CCNA v3 Lab Guide: Routing and Switching 200-125 provides the configuration skills necessary to pass the CCNA v3 exam. The CCNA 200-125 candidate must answer technical questions and have the skills required to configure, verify and troubleshoot network connectivity. There are 44 labs that start from basic global configuration to more complex network troubleshooting of routers and switches. There is coverage of IPv6 addressing, WAN connectivity, ACLs and NAT that are all based on CCNA v3 exam guidelines. The troubleshooting questions are a key aspect of the CCNA exam. You will learn a standard troubleshooting methodology required for CCNA v3 style questions. The step-by-step format includes analysis and resolution of errors. In addition there is an extended lab with multiple routing and switching errors. The lab guide is based on the book CCNA v3 Routing and Switching 200-125. Linear Algebra: An Introduction Using MAPLE is a text for a first undergraduate course in linear algebra. All students majoring in mathematics, computer science, engineering, physics, chemistry, economics, statistics, actuarial mathematics and other such fields of study will benefit from this text. The presentation is matrix-based and covers the standard topics for a first course recommended by the Linear Algebra Curriculum Study Group. The aim of the book is to make linear algebra accessible to all college majors through a focused presentation of the material, enriched by interactive learning and teaching with MAPLE. Development of analytical and computational skills is emphasized throughout. Worked examples provide step-by-step methods for solving basic problems using Maple. The subject's rich pertinence to problem solving across disciplines is illustrated with applications in engineering, the natural sciences, computer animation, and statistics
