VALERIE ABBIGAIL

Hearing Before the Subcommittee on Energy and Environment of the Committee on Science, House of Representatives, One Hundred Sixth Congress, First Session, March 3 and March 10, 1999 National Academies Press

This proceedings volume provides a multifaceted perspective on current challenges and opportunities that organizations face in their efforts to develop and grow in an ever more complex environment. Featuring selected contributions from the 2019 Griffiths School of Management Annual Conference (GSMAC) on Business, Entrepreneurship and Ethics, this book focuses on the role of creativity, technology and ethics in facilitating the transformation organizations need in order to be ready for the future and succeed. Growth and development have always been imperative for people, organizations, and societies and a relevant topic in the management sciences. Globalization, along with dramatic changes in social, cultural, and technological progress, are the main factors that determine the current conditions for development, putting forth a new set of challenges and opportunities that are putting pressure on organisations to adapt. Although technology and creativity seem to be the mantra for success in this new context, issues around the ethics of these two factors also seem to be crucial to the sustainability of growth in organizations. Featuring contributions on topics such as academic marketing, technology in healthcare organizations, ethical issues in hospitality, artificial intelligence and data mining, this book provides research and tools for students, professors, practitioners and policy makers in the fields of business, management, public administration and sociology.

U.S. Geological Survey Professional Paper MIT Press

Cambridge English Readers is an exciting new series of original fiction, specially written for learners of English. Graded into six levels from elementary to advanced the stories in this series provide easy and enjoyable reading on a wide range of contemporary topics and themes. Grand Central Station, New York in mid-July. It's early morning, but everyone is suffering in the heat. Private investigator Nathan Marley is on his way to another wasted day at the office. But a chance meeting with a homeless woman, and a surprise telephone call, change all that and Marley begins a journey through parts of the burning summer city that he's never visited before.

The Church Missionary Review Allied Publishers

This book addresses the global need for more comparative studies on health policy and health care systems, given the rise in recent decades of

societal aging, modern mass diseases, economic globalization, and resulting permanent fiscal austerity of governments which have fundamentally altered the status quo of health care systems. The book examines the healthcare experiences of the most developed countries in Asia (Japan, South Korea, Taiwan and Singapore) and compares these with four of the most important health care systems in Europe (UK, France, Germany and Italy). Focusing on the public health care systems the contributors discuss the rising need for reforms in health care and health insurance administration, delivery systems, financing and overall health care policy strategies, particularly in fast-aging societies in Asia, and highly aged societies in Europe. This book will appeal to students and scholars of health care policy, health and social administration, social policy, public policy and social work. It will also provide a reference for professionals who need a view of the trajectory of public health financing in relation to changed and changing demographics and disease patterns.

CHALLENGES AND OPPORTUNITIES TO DEVELOP ORGANIZATIONS THROUGH CREATIVITY, TECHNOLOGY AND ETHICS

Cambridge University Press

Looks at the sources of stability and instability in post-Soviet authoritarian states through the case study of President Lukashenka's firm hold on power in Belarus. In particular, it seeks to understand the role of energy relations, policies, and discourses in the maintenance of this power. The central empirical question Balmaceda seeks to answer is what has been the role of energy policies in the maintenance of Lukashenka's power in Belarus? In particular, it analyzes the role of energy policies in the management of Lukashenka's relationship with three constituencies crucial to his hold on power: Russian actors, the Belarusian nomenklatura, and the Belarusian electorate. In terms of foreign relations, the book focuses on the factors explaining Lukashenka's ability to project Belarus' power in its relationship with Russia in such a way as to compensate for its objective high level of dependency, assuring high levels of energy subsidies and rents continuing well beyond the initial worsening of the relationship in c. 2004. In terms of domestic relations, Balmaceda examines Lukashenka's specific use of those energy rents in such a way as to assure the continuing support of both the Belarusian nomenklatura and the Belarusian electorate.

Business Behaving Well Elsevier

Over the past several years, Mainland China has undertaken reforms in various domestic areas, including culture and society, education, the economy, and the Communist Party. In addition, since September 1982 Peking has begun to pursue an independent course in foreign relations. In this volume, based on the Thirteenth Sino-American Conference in Tai

When Flying Really Was Fun High Life, Low Life Level 4

In recent years there has been much debate surrounding the future of the welfare state in Europe, the complex factors influencing reform, and the extent to which responses to pressures on welfare could lead to irreversible systemic changes in social policy. By providing an in-depth analysis of social policy developments in Greece, this work furthers understanding of welfare reform trajectories in Europe. The authors thoroughly examine aspects of structural change, challenges and responses in major policy areas of employment, social security, family and gender, health and social care, and migration. Research issues central to the debate on 'recasting European welfare states', such as structural adjustments with regard to the production, organization and delivery of welfare, significant changes in the financial side of social protection, the role of political parties, the social partners and other major social actors in influencing (or resisting) policy reform, are at the forefront of the contributions to this volume. From the supranational level and the challenges linked to European integration and economic and monetary union are also of crucial importance in the analyses undertaken.

International Journal of Indian Psychology, Volume 6, Issue 2, (No. 2) Routledge

To assess urban sustainability performance, this book explores several clusters of cities, including megacities, cities of the Global South, European and North American cities, cities of the Middle East and North Africa, cities of Central and South East Asia, a city state of Singapore and a large group of global cities. It applies a multi-criteria approach using a panel of environmental, economic, social and smart indicators to assess progress and policies in global cities including London, New York, Hong Kong, San Francisco, Los Angeles, São Paulo, Rio de Janeiro, Buenos Aires, Paris, Berlin, Stockholm, Moscow, Beijing, Seoul, Singapore, Shanghai, Sydney, Tokyo and many others. Additional attention is given to the issues of climate change, poverty and smart dimensions, with renewable energy and the drivers of urban CO2 emissions playing the central role. This book is abundant with case studies considering strategies, policies and performance of the leading cities, including San Francisco, Stockholm and Seoul in greater depth, exploring how their successes can be used by other cities. The book identifies key linkages between different smart and sustainability dimensions as well as investment opportunities in cities with sustainability potential. This book will be of great interest to policy makers, city and regional authorities as well as scholars and students of urban planning and sustainable development aiming to facilitate a sustainability transition in our cities around the world.

EXPLAINING DIVERGENT LEVELS OF LONGEVITY IN HIGH-INCOME COUNTRIES

Xlibris Corporation

Toward a more sustainable society.

Simon and Schuster

During the last 25 years, life expectancy at age 50 in the United States has been rising, but at a slower pace than in many other high-income countries, such as Japan and Australia. This difference is particularly notable given that the United States spends more on health care than any other nation. Concerned about this divergence, the National Institute on Aging asked the National Research Council to examine evidence on its possible causes. According to Explaining Divergent Levels of Longevity in High-Income Countries, the nation's history of heavy smoking is a major reason why lifespans in the United States fall short of those in many other high-income nations. Evidence suggests that current obesity levels play a substantial part as well. The book reports that lack of universal access to health care in the U.S. also has increased mortality and reduced life expectancy, though this is a less significant factor for those over age 65 because of Medicare access. For the main causes of death at older ages -- cancer and cardiovascular disease -- available indicators do not suggest that the U.S. health care system is failing to prevent deaths that would be averted elsewhere. In fact, cancer detection and survival appear to be better in the U.S. than in most other high-income nations, and survival rates following a heart attack also are favorable. Explaining Divergent Levels of Longevity in High-Income Countries identifies many gaps in research. For instance, while lung cancer deaths are a reliable marker of the damage from smoking, no clear-cut marker exists for obesity, physical inactivity, social integration, or other risks considered in this book. Moreover, evaluation of these risk factors is based on observational studies, which -- unlike randomized controlled trials -- are subject to many biases.

October 2019, Vladivostok, Russian Federation, Far Eastern Federal University Springer

This book is a detailed and comprehensive synthesis of the scientific study of aging. Dozens of contributions from leading scholars review various theories of aging, and molecular, cellular, biochemical and microbial aspects of aging, among just a few of the topics included. Authoritative, wide ranging and thorough, this book will act as a source for experimental design, a comprehensive description of age related diseases, and provide information of the latest molecular theories underlying their causes. Additionally, it will target industries involved in developing anti-aging drugs, post-graduate medical students, and university libraries.

Geography For Upsc Prelims, 3E CRC Press

Providing guidance that helps students practice and troubleshoot their exam technique, these books send them into their exam with the confidence to aim for the best grades. - Enables students to avoid common misconceptions and mistakes by highlighting them throughout - Builds students' skills constructing and writing answers as they progress through a range of practice questions - Allows students to mark their own responses and easily identify areas for improvement using the answers in the back of the book - Helps students target their revision and focus on important concepts and skills with key objectives at the beginning of every chapter - Ensures that students maximise their time in the exam by including examiner's tips and suggestions on how to approach the questions This title has not been through the Cambridge International Examinations endorsement process.

The 2019 Griffiths School of Management Annual Conference on Business, Entrepreneurship and Ethics (GSMAC) Verlag Barbara Budrich

The book presents new developments in the dynamic modeling and optimization methods in environmental economics and provides a huge range of applications dealing with the economics of natural resources, the impacts of climate change and of environmental pollution, and respective policy measures. The interrelationship between economic activities and environmental quality, the development of cleaner technologies, the switch from

fossil to renewable resources and the proper use of policy instruments play an important role along the path towards a sustainable future. Biological, physical and economic processes are naturally involved in the subject, and postulate the main modelling, simulation and decision-making tools: the methods of dynamic optimization and dynamic games.

HEALTH CARE SYSTEMS IN EUROPE AND ASIA

OECD Publishing

Discusses globalization and addresses economic development, trade and comparative advantage, trade barriers, exchange rates, the balance of payments, and major international organizations today such as the U.N., IMF, and the World Bank.

Living the High Life in Minsk Routledge

Families international - the new milestone How may care be secured—particularly in ageing societies, how may families, relatives and friends support each other and live together beyond market reasons? How can social welfare be secured? How do different countries and different cultures solve the problems they may or may not, now or in days to come, share with other countries and cultures? Families, as is found in this publication by internationally renowned experts, are the base and well of society's fortune in a humane paradigm. Furthermore, it is the very backbone of lifelong solidarity in inter-generational relations, and the very place where the readiness of taking on care and responsibility are experienced and learned. The publication's underlying idea opens up two perspectives: on the one hand, differences and similarities in family life forms are chiselled out on the base of an international cooperation. Simultaneously, the international authors are called upon to express their ideas about their own country's future more distinctly and clearly; thus, distinctions and similarities of the respective paths of development are rather easily perceived.

SOCIAL POLICY DEVELOPMENTS IN GREECE

Springer Nature

Award-winning author Tara L. Kuther presents Lifespan Development in Context, a topically organized version of her bestselling Lifespan Development text that provides a panoramic view of the many influences that shape human development. Kuther's student-friendly narrative guides the reader through immersive video cases and real-world examples to illustrate how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change throughout our lives. Three core themes resonate throughout each chapter: the centrality of context, the importance of research, and the value of applied developmental science. Foundational theories and classic studies are combined with contemporary research and culturally diverse perspectives for a modern introduction to the field that is both comprehensive and concise. Visual overviews, case studies, and critical thinking questions encourage self-reflection and class discussion, ensuring students have the tools they need to apply course concepts to their lives and future careers.

Purpose and Policy in the Global Community Farrar, Straus and Giroux

Since 1985, national economies have become increasingly integrated into a global network. At the same time, both population and production in developing countries are becoming concentrated in urban regions. This, in turn, has generated demands for more local autonomy, shifting more decision making to sub-national levels. Globalization is expected to continue leading to greater openness and international mobility of capital and people. There are few reasons to believe that these trends will abate—if anything, they are likely to intensify the focus on cities and sharpen competition among these for international and local resources. This volume underscores the transformative role of globalization and urbanization and shows the interplay between the two forces.

Aging Tata McGraw-Hill Education

This volume represents the proceedings of the 3rd Eurasian Conference on Educational Innovation 2020 (ECEI 2020). This conference is organized by the International Institute of Knowledge Innovation and Invention (IIKII), and was held on February 5-7, 2020 in Hanoi, Vietnam. ECEI 2020 provides a unified communication platform for researchers in a range of topics in education innovation and other related fields. This proceedings volume enables interdisciplinary collaboration of science and engineering technologists. It is a fine starting point for establishing an international network in the academic and industrial fields.

DYNAMIC OPTIMIZATION IN ENVIRONMENTAL ECONOMICS

Potomac Books, Inc.

The second edition of a comprehensive introduction to machine learning approaches used in predictive data analytics, covering both theory and practice. Machine learning is often used to build predictive models by extracting patterns from large datasets. These models are used in predictive data analytics applications including price prediction, risk assessment, predicting customer behavior, and document classification. This introductory textbook offers a detailed and focused treatment of the most important machine learning approaches used in predictive data analytics, covering both theoretical concepts and practical applications. Technical and mathematical material is augmented with explanatory worked examples, and case studies illustrate the application of these models in the broader business context. This second edition covers recent developments in machine learning, especially in a new chapter on deep learning, and two new chapters that go beyond predictive analytics to cover unsupervised learning and reinforcement learning.

Cambridge English Readers Level 4: High Life, Low Life Routledge

Indigenous peoples are diverse, within and across nations. However, the Indigenous peoples have experienced colonisation processes that have undermined Indigenous young people's access to their identity, language and culture.
