Yearbook 2018 Cambridge University Press

What is innovation and how should it be measured? Understanding the scale of innovation activities, the characteristics of innovative firms and the internal and systemic factors that can influence innovation is a prerequisite for the pursuit and analysis of policies aimed at fostering innovation.

Anti-Corruption Regulation Cambridge University Press

The original essays in this book address the influential writings of Peter A. French on the nature of responsibility, ethics, and moral practices. French's contributions to a wide spectrum of philosophical discussions have made him a dominant figure in the fields of normative ethics, meta-ethics, applied ethics, as well as legal and political philosophy. Many of French's deepest insights come from identifying and exploring the scope and nature of moral responsibility and human agency as they appear in actual events, real social and cultural practices, as well as in literature and film. This immediacy renders French's scholarship vital and

accessible to a wide variety of audiences. The authors, recognized for their own contributions to the understanding of the nature of morality and moral practices offer new and unique positions while exploring, expanding and responding to those of French. The final chapter is written by French, in which he provides both new philosophical insight as well as some reflection on his own work and its influence. This book will appeal to philosophers, as well as advanced students and researchers in the humanities, social sciences, law, and political science.

Organizational Risk Management and

Sustainability GRIN Verlag

This book is a comprehensive, road-tested framework for managing Corporate Social Responsibility (CSR) based on years of award winning performance in senior management roles in a multinational business. The author shows why non-financial performance indicators are just as important as financial ones when it comes to delivering performance and securing long term shareholder value. CSR is not window dressing, it is not a tiresome box ticking exercise and it is not a cost centre. Done properly, CSR is a cost-saving, simple everyday process that adds value to your business. While most companies already have suitable founding values and have carried out some basic CSR measures, many lack the systematics for managing the issue holistically across the business. Beginning with a CSR briefing paper for managers new to the area (or for providing to senior management who may need convincing) *Managing Corporate Responsibility in the Real World* goes on to provide a fully integrated framework for delivering a corporate responsibility programme in your organization. Drawing on real world examples and stories, Jouko Kuisma shows how to start with the political practicalities of setting up an internal steering group to analysis of your firm's value chain and management principles before drawing up an action plan and set of performance criteria on which to be measured.

Business Ethics: Ethical Decision Making and Cases Springer

Bachelor Thesis from the year 2017 in the subject Business economics - General, grade: 1,2, University of Applied Sciences Dresden, language: English, abstract: ISO 19600 is an international standard issued by the International Organization of Standardization (ISO) that aims at supporting organizations worldwide in introducing good compliance measures and maintain integrity. The standard was published in December 2014 and has received both praise and criticism, but no in-depth analysis of its effectiveness. This paper is set out to further analyze the approach offered by ISO 19600 towards compliance. It is supposed to assist cooperations in their decision whether or not to use ISO 19600 as their sole or main resource in implementing good compliance measures within their organization. The research question of this thesis could thus be stated as follows: How effective are the measures suggested by ISO 19600 in ensuring good compliance in a cooperation? The term „effectiveness“ is defined by the Oxford dictionary as "[t]he degree to which something is successful in

producing a desired result". Therefore, this thesis is going to analyze the degree to which ISO 19600 is successful in producing the desired result of preventing compliance violations in cooperations. The research is based on findings of studies on compliance as well as the suggestions in popular literature on the topic and opinions voiced by various economists and organizations upon the release of ISO 19600 itself. By comparing those with the suggestions made in ISO 19600 it is possible to assess the standard's potential effectiveness when it is utilized by a cooperation. Note that ISO 19600 is aimed at all kinds of organizations including non-profit organizations and governmental institutions. The focus of this thesis lies on private, profit-driven enterprises, but most of the thesis' findings apply to other types of organizations as well.

Florence Thépot provides the first systematic account of the interaction between competition law and corporate governance. She challenges the 'black box' conception of the firm- or 'undertaking' - in competition law, as applied to increasingly complex corporate relations. The book opens the 'black box' of the firm to understand the internal drivers of collusive behaviour, and proposes a unified approach to cartel enforcement, based on the agency theory. It explores key issues including corporate compliance programmes, the attribution of liability in corporate groups, and structural links between competitors, and should be read by anyone interested in how the evolution of the corporate landscape impacts competition law.

Compliance has become key to our contemporary markets, societies, and modes of governance across a variety of public and private domains. While this has stimulated a rich body of empirical and

practical expertise on compliance, thus far, there has been no comprehensive understanding of what compliance is or how it influences various fields and sectors. The academic knowledge of compliance has remained siloed along different disciplinary domains, regulatory and legal spheres, and mechanisms and interventions. This handbook bridges these divides to provide the first one-stop overview of what compliance is, how we can best study it, and the core mechanisms that shape it. Written by leading experts, chapters offer perspectives from across law, regulatory studies, management science, criminology, economics, sociology, and psychology. This volume is the definitive and comprehensive account of compliance.

Measuring Compliance Springer

In the current business climate the impact of the volume and nature of regulatory change and the regulatory risk arising from this is a significant business risk for regulated firms and regulators alike. As a consequence, management of this risk is increasingly high on the board agenda of regulated firms, with those business functions whose activities support this, such as Compliance, facing increasing levels of challenge in their efforts to be effective. The Changing Face of Compliance addresses core aspects of this challenge, considering the relationship between regulation and compliance and key influences on both, offering insight into the effectiveness of current approaches and addressing practical compliance challenges. Sharon Ward

explains how the role of Compliance might be strengthened and those who work within it further enabled to support the current focus on improving standards in business, offering recommendations for enhancing this role. The text includes a mix of hands-on advice, examples and research based on the experiences of practitioners, educators and regulators drawn from across a wide range of jurisdictions and sectors. This is a thoughtful and timely book, whether you are concerned about the growing and changing implications of regulatory risk; the benefit of leveraging additional value from your Compliance function or your own Compliance role; or ways of transforming and sustaining the function to ensure its continued relevance to the business.

Reconceptualising Global Finance and its Regulation Springer

International Business Law and the Legal Environment provides business students with a strong understanding of the legal principles that govern doing business internationally. Not merely about compliance, this book emphasizes how to use the law to create value and competitive advantage. DiMatteo’s transactional approach walks students through key business transactions—from import and export, contracts, and finance to countertrade, dispute resolution, licensing, and more—giving them both context and demonstrating real world application. This new edition also includes: New material on comparative contract and sales law & European private law; joint ventures and collaborative alliances. A new part on foreign direct investment that includes a chapter on emerging markets. New chapters on privacy law, and on environmental concerns. Greater coverage of the World Trade Organization. "Case highlights" and court opinions that feature edited court transcripts which expose students to actual legal reasoning and an understanding of the underlying legal principles. These decisions are drawn from a broad range of countries, offering a truly international look at the subject. Students of business law and international business courses will find DiMatteo’s clear writing style easy to follow. A companion web site includes an instructor’s manual, PowerPoints, and other tools to provide additional support for students and instructors.

In the modern world, solid and liquid waste deposits are mounting due to increasing populations and wealth. Businesses are therefore being put under pressure to pay attention to the environmental and resource consequences of the products they produce and the services they deliver. The Circular Economy and Its Implications on Sustainability and the Green Supply Chain is a collection of innovative research on methods of extending biological cycles found in nature to technological cycles where goods, when disposed properly, are converted into new products in an environmentally efficient way. It examines current research on how to deal with the waste resulting from human activities, the relationship between environmental and human health, and international legislation on waste management. This book is ideally designed for economists, managers, practitioners, academicians, researchers, and students.

Implementation of Anti-Money Laundering Information Systems

Routledge

This book guides readers through the broad field of generic and industry-specific management system standards, as well as through the arsenal of tools that are needed to effectively implement them. It covers a wide spectrum, from the classic standard ISO 9001 for quality management to standards for environmental safety, information security, energy efficiency, business continuity, laboratory management, etc. A dedicated chapter addresses international management standards for compliance, anti-bribery and social responsibility management. In turn, a major portion of the book focuses on relevant tools that students and practitioners need to be familiar with: 8D reports, acceptance sampling, failure tree analysis, FMEA, control charts, correlation analysis,

designing experiments, estimating parameters and confidence intervals, event tree analysis, HAZOP, Ishikawa diagrams, Monte Carlo simulation, regression analysis, reliability theory, data sampling and surveys, testing hypotheses, and much more. An overview of the necessary mathematical concepts is also provided to help readers understand the technicalities of the tools discussed. A down-to-earth yet thorough approach is employed throughout the book to help practitioners and management students alike easily grasp the various topics.

The Transnationalization of Anti-Corruption Law Springer Nature

The Interaction Between Competition Law and Corporate Governance Kluwer Law International B.V.

Based on the first edition with extensive analysis of practical applications of environmental risk management and compliance management systems, this second edition of *International Environmental Risk Management* reflects updates made in the understanding and application of risk management best practices and makes available a frame of reference and systematic approach to

environmental and social governance (ESG). It provides a pathway for readers to implement environmental management strategies that can be integrated with core operations and other risk management efforts, including supporting sustainability and corporate social responsibility initiatives associated with climate change, the circular economy or supply chain conditions, as well as enterprise risk management; anti-bribery, and other compliance management systems. This book provides in-depth discussions of ways to use global environmental management standards. New features in this edition: Combines EMS standards with discussion of specific principles, other authors' research, and guidelines on management practices. Provides guidelines on how to prepare for, anticipate, and resolve environmental issues. Includes easily understandable information for all readers and is not simply aimed toward individuals who are knowledgeable about this topic. Provides in-depth discussions on using global environmental management standards to manage risk and promote resilience, as well as legal strategies and voluntary initiatives that companies can utilize to minimize risk. Accounts for the substantive revisions in ISO 14001:2015. As a growing and rapidly changing field, it is necessary to address new issues, guidelines, and regulations to assist businesses, academia, students, consultants, lawyers, and environmental managers with a pragmatic resolution to environmental risk management issues. This second edition gives a broad and detailed analysis of the changes made to international standards and practices and serves as an excellent guide to managing environmental risk.

THEORY AND PRACTICE

Cambridge University Press

This handbook is the first resource to provide a scientific analysis of the nature of compliance. It examines the subject from such crucial and varied perspectives as ethics, behavioral science, risk management, accounting, and European and international law. Much more than a critical approach to the existing practice of supervision, it provides a wealth of information, guidance, and valuable insights for the day-to-day work of compliance officers. With chapters contributed by lecturers of VU University Amsterdam's flourishing post-doctoral Executive Master Program in Compliance and Integrity Management - which fosters alternatives such as greater trust in self-regulation and market discipline - the book explores such aspects of compliance and integrity management as the following: • monitoring risk compliance and integrity; • stakeholder and reputation management; • conflicts of interest; • anti-bribery; • export controls; • extraterritorial jurisdiction of U.S. legislation; • fraud; • duty of care; • market abuse; • privacy; and • competition. The analysis throughout is supported by a comprehensive study of the literature concerning the *raison d'être* of supervision and regulation. Meeting the need for an in-depth analysis of the expanding field of compliance and integrity management, this book is a milestone in a field that is rapidly growing in importance across a wide spectrum of business and professional activity. It will prove an essential practical resource for company or institutional officers worldwide in setting up a compliance function in their organization. Well known as a consultant in compliance-related matters, Sylvie C. Bleker-van Eyk is currently Senior Director at PricewaterhouseCoopers Forensic Services, Chair of the Supervisory Committee on Monitoring Anti-Money Laundering Policy at WODC, the Research and Documentation Centre of the Netherlands Ministry of Security and Justice, and Professor and Program Director of Postgraduate Education in Compliance and Integrity Management at VU University Amsterdam. Raf A. M. Houben is Head of Compliance and Security at HDI Global SE-The Netherlands in Rotterdam, and program coordinator

and lecturer at the same Postgraduate Education in Amsterdam.
