generation.  
 Jackson Physics Problem Solutions  
 For simple differential equations, it is possible to find closed form solutions. For example, given a function  $g$ , the general solution of the simplest equation  $Y'(t) = g(t)$  is  $Y(t) = \int g(s)ds + c$  with an arbitrary integration constant. Here,  $\int g(s)ds$  denotes any fixed antiderivative of  $g$ .
