaign.
