While working to protect a movie star's daughter turned prosecutor, victimized by a stalker who may be a member of the local police department, Special Agent Antonio Burns finds himself in trouble with the local law and embroiled in the complicated dealings of both his girlfriend and his fugitive brother Roberto, in the sequel to *The Edge of Justice*. Reprint.

After Hours Routledge

This essential text explores the concept of "Me-Marriage"—a marital relationship that blends individualized life goals and interests—and draws from research on the current benefits and costs of marriage to consider how to achieve success, both individually and relationally. Chapters explore the larger patterns at play and identify the trends about what a modern "healthy marriage" looks like for this new generation. Brian J. Willoughby combines a review of the latest social science research on the benefits and costs of marriage with new quantitative and qualitative data from married and single adults. The book explores how marriage has fundamentally shifted in the Western world due to the changing values and approaches to relationships by the Millennial generation that is now largely transitioning to marriage. This book is an ideal text for clinicians and practitioners (particularly those working with young married populations) looking for guidance on how to understand the increasingly complex ways that adults are navigating their relationship landscape, as well as students and scholars in the fields of psychology, family studies, and sociology and those interested in individual development, relational development, and demographic trends on the family.

No other generation in history has received as much coverage as the Millennial generation. Books, Google searches, blogs, and news articles are everywhere about them. Yet, Generation Z is comprised of our youth and young adults today and has received very little attention comparatively. Those in Generation Z are among our youngest consumers, students, colleagues, constituents, voters, and neighbors. Being able to better understand who they are and how they see the world can be helpful in effectively working with, teaching, supervising, and leading them. *Generation Z: A Century in the Making* offers insight into nearly every aspect of the lives of those in Generation Z, including a focus on their career aspirations, religious beliefs and practices, entertainment and hobbies, social concerns, relationships with friends and family, health and wellness, money management, civic engagement, communication styles, political ideologies, technology use, and educational preferences. Drawing from an unprecedented number of studies with higher education research institutions, market research firms such as Pew and Census, other generational researchers and industry

leaders, this is the authoritative defining work on Generation Z that market researchers, consumer behaviour specialists, and employers sorely need – and it is a fascinating read for anyone interested in the sociology of generations.

There is another race of people inhabiting our world. They are not identical to us - although we are closely enough related to interbreed. They go largely unseen and unknown - although occasionally there are reports from a select few eyewitnesses of encounters with them; or observations of their advanced craft and technologies; or half-remembered interactions at night in homes across the world by the general public, that are usually scrambled or unclear in the mind's eye. They have been here co-existing with us for millennia; influencing our spirituality, folklore and religious, philosophical and even political systems. They wield a sophisticated set of technological 'toys' that bedazzle and mesmerize us, confuse our senses and our recollective powers, allow them to walk through walls, become invisible at will and float soundlessly through the air.This book is an investigation into the long-term presence of a race of humanoid beings - different and yet disturbingly similar to us; that walk unchecked through our houses and gardens at night, lurk in our woodlandsand remote places... andwho move beneath our oceans and govern our dreams.We move though historical accounts of non-humanoid beings - from the Fairy Faith of Celtic lands, to the earliest accounts of 'aliens' and 'ETs' in the modern era, all the way to the contemporary casesof Charles Hall's Millennial Hospitality and Christopher Bledsoe's Fayetteville Incident- meditating on the similarities and apparent identical natures of these non-human entities throughout history and time.The Children of Orion are here... and with them come the answers to our past, to our present and to our future selves.

This volume explores the twenty-first century classroom as a uniquely intergenerational space of religious disaffiliation, and questions about how our work in the classroom can be, and is being, re-imagined for the new generation. The culturally hybrid identity of Millennials shapes their engagement with religious "others" on campus and in the classroom, pushing educators of comparative theology to develop new pedagogical strategies that leverage ways of seeing and interacting with their teachers and classmates. Reflecting on religious traditions such as Islam, Judaism, African Traditional Religions, Hinduism, Christianity, and agnosticism/atheism, this volume theorizes the theological outcomes of current pedagogies and the shifting contours of comparative theological discourse.

THE GREYS

Routledge

Combining high-altitude climbing action with sizzling courtroom drama and raw tension, *The Edge of Justice* is a thriller like no other. Set amid the towering beauty of Wyoming's mountains and the gritty underbelly of crime, here is a gut-wrenching debut novel that features one of recent fiction's most original and complex heroes: Special Agent Antonio Burns--climber, cop, brother, son, risk-taker. A climber by nature, a cop by trade, Antonio

has come to Laramie to investigate a young woman's deadly plunge. But as he digs deeper into the case, Antonio is certain he has found a murder...and a stunning connection to the trial of two men about to be executed for a crime they did not commit. With a beautiful reporter sharing his investigation, he must make a harrowing ascent: up a forbidding mountainside--to bring a killer down from the deadliest kind of high.

In the first three volumes of his memoirs concerning experiences while serving at Nellis Air Force Base, Charles Hall gave astonishing testimony of having met with 'Tall White' extraterrestrials located at a secret underground facility at Nellis. Three independent witnesses have come forward to confirm important parts of Hall's testimony. Hall is a credible witness of extraterrestrials having reached agreements with U.S. military officials. This fourth volume offers more startling details that help confirm his experiences and help usher in new era of official disclosure of extraterrestrial life. Micheal E. Salla, Ph.D. President and Founder, The Exopolitics Institute Charles Hall's report (Millennial Hospitality I-III) of his encounters and deep interactions with tall humanoid beings living on the USAF Nellis Range remains without serious challenge to this day. And this is remarkable, as its implications are so radical; they reveal an entrenched presence in the American Southwest that predates the arrival of Euro-Americans in the area, and that continues with covert protection and support from the U.S. government while maintaining communications with a distant home location. Hall's powerful and entirely self-consistent narrative, filled with surprising and revealing detail, is so impressive that I have chosen it as the only example of modern human-ET contact to receive major coverage in my web pages. Gerry Zeitlin, "Open Seti Initiative" www.openseti.org It is possible that eventually the story Charles Hall tells will be seen as a pivotal moment in UFOlogy. His story has become the key to linking a disparate series of reports, encounters and claims that have circulated in UFO circles without a home for many years. This fourth and final account gives us the most detailed look ever into one aspect of a covert military-alien liaison that has been underway for decades. Essential reading! Warren P. Almudena Grandes is one of Spain's foremost women's writers, having sold over 1.1 million copies of her episodios de una guerra interminable, her six-volume series that ranges from the Spanish Civil War to the democratic period; the myriad prizes awarded to her, 18 in total, confirm her pre-eminence. This book situates Grandes's novels within gendered, philosophical, and mnemonic theoretical concepts that illuminate hidden dimensions of her much-studied work. Lorraine Ryan considers and expands on existing critical work on Grandes's oeuvre, proposing new avenues of interpretation and understanding. She seeks to debunk the arguments of those who portray Grandes as the proponent of a sectarian, eminently biased Republican memory by analysing the wide variety of gender and perpetrator memories that proliferate in her work. The intersection of perpetrator memory with masculinity, ecocriticism, medical ethics and the child's perspectives confirms Grandes' nuanced engagement with Spanish memory culture. Departing from a philosophical basis, Ryan reconfigures the Republican victim in the novels as a vulnerable subject who attempts to flourish, thus refuting the current critical opinion of the victim as overly-empowered. The new perspectives produced in this monograph do not aim to suggest that Grandes is an advocate of perpetrator memory; rather, it suggests that Grandes is committed to a more pluralistic idea of memory culture, whereby her novels generate understanding of multiple victim, perpetrator and gender memories, an analysis that produces new and meaningful engagements with these novels. Thus, Ryan contends that Grandes's historical novels are infinitely more complex and nuanced than heretofore conceived.

Gen Z is a vital, thought-provoking portrait of an astonishing generation. Drawing on first-hand interviews and empirical evidence, it offers insight into the boom in political activism amongst those born post-2000, exploring its roots and wide implications for the future of our society. As environmental disaster threatens the fundamental existence and livelihoods of Generation Z, this book considers how the fact that they have taken up the fight is likely to be one of the best things that could have happened to them. Focusing on the school climate change strikes and Greta Thunberg as initiator and icon of the Fridays for Future movement, it reveals the evolving world of Gen Z at school, at work, at home and online. It documents the development of their politicisation, the challenges they and their activism face in light of the global pandemic and considers how the experience of those on the margins can differ from their peers. Gen Z is a compelling study of how fighting the climate crisis is only the beginning for these young people. It offers insight for all those interested in the study of adolescence and emerging adulthood, as well as teachers, youth workers, civil society activists, policymakers, politicians and parents who want to understand young people's aspirations for the future.

One of the most profound changes in business and society is the emergence of the post-Millennial generation, Gen Z. While every new generation has faced its share of disruption in technology, economics, politics and society, no other generation in the history of mankind has had the ability to connect every human being on the planet to each other and in the process to provide the opportunity for each person to be fully educated, socially and economically engaged. What might this mean for business, markets, and educational institutions in the future? In this revolutionary new book, *The Gen Z Effect: The Six Forces Shaping the Future of Business*, authors Tom Koulopoulos and Dan Keldsen delve into a vision of the future where disruptive invention and reinvention is the acknowledged norm, touching almost every aspect of how we work, live and play. From radical new approaches to marketing and manufacturing to the potential obliteration of intellectual property and the shift to mass innovation, to the decimation of our oldest learning institutions through open source and adaptive learning, *The Gen Z Effect* provides a mind-bending view of why we will need to embrace Gen Z as the last, best hope for taking on the world's biggest challenges and opportunities, and how you can prepare yourself and your business for the greatest era of disruption, prosperity, and progress the world has ever experienced.

Heralded as a success that mobilized support for development, the Millennium Development Goals (MDGs) ushered in an era of setting development agendas by setting global goals. This book critically evaluates the MDG experience from the capabilities and human rights perspectives, and questions the use of quantitative targets as an instrument of global governance. It provides an account of their origins, trajectory and influence in shaping the policy agenda, and ideas about international development during the first 15 years of the 21st century. The chapters explore: • whether the goals are adequate as benchmarks for the transformative vision of the Millennium Declaration; • how the goals came to be formulated the way they were, drawing on interviews with key actors who were involved in the process; • how the goals exercised influence through framing to shape policy agendas on the part of both developing countries and the international community; • the political economy that drove the formulation of the goals and their consequences on the agendas of the South and the North; • the effects of quantification and indicators on ideas and action; and • the lessons to be drawn for using numeric goals to promote global priorities. Representing a significant body of work on the MDGs in its multiple dimensions, compiled here for the first time as a single collection that tells the whole definitive story, this book provides a comprehensive resource. It will be of great interest to students, researchers and policymakers in the fields of development, human rights, international political economy, and governance by numeric indicators.
