### Science Education in Context Multilingual Matters

This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two-volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to prepare well-qualified professionals, this volume explores the decisions the academics responsible for delivering this education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy, and engineering pedagogy more specifically.

### EDUCATION IN LANGUAGES OF LESSER POWER

Palgrave Macmillan

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc. ). [State of Higher Education in Papua New Guinea](#) Commonwealth Secretariat

"The report describes the efforts of 144 countries and territories to meet their international commitments to eliminate the worst forms of child labor."...Elaine L. Chao.

*The Department of Labor's 2002 Findings on the Worst Forms of Child Labor* The Report: Papua New Guinea 2015

These studies on the role of trawl fisheries for food security and the potential impacts of management measures reveal major differences across countries in fishing practices, including crew demographics and income-sharing arrangements.

[Science Achievement of Grade 12 Students](#) editorips@usp.ac.fj Contains information about the key sectors in Papua New Guinea (PNG), such as LNG and agriculture, as well as investment opportunities and interviews of important politicians and businesspeople.

*Commonwealth Education Partnerships, 2007* Food & Agriculture Org.

Guidebook showcasing successful, innovative education initiatives to help meet the MDGs and Education for All targets from around the Commonwealth, in a concise and easy-to-use format. Provides policy-makers with examples of solutions that will assist them in devising strategies to counter their own educational challenges.

### MATHEMATICS AND ITS TEACHING IN THE ASIA-PACIFIC REGION

Routledge

This book provides the global mathematics education community with information on the recent and current status of the teaching of mathematics in a group of island nations in the Asia-Pacific region. Sri Lanka, Indonesia, Japan, the Philippines, Australia, Papua New Guinea, New Zealand, and twelve nations in the South Pacific Ocean. It is the third volume in a series conceived by Dr Bruce Vogeli of Columbia University Teachers College and published by WSP, aimed at producing contemporary accounts of mathematics teaching in a world-wide group of nations. Previous volumes have covered Central and South American nations and a selection of Muslim nations respectively.

*Papua New Guinea Newsletter* Commonwealth Secretariat This special double issue consists of a selection of papers

presented at the Ninth World Congress of Comparative Education, held at the University of Sydney, Australia, in July 1996, on the theme of "Tradition, Modernity and Post-modernity in Comparative Education". Before presenting the selection, this introduction will first survey the changing discourse in comparative education over the past few decades and will argue that an unreformulated and uncritical postmodernity holds no greater promise in comparative education, than its uncritical modernist or tradition-oriented rivals. When Nicholas Hans (1949) cited Michael Sadler's early rationale for studying comparative education, it was within the context of a work which sought to identify the traditions that underlay national educational systems. This early work, together with others such as that by Isaac Kandel (1930) was predicated on the assumption of the importance of national character, of which education systems were an important component. Indeed from this perspective, the purpose of comparative education was not merely to analyse the "forces and factors" which produced differences among educational systems, but, implicitly at least, also "to discover the underlying principles which govern the development of all national systems of education" (Hans 1949: 5). Hans was preeminently an historian, of course (as was Kandel to an extent), and therefore saw comparative education first and foremost in this light.

The State and Its Enemies in Papua New Guinea Springer

On secondary education in Papua New Guinea.

Papua New Guinea National Education Plan Springer Science & Business Media

This title was first published in 2001. Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities. This text examines the wisdom of such a move when many of the conditions necessary for its success are not present. It concludes that quality assurance can be useful in developing countries because it shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can best be improved by using an integrated approach. Quality assurance also provides more focus and direction to the work of the traditional university system. However, it must be modified to suit the conditions prevailing in developing countries by being simple in design, modest in expectations and realistic in requirements.

*Educational Policy and Development Strategy in the Third World* BRILL

The study is the result of an international collaborative project supported and funded by the Carnegie Corporation of New York. This multi-year venture has involved a research team of some forty chapter authors and commentators. The research has been accompanied by three major workshops on project methodology, initial chapter reviews and final discussions. A point was made of including both scholars and practitioners involved in power-sharing settlements in the review process, in the hope that more would be learned about the actual implementation of the settlements under investigation. The project team was united in its wish to explore whether long-standing secessionist conflicts have been addressed effectively through the significant number of self-determination settlements that were generated in response to the wave of internal conflicts of the 1990s. It was also committed to testing whether consociationalist and integrative techniques of conflict settlement really are as mutually exclusive as is sometimes supposed, or whether they can in fact be mutually reinforcing. Finally, the project derives its impetus from the necessity to critically rethink the doctrine of self-determination. One may question whether its traditional, restrictive interpretation will be adequate in confronting the wide variety of future challenges to the territorial integrity of states.

*The U.S. Department of Labor's 2003 Findings on the Worst Forms of Child Labor* editorips@usp.ac.fj

Commonwealth Education Partnership 2007 is an essential overview of the development of education systems in the Commonwealth, focusing on international collaborations and on the partnerships in member countries between government, NGOs and the private sector in education. Focuses in this edition: increasing access and the right to quality education; supporting teachers for quality education; resourcing; and education for the good of all. Published for the Commonwealth Secretariat by Nexus Partnerships.

*Papua New Guinea Journal of Education* Routledge

"This collection of articles and interviews explores policy, practice and attitudes relating to the use of Pacific languages in education systems of most Pacific Island countries and territories, from pre-school to tertiary level. It records history ; it deals with current attitudes and prejudices ; and it focuses attention on perceived problems with the medium of education in many parts of the region."--Back cover.

**Beyond Binaries in Education Research** Bloomsbury Publishing

This book grounds the education of women and girls in the realities of their lives and experience in diverse areas of the developing world. The case studies range from the Arakambut of Peru to the changing experience of racialized education in South Africa. The contributors take issue with the World Bank's view that the education of girls and women is important primarily as a cost-effective mechanism for making women more economically productive.

Education in Australia, New Zealand and the Pacific World Scientific

This book provides an up-to-date and well-grounded analysis of education in Australia, New Zealand and the Pacific, including Cook Islands, Federated States of Micronesia, Fiji, Kiribati, Marshall Islands, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu. Leading writers from throughout this region identify contemporary educational challenges, issues, and priorities while drawing upon their own ongoing empirical research. Key themes include the impact of international trends and developments; educational reform and the quality of education; indigenous learning; inclusivity; aid and development co-operation; and the changing role and place of tertiary education. Detailed studies of specific educational systems and developments are considered in the light of broader analyses that run throughout the volume.

**The Report: Papua New Guinea 2012** Oxford Business Group  
In Papua New Guinea hopes are high that real change is on its way; the country's political, administrative, financial and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources. Many international actors are watching closely to see how this young country negotiates its path. Papua New Guinea became a major exporter of gas in 2014 when the \$19bn PNG liquefied natural gas (LNG) project was completed ahead of schedule and within budget, significantly increasing the size and strength of the economy. The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector, fuelling the growth of its economy as a whole. The LNG influx also poses challenges, however, in terms of ensuring inclusive growth and productive use of the new revenues. PNG takes pride in being a final frontier of natural and cultural development, but the task ahead is to protect the country's heritage while becoming part of the global economy.

**Socio-economics of trawl fisheries in Southeast Asia and Papua New Guinea** Gower Publishing Company

Quality teaching and learning are vital to meet the increasingly complex needs of students as they prepare for further education and work in the 21st century. This publication provides insights on how to create sustainable and high quality teacher capacity development systems in primary and secondary education, technical and vocational education and training, and higher education programs. It showcases 13 case studies from around the world as examples of teacher professional development programs that support, improve, and harness teaching capabilities and expertise. The publication also discusses government initiatives and other factors that can contribute to quality teaching.

**Distance Education in the South Pacific** BRILL

The Report: Papua New Guinea 2015 Oxford Business Group  
[Handbook of International Perspectives on Early Childhood Education](#) John Benjamins Publishing Company

The cultural diversity of the Asia-Pacific region is reflected in a multitude of linguistic ecologies of languages of lesser power, i.e., of indigenous and immigrant languages whose speakers lack collective linguistic power, especially in education. This volume looks at a representative sampling of such communities. Some receive strong government support, while others receive none.

For some indigenous languages, the same government schools that once tried to stamp out indigenous languages are now the vehicles of language revival. As the various chapters in this book show, some parents strongly support the use of languages other than the national language in education, while others are actively against it, and perhaps a majority have ambivalent feelings. The overall meta-theme that emerges from the collection is the need to view the teaching and learning of these languages in relation to the different needs of the speakers within a sociolinguistics of mobility.

[Gender, Education and Development](#) Oxford Business Group  
 The Handbook of International Perspectives on Early Childhood Education provides a groundbreaking compilation of research from an interdisciplinary group of distinguished experts in early childhood education (ECE), child development, cultural and cross-cultural research in the psychological sciences, etc. The chapters provide current overviews of ECE in Latin America and the Caribbean, the Middle East, Asia, Australia, Africa, Europe, the US, and Canada, and convey how ECE is multi-sectorial, multi-cultural, and multi-disciplinary, undergirded by such disciplines as neuroscience, psychological anthropology, cross-cultural human development, childhood studies, and political science.
