"A collectible volume for
graphic designers and
creative entrepreneurs,
this book is dedicated to
"Color Library," one of the
most discussed projects in

the field of graphic design
of the last few years. An
investigation into color
reproduction and printing,
"Color Library" is a tool for
artists, designers,
photographers, and
printers. It aims to widen
the possibilities of color
printing, and reflects on
our contemporary
perception of color as it is
shaped by the recent

developments in print
production. Primarily
conceived as a digital
platform, "Color Library"
offers a variety of
colorimetric profiles
automatically applicable
to images, based on color
combinations generated
according to their
perceptual, technical, and
conceptual relevance. It
not only offers an

alternative to standard color printing, but also affirms a distinctive vision of how to print colors and process them" (Verlagshomepage).
