Over 80 years of UC research plus industry and grower experience and innovation are brought together in this production manual. Covers all aspects of the California system of raisin production from vineyard planting and development, pest management, cultural practices, harvesting, drying, handling, and economic considerations, to inspection and marketing.

Chapters on grapevine physiology, growth and development, fruitfulness, fruit ripening and drying, characteristics, and raisin quality factors reveal the latest in technology and best practices. This 280 page manual is illustrated with 86 color and black and white photographs, 44 tables, and 72 graphs and line drawings. A detailed appendix outlines resources and organizations in the California raisin industry.

*Mergent Moody's Industrial Manual* Reed Reference Publishing by Steve Rendle Aimed at the 3-6 age group, this innovative book brings the Haynes Manual approach, complete with cutaway drawings and illustrated step-by-step guides, to one of the most popular children's TV characters. See how Roary works, what's inside and how his mechanics keep him in tip-top condition. Some of Roary's friends also feature as readers learn more about racing cars and motor racing at the Silver Hatch circuit. This brightly designed book will delight children and parents alike.

*The Yugo* Haynes Publishing

After the closest-fought season in F1 history, Sebastian Vettel became the youngest-ever World Champion. His car, the Red Bull RB6, the work of a team led by legendary F1 designer Adrian Newey, was the envy of the paddock, proving to be consistently faster than its rivals over the season. In this fascinating book, the Red Bull RB6 receives the Haynes Manual treatment, providing an unprecedented insight into the design, technology and engineering of an F1 car as well as the inner workings of Red Bull

Racing.

### MERGENT INDUSTRIAL MANUAL

Haynes Publishing UK

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

### RAISIN PRODUCTION MANUAL

Haynes Manuals

At a time when the issue of human rights in Africa is making many advances, Human Rights Sourcebook and Manual for Africa introduces easy-to-use jurisprudence. The first section covers key principles and human rights norms which are detailed in straightforward language. The second section is devoted to the death penalty, detailing the relevant provisions from both international and regional instruments and offering a comparative commentary as to how the principles and relevant rights relate to the death penalty. The third section summarizes key case law from international, regional and domestic African courts and tribunals. The case summaries detail the facts and decisions and include a headnote of relevant concepts for quick reference. The fourth section focuses on thirteen African countries, yet the reports are a useful comparative resource for all countries. From conducting the research and compiling the material for this final section, it is apparent that nothing like this has been attempted before in Africa. Much of the work emanates from primary research and investigation conducted by local research teams in the individual countries. Investigative research includes visiting prisons, physically counting the individuals on death row and

interviewing the detainees to obtain their age and the length of time they had been on death row.
