One of the world's most esteemed and influential psychologists, Roy F. Baumeister, teams with New York Times science writer John Tierney to reveal the secrets of self-control and how to master it. "Deep and provocative analysis of people's battle with temptation and masterful insights into understanding willpower: why we have it, why we don't, and how to build it. A terrific read." —Ravi Dhar, Yale School of Management, Director of Center for Customer Insights Pioneering research psychologist Roy F. Baumeister collaborates with New York Times science writer John Tierney to revolutionize our understanding of the most coveted human virtue: self-control. Drawing on cutting-edge research and the wisdom of real-life experts, Willpower shares lessons on how to focus our strength, resist temptation, and redirect our lives. It shows readers how to be realistic when setting goals, monitor their progress, and how to keep faith when they falter. By blending practical wisdom with the best of recent research science, Willpower makes it clear that whatever we seek—from happiness to good health to financial security—we won't reach our goals without first learning to harness self-control.

Science fiction and East Asian myth combine in this dazzling retelling of the rise of Wu Zetian, the only female emperor in Chinese history. 'Absolutely epic. This is the historical-inspired, futuristic sci-fi mash-up of my wildest dreams.' Chloe Gong, author of *These Violent Delights* 'Like its ferocious heroine, Iron Widow is brutal, bloodthirsty and full of rage.' Julie C. Dao, author of *Forest of a Thousand Lanterns* I have no faith in love. Love cannot save me. I choose vengeance. The boys of Huaxia dream of the celebrity status that comes with piloting Chrysalises - giant transforming robots that battle the aliens beyond the Great Wall. Their female co-pilots are expected to serve as concubines and sacrifice their lives. When 18-year-old Zetian offers herself up as a concubine-pilot, her plan is to assassinate the ace male pilot responsible for her sister's death. But on miraculously emerging from the cockpit unscathed after her first battle, she is declared an Iron Widow - the most feared pilot of all. Now that Zetian has had a taste of power, she sets her sights on bigger things. The time has come to stop more girls from being sacrificed.

Looking at the way cultural competencies and sensibilities entered into the construction of race in the colonial context, this text proposes that 'cultural racism' in fact predates its postmodern discovery.

"A stunning picture of a black woman's coming of age in America. Put it on the shelf beside *The Autobiography of Malcolm X*." —Kirkus Reviews Elaine Brown assumed her role as the first and only female leader of the Black Panther Party with these words: "I have all the guns and all the money. I can withstand challenge from without and from within. Am I right, Comrade?" It was August 1974. From a small Oakland-based cell, the Panthers had grown to become a revolutionary national organization, mobilizing black communities and white supporters across the country—but relentlessly targeted by the police and the FBI, and increasingly riven by violence and strife within. How Brown came to a position of power over this paramilitary, male-dominated organization, and what she did with that power, is a riveting, unsparing account of self-discovery. Brown's story begins with growing up in an impoverished neighborhood in Philadelphia and attending a predominantly white school, where she first sensed what it meant to be black, female, and poor in America. She describes her political awakening during the bohemian years of her adolescence, and her time as a foot soldier for the Panthers, who seemed to hold the promise of redemption. And she tells of her ascent into the upper echelons of Panther leadership: her tumultuous relationship with the charismatic Huey Newton, who would become her lover and her nemesis; her experience with the male power rituals that would sow the seeds of the party's demise; and the scars that she both suffered and inflicted in that era's paradigm-shifting clashes of sex and power. Stunning, lyrical, and

acute, this is the indelible testimony of a black woman's battle to define herself. "A glowing achievement." —Los Angeles Times "Honest, funny, subjective, unsparing, and passionate. . . A Taste of Power weaves autobiography and political history into a story that fascinates and illuminates." —The Washington Post

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control—from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Taste Makers: Seven Immigrant Women Who Revolutionized Food in America Verso Books

The author sheds light on a little-known chapter of U.S.-Soviet relations, using diaries, memoirs, and letters to recall the efforts of nearly 300 relief workers in easing the suffering of Russians during one of the country's worst famines.

Belarus has emerged from communism in a unique manner as an authoritarian regime. The author, who has lived in Belarus for several years, highlights several mechanisms of tyranny, beyond the regime's ability to control and repress, which should not be underestimated. The book immerses the reader in the depths of the Belarusian countryside, among the kolkhozes and rural communities at the heart of this authoritarian regime under Alexander Lukashenko, and offers vivid descriptions of the everyday life of Belarusians. It sheds light on the reasons why part of the population supports Lukashenko and takes a fresh look at the functioning of what has been called 'the last dictatorship in Europe'.

How modern food helped make modern society between 1870 and 1930: stories of power and food, from bananas and beer to bread and fake meat. The modern way of eating—our taste for food that is processed, packaged, and advertised—has its roots as far back as the 1870s. Many food writers trace our eating habits to World War II, but this book shows that our current food system began to coalesce much earlier. Modern food came from and helped to create a society based on racial hierarchies, colonization, and global integration. *Acquired Tastes* explores these themes through a series of moments in food history—stories of bread, beer, sugar, canned food, cereal, bananas, and more—that shaped how we think about food today. Contributors consider the displacement of native peoples for agricultural development; the invention of Pilsner, the first international beer style; the "long con" of gilded sugar and corn syrup; Josephine Baker's banana skirt and the rise of celebrity tastemakers; and faith in institutions and experts who produced, among other things, food rankings and fake meat.

This invaluable "mentor in your pocket" by three dynamic and successful black female executives will help all black women, at any level of their careers, play the power game—and win. Rich with wisdom, this practical gem focuses on the building blocks of true leadership—self-confidence, effective communication, collaboration, and courage—while dealing specifically with stereotypes (avoid the Mammy Trap, and don't become the Angry Black Woman) and the perils of self-victimization (don't assume that every challenge occurs because you are black or female). Some

leaders are born, but most leaders are made—and *The Little Black Book of Success* will show you how to make it to the top, one step at a time.

The American Relief Expedition to Soviet Russia in the Famine of 1921 Simon and Schuster

BEST BOOK OF THE YEAR: *The New York Times* • *The Washington Post* • *Fortune* • *Bloomberg* From two of America's most revered political journalists comes the definitive biography of legendary White House chief of staff and secretary of state James A. Baker III: the man who ran Washington when Washington ran the world. For a quarter-century, from the end of Watergate to the aftermath of the Cold War, no Republican won the presidency without his help or ran the White House without his advice. James Addison Baker III was the indispensable man for four presidents because he understood better than anyone how to make Washington work at a time when America was shaping events around the world. *The Man Who Ran Washington* is a page-turning portrait of a power broker who influenced America's destiny for generations. A scion of Texas aristocracy who became George H. W. Bush's best friend on the tennis courts of the Houston Country Club, Baker had never even worked in Washington until a devastating family tragedy struck when he was thirty-nine. Within a few years, he was leading Gerald Ford's campaign and would go on to manage a total of five presidential races and win a sixth for George W. Bush in a Florida recount. He ran Ronald Reagan's White House and became the most consequential secretary of state since Henry Kissinger. He negotiated with Democrats at home and Soviets abroad, rewrote the tax code, assembled the coalition that won the Gulf War, brokered the reunification of Germany and helped bring a decades-long nuclear superpower standoff to an end. Ruthlessly partisan during campaign season, Baker governed as the avatar of pragmatism over purity and deal-making over division, a lost art in today's fractured nation. His story is a case study in the acquisition, exercise, and preservation of power in late twentieth-century America and the story of Washington and the world in the modern era—how it once worked and how it has transformed into an era of gridlock and polarization. This masterly biography by two brilliant observers of the American political scene is destined to become a classic.

Widely regarded as the standard book on the British Media, this authoritative introduction to the history, sociology, theory and politics of media and communications studies has been substantially revised and updated to bring it up to date with developments in the media industry. Its three new chapters describe the battle for the soul of the internet, the impact of the internet on society and the rise of new media in Britain. In addition it examines the recuperation of the BBC, how international and European regulation is changing the British media and why Britain has the least trusted press in Europe.

A TALE OF MONEY, TASTE, AND POWER IN TWENTIETH-CENTURY AMERICA

MIT Press

The explicit association between food and status was, academically speaking, first acknowledged on the food production level. He who owned the land, possessed the grain, he who owned the mill, had the flour, he who owned the oven, sold the bread. However, this conceptualization of power is dual; next to the obvious demonstration of power on the production level is the social significance of food consumption. Consumption of rich food—in terms of quantity and quality “was, and is, a means to show one's social status and to create or uphold power. This book is concerned with the relationship between food consumption, status and power. Contributors address the 'old top' of society, and consider the way kings and queens, emperors and dukes, nobles and aristocrats wined and dined in the rapidly changing world of the late eighteenth and nineteenth centuries, where the bourgeoisie and even the 'common people' obtained political rights, economic influence, social importance and cultural authority. The book questions the role of food consumption at courts and the significance of particular foodstuffs or ways of cooking, deals with the number of guests and their place at the table, and studies the way the courts under consideration influenced one another. Topics include the role of sherry at the court of Queen Victoria as a means of representing middle class values, the use of the truffle as a promotional gift at the Savoy court, and the influence of European culture on banqueting at the Ottoman Palace. Together the volume addresses issues of social networks, prestige, politics and diplomacy, banquets and their design, income and spending, economic aims, taste and preference, cultural innovations, social hierarchies, material culture, and many more social and cultural issues. It will provide a useful entry into food history for scholars of court culture and anyone with an interest in modern cultural history.

Since the founding of the United States, culinary texts and practices have played a crucial role in the making of cultural identities and social hierarchies. *A Taste of Power* examines culinary writing and practices as forces for the production of social order and, at the same time, points of cultural resistance. Culinary writing has helped shape dominant ideas of nationalism, gender, and sexuality, suggesting that eating right is a gateway to becoming an American, a good citizen, an ideal man, or a perfect wife and mother. In this brilliant interdisciplinary work, Katharina Vester examines how cookbooks became a way for women to participate in nation-building before they had access to the vote or public office, for Americans to distinguish themselves from Europeans, for middle-class authors to assert their class privileges, for men to claim superiority over women in the kitchen, and for lesbian authors to insert themselves into the heteronormative economy of culinary culture. *A Taste of Power* engages in close reading of a wide variety of sources and genres to uncover the intersections of food, politics, and privilege in American culture.

How the FBI and the Chicago Police Murdered a Black Panther *A Taste of Power* A Black Woman's Story

A “provocative and deeply reported look into the emerging field of deradicalization” (*Esquire*), told through the stories of former militants and the people working to bring them back into society, from National Book Award and Pulitzer Prize finalist Carla Power What are the roots of radicalism? Journalist Carla Power came to this question well before the January 6, 2021, attack in Washington, D.C., turned our country's attention to the problem of domestic radicalization. Her entry point was a different wave of radical panic—the way populists and pundits encouraged us to see the young people who joined ISIS or other terrorist organizations as simple monsters. Power wanted to chip away at the stereotypes by focusing not on what these young people had done but why: What drew them into militancy? What visions of the world—of home, of land, of security for themselves and the people they loved—shifted their thinking toward radical beliefs? And what visions of the world might bring them back to society? Power begins her journey by talking to the mothers of young men who'd joined ISIS in the UK and Canada; from there, she travels around the world in search of societies that are finding new and innovative ways to rehabilitate former extremists. We meet an American judge who has staked his career on finding new ways to handle terrorist suspects, a Pakistani woman running a game-changing school for former child soldiers, a radicalized Somali American who learns through literature to see beyond his Manichean beliefs, and a former neo-Nazi who now helps disarm white supremacists. Along the way Power gleans lessons that get her closer to answering the true question at the heart of her pursuit: Can we find a way to live together? An eye-opening, page-turning investigation, *Home, Land, Security* speaks to the rise of division and radicalization in all forms, both at home and abroad. In this richly reported and deeply human account, Carla Power offers new ways to overcome the rising tides of extremism, one human at a time.

Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled “*The Influence of Sea Power Upon History*.” The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.
