On the afternoon of September 14, 1786, two French ships appeared off the coast of Monterey, the first foreign vessels to visit Spain's California colonies. Aboard was a party of eminent scientists, navigators, cartographers, illustrators, and physicians. For the next ten days the commander of this expedition, Jean François de La Pérouse, took detailed notes on the life and character of the area: its abundant wildlife, the labors of soldiers and monks,

and the customs of Indians recently drawn into the mission. These observations provide a startling portrait of California two centuries ago.

Linden Publishing  
Indigenous Landscapes and Spanish Missions offers a holistic view on the consequences of mission enterprises and how native peoples actively incorporated Spanish colonialism into their own

landscapes. An innovative reorientation spanning the northern limits of Spanish colonialism, this volume brings together a variety of archaeologists focused on placing indigenous agency in the foreground of mission interpretation. *The Ohlone Way* Heyday. ORIM  
This copious collection of reminiscences, reports, letters, and documents allows readers to experience the vast and varied landscape of early California from the viewpoint of its inhabitants. What emerges is not the Spanish California depicted by casual visitors—a culture obsessed with finery, horses, and fandangos—but an ever-shifting world of aspiration and tragedy, pride and loss. Conflicts between missionaries and soldiers, Indians and settlers, friends and neighbors spill from these pages, bringing the ferment of daily life into sharp focus.

A Cross of Thorns challenges this mythologized history and presents the facts of the Spanish occupation of California, describing the dark and cruel reality of Mission life. Beginning in 1769, California Indians were enticed into the

missions, where they and their descendents were imprisoned for 60 years of forced labor and daily beatings. The chilling depictions of colonial cruelty in *A Cross of Thorns* are based on little known church and Spanish government archives and letters written by the founder of California's mission, Friar Junipero Serra (who advocated the whipping of Mission Indians as a standard policy), and published first-hand accounts of 18th and 19th century travelers.

### **Life in a California Mission** Turtleback Books

The story of the missions is a compelling human drama that is a vital piece not only of California history, but also of American history. Indeed, many keys to California's past lie in the stories of the 20 missions that stretch along the state's west coast from San Diego to San Francisco. This vital series is compatible with the mission-based curriculum used in fourth-grade California classrooms. It resonates equally with all social studies programs that explore the defunct notion of colonialism and its controversial role in the history of the United States, and with curricula that seek to explore the interaction of different

cultures and the rights and voices of indigenous peoples.

Audie Award Finalist for best inspirational book! IMAGE AWARD (Native Daughters of the Golden West) "The Mission Walker is a marvelous book, a moving meditation on the relationships between courage and faith, endurance and transcendence."

Randall Sullivan, Creator, The Miracle Detective, Oprah Winfrey Network (OWN) Have you ever wanted to just start walking, and never ever stop? To leave behind "WHO I AM" to find "WHO I AM." Walking alone, and with one lung (the other lost to cancer), Edie Littlefield Sundby became the first person in history to walk the 1,600-mile El Camino Real de las Californias mission trail through the mountain wilderness of Mexico and one of the hottest deserts on earth, and across the border to Northern California - a walk that elevated her life with meaning and purpose that transcended pain and fear - and healed her broken body. THE MISSION WALKER is a first-hand account of harrowing adventure along the old Jesuit mission trail in Baja California Mexico -- desert heat and cold, walls of cactus, sleeplessness, hunger, both physical and spiritual exhaustion, the dangers of wild creatures, and encounters with drug smugglers and weeks with no water other than what a pack mule could carry; and the tortuous agony and transcendent beauty of walking the northern half of the mission trail through California, a trek Edie made six months after losing her right

lung to cancer - a journey that restored health and spirit after fighting recurrent stage 4 cancer, including 79 rounds of chemotherapy, four radical surgeries (liver, lung, colon/stomach, and throat), and dozens of radiation treatments. Edie's story is both an adventure story and a reflection on the universal experience of confronting our own mortality. It is a story of what we will do when faced with the potential end of our life. What do we do with our time left on earth. And how much do we still really, truly want to live. The book cites more than 50 original historical sources and captures the untamed wilderness adventure experienced for centuries along the old Jesuit and Franciscan mission trail that unites California and Mexico and defines the Old West. For those who crave a spirit of adventure, who ache like Edie to know what our bodies and spirits are truly capable of, this book is a must-read. A true testament to faith, courage, and the power of hope. Editorial Reviews: "Edie Sundby's account of her amazing trek along the entirety of the 1,600-mile California Mission Trail is not only captivating and inspiring but also one heck of an outdoors

adventure." Les Standiford, Author and Historian "This powerful story of determination and faith will stay with you forever." Ken Budd Journalist/Author "... a gripping narrative that takes us through the author's harrowing journeys, inward and outward." JoBeth McDaniel Journalist/Author "The Mission Walker is a marvelous book, a moving meditation on the relationships between courage and faith, endurance and transcendence." ### **MISSION SAN DIEGO DE ALCALÁ**

UNC Press Books

This book is a compelling and balanced history of the California missions and their impact on the Indians they tried to convert. Focusing primarily on the religious conflict between the two groups, it sheds new light on the tensions, accomplishments, and limitations of the California mission experience. James A. Sandos, an eminent authority on the American West, traces the history of the Franciscan missions from the creation of the first one in 1769 until they were turned over to the public in 1836. Addressing such topics as the singular theology of the missions, the role of music in bonding Indians to Franciscan

enterprises, the diseases caused by contact with the missions, and the Indian resistance to missionary activity, Sandos not only describes what happened in the California missions but offers a persuasive explanation for why it happened.

Recovering lost voices and exploring issues intimate and institutional, this sweeping examination of Spanish California illuminates Indian struggles against a confining colonial order and amidst harrowing depopulation. To capture the enormous challenges Indians confronted, Steven W. Hackel integrates textual and quantitative sources and weaves together analyses of disease and depopulation, marriage and sexuality, crime and punishment, and religious, economic, and political change. As

colonization reduced their numbers and remade California, Indians congregated in missions, where they forged communities under Franciscan oversight. Yet missions proved disastrously unhealthful and coercive, as Franciscans sought control over Indians' beliefs and instituted unfamiliar systems of labor and punishment. Even so, remnants of Indian groups still survived when Mexican

officials ended Franciscan rule in the 1830s. Many regained land and found strength in ancestral cultures that predated the Spaniards' arrival. At this study's heart are the dynamic interactions in and around Mission San Carlos Borromeo between Monterey region Indians (the Children of Coyote) and Spanish missionaries, soldiers, and settlers. Hackel places these local

developments in the context of the California mission system and draws comparisons between California and other areas of the Spanish Borderlands and colonial America. Concentrating on the experiences of the Costanoan and Esselen peoples during the colonial period, Children of Coyote concludes with an epilogue that carries the story of their survival to the present day.
