**Broadband Dielectric Spectroscopy** Parlor Press LLC

Originally published in German in 1935, this monograph anticipated solutions to problems of scientific progress, the truth of scientific fact and the role of error in science now associated with the work of Thomas Kuhn and others. Arguing that every scientific concept and theory—including his own—is culturally conditioned, Fleck was appreciably ahead of his time. And as Kuhn observes in his foreword, "Though much has occurred since its publication, it remains a brilliant and largely unexploited resource." "To many scientists just as to many historians and philosophers of science facts are things that simply are the case: they are discovered through properly passive observation

of natural reality. To such views Fleck replies that facts are invented, not discovered. Moreover, the appearance of scientific facts as discovered things is itself a social construction, a made thing. A work of transparent brilliance, one of the most significant contributions toward a thoroughly sociological account of scientific knowledge."—Steven Shapin, *Science*

*The Art of Renaissance Europe* Verso

Subversive political writings by the acclaimed author of *Empire*.

*The Babylonian Genesis* Dalcassian Publishing Company

Discusses how European scientists from the High Middle Ages through the Enlightenment used wonders, monsters, curiosities, marvels, and other phenomena to envision the natural world.

*The Travels of the Jesuits in Ethiopia* Health Research Books

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this

book in the same form as it was first published. Hence any marks seen are left intentionally to preserve its true nature.

*Nuclear Physics: Experimental And Theoretical Human Kinetics*

Maccabees 1-2 are included in the Deuterocanonical books; 3-4 are Apocryphal books excluded from the Deuterocanonicals; 5 is also known as the Arabic II Maccabees, and is included in the Paris and London Polyglots. Cf. Jewish encyclopedia, v. 8, p. 244 Includes index

The Book of the Secrets of Enoch Springer Science & Business Media

This Comprehensive Text Presents Not Only A Detailed Exposition Of The Basic Principles Of Nuclear Physics But Also Provides A Contemporary Flavour Of The Subject By Covering The Recent Developments. Starting With A Synoptic View Of The Subject, The Book Explains Various Physical Phenomena In Nuclear Physics Alongwith The Experimental Methods Of Measurement. Nuclear Forces As Encountered In Two-Body Problems Are Detailed Next Followed By The Problems Of Radioactive Decay. Nuclear Reactions Are Then Comprehensively Explained Alongwith The Various Models Of Reaction Mechanism. This Is Followed By Recent Developments Like The Pre- Equilibrium Model And Heavy Ions Induced Reaction. The Book Would Serve As A Contemporary Text For Senior Undergraduate As Well As Post Graduate Students Of Physics. Practising Scientists And Researchers In The Area Would Also Find The Book To Be A Useful Reference Source.

Manitua Metropolitan Museum of Art

A practical and evidence-backed approach for improving egg quality and fertility-- fully revised and updated in 2019. The latest scientific research reveals that egg quality has a powerful impact on how long it takes to get pregnant and the risk of miscarriage. Poor egg quality is in fact the single most important cause of age-related infertility, recurrent miscarriage, and failed IVF cycles. Based on a vast array of scientific research, It Starts with the Egg provides a comprehensive program for improving egg quality in three months, with specific advice tailored to a variety of fertility challenges-- including endometriosis, unexplained infertility, diminished ovarian reserve, PCOS, and recurrent miscarriage. With concrete strategies such as minimizing exposure to common environmental toxins, choosing the right vitamins and supplements to safeguard developing eggs, and harnessing nutritional advice shown to boost IVF success rates, this book offers practical solutions that will help you get pregnant faster and deliver a healthy baby.

Learn how to train for maximum gains with *Periodization: Theory and Methodology of Training*. Guided by the expertise of Tudor O. Bompa, the pioneer of periodization training, and leading periodization researcher G. Gregory Haff, you'll learn how to vary the intensity and volume of training to optimize the body's ability to recover and rebuild—resulting in better performance and less risk of injury. Translated into nine languages, *Periodization: Theory and Methodology of Training* has become one of the major resources on periodization for sport scientists, coaches, and athletes throughout the world. Since the introduction of this groundbreaking training theory by Tudor O. Bompa in 1963, periodization has become the basis of every serious athlete's training. Now in its fifth edition, Bompa's classic text combines the concepts central to periodization and training theory

with contemporary advances in sport science, physiology, and coaching. No other text discusses planning and periodization in such detail or with so many specific, practical examples from a variety of sports. With the fifth edition of *Periodization*, you can learn the principles, objectives, and components of a successful long-term training program and how to plan the right program to achieve your performance goals. *Periodization* also contains proven strategies for optimal peaking and specifics on training for better motor ability, working capacity, skill effectiveness, and psychological adaptability. Better organized and easier to read, the fifth edition of this definitive text presents the latest refinements to periodization theory: • New research on rest and restoration, specifically countermeasures used in facilitating recovery plus practical suggestions for implementation • How the use of sequential training and delayed training effects can produce optimal performance at major competitions • A comprehensive discussion, grounded in scientific data, on applying various methods of peaking to ensure optimal performance for competition • New information on how concepts such as conjugated sequencing and summated microcycle structures can maximize strength gains and direct training • Expanded information on the development of sport performance characteristics, including speed training and sport-specific endurance Chapter summaries will help you review and reference major concepts throughout the text. Plan and document each training program with ease using the duplication-ready annual and four-year training plan charts included in the appendix. When it comes to designing programs for optimal training, Tudor Bompa's expertise is unmatched. The fifth edition of *Periodization: Theory and Methodology of Training* presents the latest refinements to Bompa's periodization theory to help you create training programs that enhance sport skills and ensure peak performance.

**Genesis and Development of a Scientific Fact** Springer Science & Business Media

Foreword: François Ewald and Alessandro Fontana Introduction: Arnold I. Davidson One: 7 January 1976 What is a lecture? -- Subjugated knowledges. -- Historical knowledge of struggles, genealogies, and scientific discourse. -- Power, or what is at stake in genealogies. -- Juridical and economic conceptions of power. -- Power as repression and power as war. -- Clausewitz's aphorism inverted. Two: 14 January 1976 War and power. -- Philosophy and the limits of power. -- Law and royal power. -- Law, domination, and subjugation. -- Analytics of power: questions of method. -- Theory of sovereignty. -- Disciplinary power. -- Rule and norm. Three: 21 January 1976 Theory of sovereignty and operators of domination. -- War as analyzer of power relations. -- The binary structure of society. -- Historico-political discourse, the discourse of perpetual war. -- The dialectic and its codifications. -- The discourse of race struggle and its transcriptions. Four: 28 January 1976 Historical discourse and its supporters. -- The counterhistory of race struggle. -- Roman history and biblical history. -- Revolutionary discourse. -- Birth and transformation of racism. -- Race purity and State racism: the Nazi transformation and the Soviet transformation. Five: 4 February 1976 Answer to a question on anti-Semitism. -- Hobbes on war and sovereignty. -- The discourse on the Conquest in England: royalists, parliamentarians, and Levellers. -- The binary schema and political historicism. -- What Hobbes wanted to eliminate. Six: 11 February 1976 Stories about origins. -- The Trojan myth. -- France's heredity. -- "Franco-Gallia."--Invasion, history, and public right. -- National dualism. -- The knowledge of the prince. -- Boulainvillier's "Etat de la France."--The clerk, the intendant, and the knowledge of the aristocracy. -- A new subject of history. -- History and constitution. Seven: 18

February 1976 Nation and nations. -- The Roman conquest. -- Grandeur and decadence of the Romans. -- Boulainvilliers on the freedom of the Germans. -- The Soissons vase. -- Origins of feudalism. -- Church, right, and the language of State. -- Boulainvilliers: three generalizations about war: law of history and law of nature, the institutions of war, the calculation of forces. -- Remarks on war. Eight: 25 February 1976: Boulainvilliers and the constitution of a historico-political continuum. -- Historicism. -- Tragedy and public right. -- The central administration of history. -- The problematic of the Enlightenment and the genealogy of knowledges. -- The four operations of disciplinary knowledge and their effects. -- Philosophy and science. -- Disciplining knowledges. Nine: 3 March 1976 Tactical generalization of historical knowledge. -- Constitution, Revolution, and cyclical history. -- The savage and the barbarian. -- Three ways of filtering barbarism: tactics of historical discourse. - - Questions of method: the epistemological field and the antihistoricism of the bourgeoisie. -- Reactivation of historical discourse during the Revolution. -- Feudalism and the gothic novel. Ten: 10 March 1976 The political reworking of the idea of the nation during the Revolution: Sieyes. -- Theoretical implications and effects on historical discourse. -- The new history's grids of intelligibility: domination and totalization. -- Montlosier and Augustin Thierry. -- Birth of the dialectic. Eleven: 17 March 1976 From the power of sovereignty to power over life. -- Make live and let die. -- From man as body to man as species: the birth of biopower. -- Biopower's fields of application. -- Population. -- Of death, and of the death of Franco in particular. -- Articulations of discipline and regulation: workers' housing, sexuality, and the norm. -- Biopower and racism. -- Racism: functions and domains. -- Nazism. -- Socialism. Course Summary Situating the Lectures: Alessandro Fontana and Mauro Bertani Index.

Big data has incredible business value, and Splunk is the best tool for unlocking that value. Exploring Splunk shows you how to pinpoint answers and find patterns obscured by the flood of machinegenerated data. This book uses an engaging, visual presentation style that quickly familiarizes you with how to use Splunk. You'll move from mastering Splunk basics to creatively solving real-world problems, finding the gems hidden in big data.

#### **Microwave Circuit Design Using Linear and Nonlinear Techniques** Autonomedia

Includes a sneak peek at the first book in the Accidental series, 'The accidental call girl.'

"A ... new philosophy and ... guide to getting the most out of your money--and out of life--for those who value memorable experiences as much as their earnings"--

*The Book of Enoch, Or, 1 Enoch* Houghton Mifflin

Since RUTHERFORD MORISON left us with the concept of the Omentum being the 'abdominal policeman', clinicians have tacitly assumed that they know sufficient about the structure and function of this organ. However interest in the omentum and its relationship to clinical surgery has recently been develop ing. This book examines all aspects with special reference to surgery and should provide a welcome impetus in research and clinical practice. The editors and contributors have produced a book which is comprehensive and well illustrated and contains detailed refer ences

to the important original sources - so essential in a work of this nature. It is written for those who wish to share the delight of acquiring knowledge - even about a comparatively humble organ - as well as for practical surgeons. Both will find ample information to arouse their interest and expand their surgical horizons in exciting ways of which they will almost certainly not have dreamt. I welcome a book of this calibre on a subject which deserves our increasing interest. I delight in the fact that it is dedicated to my friend and colleague MARTIN ALLGOWER.

#### **The Greater OMENTUM** ABRAMS

Amidst the chaos of the Reformation Age, a young theology student adopts the cause of heretics and the disinherited and finds himself pursued by those keen to spill the blood of any would-be supporter of Martin Luther.

#### **Messages 2 Student's Book** Oriental Inst Publications Sales

Here is a complete translation of all the published cuneiform tablets of the various Babylonian creation stories, of both the Semitic Babylonian and the Sumerian material. Each creation account is preceded by a brief introduction dealing with the age and provenance of the tablets, the aim and purpose of the story, etc. Also included is a translation and discussion of two Babylonian creation versions written in Greek. The final chapter presents a detailed examination of the Babylonian creation accounts in their relation to our Old Testament literature.

#### *Die with Zero* Exploring Splunk

Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century. The Architecture of the City is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.

#### The Architecture of the City Harvard University Press

This book is a systematic history of one of the oldest problems in the philosophy of space and time: How is the change from one state to its opposite to be described? To my knowledge it is the first comprehensive book providing information about and analysis of texts on this topic throughout the ages. The target audience I envisaged are advanced students and scholars of analytic philosophy and the history of philosophy who are interested in the philosophy of space and time. Authors treated in this book range from Plato, Aristotle, the logicians of the late Middle Ages, Kant, Brentano and Russell to contemporary authors such as Chisholm, Hamblin, Sorabji or Graham Priest, taking into account such theories as interval semantics or paraconsistent logic. For the first time, two main questions about the moment of change are explicitly kept apart: Which (if any) of the opposite states does the moment of change belong to? And does it contain an instantaneous event? The texts are discussed within a clear framework of the main systematic options for describing the moment of change, sometimes using predicate logic extended by newly introduced logical prefixes. The last part contains a new suggestion of how to solve the problem of the moment of change. It is centred around a theory of instantaneous states which provides a new solution to Zeno's Flying Arrow Paradox.

*Getting the Love You Want* Columbia University Press

From the ancients' first readings of the innards of birds to your neighbor's last bout with the state lottery, humankind has put itself into the hands of chance. Today life itself may be at stake when probability comes into play--in the chance of a false negative in a medical test, in the reliability of DNA findings as legal evidence, or in the likelihood of passing on a deadly congenital disease--yet as few people as ever understand the odds. This book is aimed at the trouble with trying to learn about probability. A story of the misconceptions and difficulties civilization overcame in progressing toward probabilistic thinking, *Randomness* is also a skillful account of what makes the science of probability so daunting in our own day. To acquire a (correct) intuition of chance is not easy to begin with, and moving from an intuitive sense to a formal notion of probability presents further problems. Author Deborah Bennett traces the path this process takes in an individual trying to come to grips with concepts of uncertainty and fairness, and also charts the parallel path by which societies have developed ideas about chance. Why, from ancient to modern times, have people resorted to chance in making decisions? Is a decision made by random choice fair? What role has gambling played in our understanding of chance? Why do some individuals and societies refuse to accept randomness at all? If understanding randomness is so important to probabilistic thinking, why do the experts

disagree about what it really is? And why are our intuitions about chance almost always dead wrong? Anyone who has puzzled over a probability conundrum is struck by the paradoxes and counterintuitive results that occur at a relatively simple level. Why this should be, and how it has been the case through the ages, for bumbler and brilliant mathematicians alike, is the entertaining and enlightening lesson of *Randomness*.

*The Philosophy of Natural Magic* Cito Research

"This volume publishes the proceedings of the Theban Symposium that took place in May 2010, in Granada, Spain, at the Institute for Arabic Studies of the Spanish National Research Council (CSIC), on the general theme of 'Creativity and Innovation in the Reign of Hatshepsut.' The volume contains nineteen papers that present new perspectives on the reign of Hatshepsut and the early New Kingdom. The authors address a range of topics, including the phenomenon of innovation, the Egyptian worldview, politics, state administration, women's issues and the use of gender, cult and rituals, mortuary practices, and architecture. Groundbreaking for the study of Hatshepsut's reign and the beginning of the Eighteenth Dynasty, this volume will become an important reference for scholars and lay readers interested in the history, culture, and archaeology of the time of Hatshepsut and the early New Kingdom"--Publisher description.
