Raymond Gunt likes to think of himself as a pretty decent guy—he believes in karma, and helping his fellow man, and all that other good stuff. Sure, he can be foulmouthed, occasionally misogynistic, and can just generally rub people the wrong way—through no fault of his own! So with all the positive energy he's creating, it's a little perplexing to consider the recent downward spiral his life has taken...Could the universe be trying to tell him something? A B-unit cameraman with no immediate employment prospects, Gunt decides to accept his ex-wife Fiona's offer to shoot a Survivor-style reality show on an obscure island in the Pacific. With his upwardly failing sidekick, Neal, in tow, Gunt somehow suffers multiple comas and unjust imprisonment, is forced to reenact the "Angry Dance" from the movie Billy Elliot, and finds himself at the center of a nuclear war—among other tribulations and humiliations. A razor-sharp portrait of a morally bankrupt, gleefully wicked modern man, *Worst. Person. Ever.* is a side-splittingly funny and gloriously filthy new novel from acclaimed author Douglas Coupland. A deeply unworthy book about a dreadful human being with absolutely no redeeming social value, it's guaranteed to brighten up your day. Divorce Is the Worst Holiday House
What's the worst thing you can do to Shakespeare? The answer is

simple: don't read him. To that end, Richard Burt and Julian Yates embark on a project of un/reading the Bard, turning the conventional challenges into a roadmap for textual analysis and a thorough reconsideration of the plays in light of their absorption into global culture.

The Worst Class in the World Gets Worse ABRAMS

Nobody knew adversity like King David. He was called and anointed to reign in life, and yet he had to find a way in God to keep from losing it all. In *What to Do on the Worst Day of Your Life*, Brian Zahnd looks into the life of David to discover a pattern of faith we can apply to overcome life's daunting obstacles. In David's story we find a timeless model for how to encounter God's restorative power in the midst of deep tragedy. Join Brian Zahnd, and see what David did on his worst day. You'll see David weep but not get bitter. You'll see him reorient his vision and regain his passion. All along the journey you'll be reminded that God's great work in David's life was not an odd, one-off miracle but a pattern of faith for all who are facing the worst day of their life.

Mindset, Attitude, and Perception. These three things define the quality of our lives, and sometimes, you may be compelled to read about them. This is a self-help book that is desperately trying not to be a self-help book. Featuring wisdom from people far smarter than the author (such as Phil Spencer, Head of Xbox), it's about how we can all find and create purpose in our lives. If

you are looking for something that makes you feel invincible, please do not read this, as we talk about our mortality at least ten times. But, if you're looking for something that just might give you a new outlook on the world... dive in, and get ready to create ripples.

It started with a ring. A cheap ring. The yellow metal said brass, not gold, and the sparkly bits were certainly not diamonds. But the ring belonged to May's horseplaying uncle, who swore it brought good luck. Dortmund, who wouldn't kick a little good luck out of bed, puts it to the test when he goes to burglarize Long Island billionaire Max Fairbanks. As luck would have it, Dortmund is greeted by Fairbanks himself - and a loaded gun - as soon as he strolls through the door. When the cops arrive, the mogul adds insult to injury by claiming that Dortmund's lucky ring is actually his. Big mistake, big guy. As soon as Dortmund can give the cops the slip, the world's most single-minded burglar goes after the fat cat with a vengeance and a team of crooks that only he can assemble. And from the get go everything will go Dortmund's way - everything, that is, except the ring.

Why catastrophic risks are more dangerous than you think, and how populism is making them worse. Did you know that you're more likely to die from a catastrophe than in a car crash? The odds that a typical US resident will die from a catastrophic event—for example, nuclear war, bioterrorism, or out-of-control artificial intelligence—have been estimated at 1 in 6. That's fifteen times more likely than a fatal car crash and thirty-one times more likely than being murdered. In *What's the Worst That Could Happen?*, Andrew Leigh looks at catastrophic risks and how to mitigate them, arguing provocatively that the rise of populist politics makes catastrophe more likely. Leigh explains that pervasive short-term thinking leaves us unprepared for long-term risks. Politicians sweat the small stuff—granular policy details of legislation and regulation—but rarely devote much attention to reducing long-term risks. Populist movements thrive on short-termism because they focus on their followers' immediate grievances. Leigh argues that we should be long-termers: broaden our thinking and give big threats the attention and resources they need. Leigh outlines the biggest existential risks facing humanity and suggests remedies for them. He discusses pandemics, considering the possibility that the next virus will be more deadly than COVID-19; warns that unchecked climate change could render large swaths of the earth uninhabitable; describes the metamorphosis of the arms race from a fight into a chaotic brawl; and examines the dangers of runaway superintelligence. Moreover, Leigh points out, populism (and its crony, totalitarianism) not only exacerbates other dangers but is also a risk factor in itself, undermining the institutions of democracy as we watch.

Capitalism is about to commit suicide and is threatening to take us down with it. But will it give way to a grand social utopia or the

beginning of a new dark age... albeit WiFi enabled? *The Worst is Yet to Come* explores the disturbing possibility that the current crisis of neoliberal capitalism isn't going to spawn an emancipatory renaissance, but a world that is much, much worse. Wealthy CEOs see it. They've been purchasing isolated bunker-retreats in New Zealand for when the shit goes down. Our politicians know it too, and are frantically transforming the liberal state into a militarized machine. Scientists are either uselessly decrying the looming eco-catastrophe or jumping on the opportunity to conduct ever-reckless experiments with the human genome. The animal kingdom is retreating from the scene in terrible silence, preferring the swift demise of the abattoir's bolt-gun than witnessing what is about to happen. Yet some of us are still ignoring the warning signs, choosing instead to remain cheerfully optimistic, believing that society has probably hit rock bottom and the only way is up. This book argues the opposite. What if we haven't hit rock bottom and are on the precipice of something much worse? And what if we're too late? But this grim prospect isn't submitted in the name of millennial fatalism or hopeless resignation. On the contrary, if our grandchildren are to survive the implosion of capitalism – for the chances we will are fairly slim – then a realistic picture of the nightmare to come is crucial. Only an unwavering attitude of “revolutionary pessimism” will help us to prepare accordingly. For the apocalypse will almost certainly be disappointing.
