Praise For THE LITTLE BOOK OF ALTERNATIVE INVESTMENTS "Ben and Phil have done it again. Another lucid, insightful book, designed to enhance your wealth! In today's stock-addled cult of equities, there is a gaping hole in most investors' portfolios...the whole panoply of alternative investments that can simultaneously help us cut our risk, better hedge our inflation risk, and boost our return. This Little Book is filled with big ideas on how to make these markets and strategies a treasured part of our investing toolkit." —Robert Arnott, Chairman, Research Affiliates "I have been reading Ben Stein for thirty-five years and Phil DeMuth since he joined up with Ben ten years ago. They do solid work, and this latest is no exception." —Jim Rogers, author of *A Gift to My Children* "If anyone

can make hedge funds sexy, Stein and DeMuth can, and they've done it with style in this engaging, instructive, and tasteful how-to guide for investing in alternatives. But you should read this Kama Sutra of investment manuals not just for the thrills, but also to learn how to avoid the hazards of promiscuous and unprotected investing." —Andrew Lo, Professor and Director, MIT Laboratory for Financial Engineering

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular

media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

It is designed for those with substantial experience regarding traditional investments in stocks and bonds but limited familiarity regarding alternative assets, alternative strategies, and alternative portfolio management. The primer categorizes alternative assets into four groups: hedge funds, real assets, private equity, and structured products/derivatives. Real assets include vacant land, farmland, timber, infrastructure, intellectual property, commodities, and private real estate. For each group, the primer provides essential information about the characteristics, challenges, and purposes of these institutional-quality alternative assets in the context of a well-diversified institutional portfolio. Other topics addressed by this primer include tail risk, due diligence of the investment process and operations, measurement and management of risks and returns, setting return expectations, and portfolio construction. The primer concludes with a chapter on the case for investing in alternatives.

The first book to explain the new world of alternative investing, showing how anyone can use nontraditional options to significantly increase returns and lower risks The world's elite investors have long relied on alternative investments to produce superior returns. Until now, these strategies were the exclusive purview of institutions and the superwealthy, but today any informed investor can play the same game. A rainbow of investment options—timber, start-ups, master limited partnerships (MLPs), hedged strategies, managed futures, infrastructure, peer-to-peer lending, farmland, and dozens of other nontraditional strategies—can provide dramatically better gains, with less total risk, than the standard choices. In *The Alternative Answer*, Bob Rice, Bloomberg TV's Alternative Investments Editor, leads an entertaining and easy-to-understand tour of this world, and suggests specific alternative investments for all four key "jobs" of a portfolio: safely generating more current income, decreasing risks of economic shocks, significantly increasing long-term profits, and protecting purchasing power over time. Regardless of experience or net worth, readers will learn exactly how to substantially improve investment performance—in the same way that the world's best investors already do. Stocks and bonds alone aren't nearly enough. Investors need an alternative answer and now they have it.

The Law of Trustee Investments South-Western Pub

"It's not that we're dumb. We're wired to avoid pain and pursue pleasure and security. It feels right to sell when everyone around us is scared and buy when everyone feels great. It may feel right-but it's not rational." -From *The Behavior Gap* Why do we lose money? It's easy to blame the economy or the financial markets-but the real trouble lies

in the decisions we make. As a financial planner, Carl Richards grew frustrated watching people he cared about make the same mistakes over and over. They were letting emotion get in the way of smart financial decisions. He named this phenomenon-the distance between what we should do and what we actually do-"the behavior gap." Using simple drawings to explain the gap, he found that once people understood it, they started doing much better. Richards's way with words and images has attracted a loyal following to his blog posts for *The New York Times*, appearances on National Public Radio, and his columns and lectures. His book will teach you how to rethink all kinds of situations where your perfectly natural instincts (for safety or success) can cost you money and peace of mind. He'll help you to:

- Avoid the tendency to buy high and sell low;
- Avoid the pitfalls of generic financial advice;
- Invest all of your assets-time and energy as well as savings-more wisely;
- Quit spending money and time on things that don't matter;
- Identify your real financial goals;
- Start meaningful conversations about money;
- Simplify your financial life;
- Stop losing money!

It's never too late to make a fresh financial start. As Richards writes: "We've all made mistakes, but now it's time to give yourself permission to review those mistakes, identify your personal behavior gaps, and make a plan to avoid them in the future. The goal isn't to make the 'perfect' decision about money every time, but to do the best we can and move forward. Most of the time, that's enough."

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."
