### **DOWNLOADS FROM THE UNIVERSE**

Ventana Communications Group  
One of the more ancient ways people receive messages is through something very formally called bibliomancy. How does it work? Basically, flip open to a page that calls to you, read the sentence that ends up under your finger and, lo and behold, it will probably make you laugh because it is the perfect selection of words that brings you comfort, guidance, or clues as to what to do next. That is what you

can do with "Downloads from the Universe." Depending on your mood, need, or question, pick a particular download page and see what is in store for you. If you have a sudden urge to read the whole book straight through-trust that instinct as well. This is a never-ending journey into insight, guidance, and empowerment. So in whatever way it serves you, that is best! There is nothing like having real solutions and actual answers to your questions. There is nothing like being able to access any and all series of investigations and know that you will be receiving viable, if somewhat new, guidance and assistance. "Downloads from the Universe" is the result of automatic writing where channeled

information that pertains to the week, the energetic weather and whatever guidance comes through. It is offered as a way to understand the changes that are happening on Earth as well as an awareness of how to have a more wonderful life journey.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon.

There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

In this IBM® Redbooks® publication we discuss IBM Systems Director Navigator for i, which is a Web console interface for IBM i administration where you can work with the Web-enabled tasks of System i® Navigator. IBM Systems Director Navigator for i includes a number of welcome pages that allow you to quickly find the task that you want to perform. The IBM Systems Director Navigator for i interface is not just a set of URL addressable tasks, but is a robust Web console from which you can manage your IBM i system. However, the System i Navigator Tasks on the Web, which are a set of URL-addressable tasks, can be accessed by using the URL or from within the IBM Systems Director Navigator for i interface. The information in this book is intended to help you start using the Web-based console, IBM Systems Director Navigator for i, by providing you with a look at the new interface as well as tips for working with various parts of the new console.

Director in a Nutshell is the most concise and complete guide available for Macromedia Director 7, the premier multimedia authoring tool. It addresses new features in Director 7 and Shockwave 7, but also covers earlier versions for those still working with Director 5, 6, and 6.5. Director in a Nutshell condenses hundreds of Director tips and techniques into a desktop quick reference that is a must-have addition to every Director developer's library. It covers Director's core components (the Cast, Score, Stage, sprites, and animation), delivery and optimization (Projectors, Shockwave, and the new System Player and ShockMachine), and media elements (video, audio, SWA, bitmaps, JPEG, GIFs, animated GIFs, texts, fonts, fields, buttons, menus, cursors, dialog boxes, film loops,

Flash, and vector shapes). Director in a Nutshell is the only book to integrate Director's multiple facets into a comprehensive discussion of each topic, including all related Lingo commands. The reader gets both the nitty-gritty details and the bigger context in which to use them. It highlights cross-platform differences for developers under both Windows (3.1/95/98/NT) and the Macintosh. It includes details on optimizing performance, memory usage, productivity tips, keyboard shortcuts, coordinate systems, palettes, the Paint window, Movies-in-a-Window, Xtras, Shockwave audio, QuickTime 3, and Director 7's new features, including dot notation, vector shapes, compressed fonts, sprite transformations (rotation, skew, quad, flip), new Lingo, and the Multiuser and XML Xtras. Director in a Nutshell is a high-end handbook, at a low-end price-an indispensable desktop reference for every Director user.

This IBM® Redbooks® publication illustrates implementation, testing, and helpful scenarios with IBM Power® Systems 780 and 795 using the

comprehensive set of the Power virtualization features. We focus on the Power Systems functional improvements, in particular, highlighting the reliability, availability, and serviceability (RAS) features of the enterprise servers. This document highlights IBM Power Systems Enterprise Server features, such as system scalability, virtualization features, and logical partitioning among others. This book provides a documented deployment model for Power 780 and Power 795 within a virtualized environment, which allows clients to plan a foundation for exploiting and using the latest features of the IBM Power Systems Enterprise Servers. The target audience for this book includes technical professionals (IT consultants, technical support staff, IT Architects, and IT Specialists) responsible for providing IBM Power Systems solutions and support. **IBM TS7700 Release 3.3** Macromedia Director MX for Windows and Macintosh Metro sync disaster recovery (DR) provides two-way synchronous data replication between IBM Spectrum Fusion™ HCI clusters installed at two sites. In the event of a site disaster, applications can be failed over to the

second site. The replication between the sites is synchronous, hence, the Metro sync DR solution is only available for metropolitan distance data centers with 40 millisecond latency or less. The procedures described in this paper for IBM Spectrum Fusion HCI 2.4 Metro sync DR are the same for IBM Storage Fusion HCI 2.5.2 Metro-DR. This IBM Redpaper publication will help you install and configure the new Metro sync DR function). The use case will show the end to end process with the failover and failback of the WordPress application. IBM Spectrum Fusion HCI and IBM Spectrum Fusion have become IBM Storage Fusion HCI System and IBM Storage Fusion. This edition uses the IBM Spectrum® brand names and will be updated with the next edition.

This IBM® Redbooks® publication helps you install, tailor, and configure a solution with IBM Systems Director VMControl so that you can move beyond simply managing virtualization to using virtualization to better manage your IT infrastructure. This book describes how

the combination of IBM Systems Director and VMControl reduces the total cost of ownership of a virtualized environment by decreasing management costs, increasing asset use, and linking infrastructure performance to business goals. This book provides a broad understanding on how VMControl simplifies the management of virtual environments across multiple virtualization technologies and hardware platforms, freeing you from silos of virtualization and delivering enterprise-wide visibility and control. A leading multi-platform virtualization management solution, VMControl is now available in three Editions (Express, Standard, and Enterprise) to best match your virtualized environment. In addition, this book describes the VMControl Enterprise Edition plug-in for IBM Systems Director, which uses a workload-optimized approach to decrease infrastructure costs and improve service levels. With VMControl Enterprise Edition, you can manage system pools with the simplicity of managing a single system, an essential capability for moving to cloud computing and a dynamic infrastructure.

The definitive guide to installing and configuring IBM FileNet Information Management software

**KEY FEATURES**

- Get guidance on installation and configuration, including troubleshooting.
- Prepare thoroughly for installation to ensure a smooth and successful deployment.
- Install or upgrade Case Manager, Content Search, Case Analyzer, Monitor Dashboard, and WebSphere.

**DESCRIPTION** Whether you're a beginner or an experienced administrator, this book will help you master the installation and configuration of IBM FileNet Information Management software. This book provides detailed instructions and practical techniques for preparing, configuring, and deploying IBM software products. From IBM BAW 18.0 and IBM Security Directory Suite 8.x to IBM Content Search Services 5.5.x and Oracle 12C, this book covers the essential prerequisites and installation processes for each system platform. You'll

also learn about setting up supporting systems like IBM Case Manager and IBM Workflow Center and integrating components like WebSphere, IBM Content Navigator, and Case Monitor Dashboard. By the end of the book, you will have acquired the necessary knowledge and skills to effectively prepare, configure, and deploy different IBM software products.

**WHAT YOU WILL LEARN**

- Learn how to access the comprehensive list of IBM Resources and Technical References.
- Understand the procedures for IBM Installation downloads and using the Software Compatibility Matrix.
- Get familiar with the tools available for system monitoring, such as the IBM SCout tool for System Sizing.
- Download, prepare, and successfully install IBM Fix Packs, IBM Cloud systems, and RedHat OpenShift.
- Know how to install and set up IBM Directory Services Security for Users and Groups.

**WHO THIS BOOK IS FOR** This book is for IT consultants, systems and solution architects, and data analysts and developers who need to document proposals for the sizing and requirements of IBM software products for banks and insurance companies. It also provides

IBM® iFlow Director is a high performance, low-latency 10 Gb Ethernet switch integrated flow balancer with policy-based traffic steering capability. It delivers high-availability, scalability, and lower total cost of ownership (TCO) for

appliance vendors that offer IBM BladeCenter® based solutions for applications, such as Security Gateways, Wireless Gateways, Lawful Interception & Network Surveillance, Traffic Management & Service Differentiation, and so on. The system throughput can be scaled by adding more blade servers and up to four switches that run iFlow Director. iFlow Director is designed with a number of advanced features to deliver high availability in mission-critical environments. The solution is built around industry-leading hardware to help eliminate any single point of failure. iFlow Director uses BladeCenter innovations such as internal monitoring, redundant mid-plane, redundant network connections per blade, redundant power supplies and fans, and switching features, such as uplink failure detection and controlled failover with network interface card (NIC) teaming, to deliver high availability. iFlow Director provides up to 480 Gbps of nonblocking, wire-speed bidirectional throughput to BladeCenter to meet your network traffic load distribution needs. With ten 10 Gbps uplink ports and 14 nonblocking 10 Gbps internal ports, iFlow

Director offers unmatched performance, with latency as low as 1.60 microseconds. The iFlow Director solution provides significant savings compared to a solution that consists of multiple stand-alone appliances, Layer 2 switches and load balancers. With 480 Gbps of raw throughput, the iFlow Director solution provides a price/performance advantage. This IBM Redpaper™ publication is intended for network professionals who want to reduce the complexity associated with appliance sprawl by using a integrated solution that includes a high performance 10 Gb Ethernet embedded switch for BladeCenter, and a stack of software that allows the control of the flow of traffic inside the chassis.

IMSTM Version 11 continues to provide the leadership in performance, reliability, and security that is expected from the product of choice for critical online operational applications. IMS 11 also offers new functions to help you keep pace with the evolving IT industry. Through the introduction of the new IMS Enterprise Suite application developers with minimal knowledge of IMS Connect can start developing client applications to communicate with IMS. With Open Database, IMS 11 also provides direct SQL access to IMS data from programs that run on any distributed platform, unlocking DL/I data to the world of SQL application programmers. In this IBM® Redbooks® publication, system programmers get the steps for installing the new IMS components, and the application programmer can follow scenarios of how client applications can take advantage of SQL to access IMS data. We describe the installation of prerequisites, such as IMS Connect and the Structured Call Interface component of Common Service Layer address space and document the set up of the three new IMS drivers: - Universal DB resource adapter - Universal JDBC driver -

Universal DL/I driver Our scenarios use the JDBC driver for type-4 access from Windows® to a remote DL/I database and DB2® tables and extend it to use IBM Mashup Center to provide an effective Web interface and to integrate with Open Database. Important: IMS Enterprise Suite V2.1 is the last release of the IMS Enterprise Suite that includes the DLIModel utility plug-in. Customers should migrate to using IMS Enterprise Suite V2.2 or later, which includes the IMS Enterprise Suite Explorer for Development. DLIModel utility projects can be imported into new IMS Explorer projects. In this book, any references to generating IMS metadata classes by using the DLIModel utility are comparable to the actions used to generate the classes using the IMS Explorer for Development.
