Excerpt: Conscious, Subconscious and Superconscious The mind in action is conscious, subconscious and superconscious. We are aware of all conscious activity. We are aware of some subconscious activities expressed in our dreams, mingled with our conscious mentation, and in the functional operations of our bodies. The vast part of subconscious activity never rises to the plane of consciousness. We know superconscious activity as it expresses in our dreams, in a vision, and consciously as a special illumination. The superconscious must express all its operations in symbolism, symbols

created by the conscious and subconscious. Apart from these symbols, we cannot intelligibly describe the things known in superconscious. We may cease to be conscious of the feelings and experiences of life anytime because of the weakness of their individual elements, because the connection between them ceases, or because sleep or some artificial hypnotic inhibits them. They continue unconsciously until the inhibition passes or else the activities of life break down the body because of lack of conscious oversight. A physical stimulus may take effect without any sensation, as when food arrives in the stomach, exciting the flow of gastric juice, starting peristaltic motion, and starting the liver and pancreas. Yet we are aware only of the mechanical part of

this process, the chewing and swallowing, and the general feeling of satisfaction that results. We may have ideas and experiences of which we are, at the time, largely unconscious. For instance you may be unconsciously in love. You do not know it. However, everyone else does, and eventually it emerges into your consciousness. Memory furnishes another field in which to observe the action of the conscious and the subconscious. Memory reproduces mental images of experiences and ideas. These seem to be lost, but we store up their impressions. Often they spring up spontaneously, at other times we recall them by a little conscious effort and association, while very often they refuse to come into consciousness no matter

how much we may try to recall them. Then we resort to the time-honored device of turning the attention to other things, and a subconscious trigger causes the memory-image to emerge into mental view. We often study some problem, gather a mass of facts about it, attempt to set them in order, and the conscious effort ends in confusion and disorder. When we abandon the conscious effort, the subconscious, which has been at work all the time, has a chance to project into consciousness a perfect plan or outline of the subject, which is a logical deduction from the main facts. If we fail to solve a problem, we lie down to sleep, and in the dream state the subconscious can reveal the solution, which it has already grasped. www.lifetransformationpublishing.com

A groundbreaking investigation of the brain's hidden logic behind our strangest behaviors, and of how conscious and unconscious systems interact in order to create our experience and preserve our sense of self. From bizarre dreams and hallucinations to schizophrenia and multiple personalities, the human brain is responsible for a diverse spectrum of strange thoughts and behaviors. When observed from the outside, these phenomena are often written off as being just "crazy," but what if they were

actually planned and logical? NeuroLogic explores the brain's internal system of reasoning, from its unconscious depths to conscious decision making, and illuminates how it explains our most outlandish as well as our most stereotyped behaviors. From sleepwalking murderers, contagious yawning, and the brains of sports fans to false memories, subliminal messages, and the secret of ticklishness, Dr. Eliezer Sternberg shows that there are patterns to the way the brain interprets the world—patterns that fit the brain's unique logic. Unraveling these patterns and the various ways they can be disturbed will not only alter our view of mental illness and supernatural experience, but will also shed light on the hidden parts of ourselves. black-and-white illustrations throughout.)

In this book, Atkinson keeps his incredible insight on the human mind, analyzing every possible aspects of the subconscious mind, memory, habits and others; to arrive to what he calls the superconscious, where all those "possibilities of activities as yet not generally unfolded into actual manifestation" are in storage."We have seen that in the Infra Conscious region of

the mind there are certain activities which seem to be outside of the category of those which belong strictly to the subconscious-activities which cannot be considered as resulting from the past race or individual experience along the lines of racial memory or heredity, or of the memory of the individual-and yet which do not fit into the category of the "parallel" activities which we have classified as "the psychic." In short these activities seem rather to belong to a higher rather than a lower or even parallel plane of consciousness. The Orientals for centuries have recognized these activities and have classified them as belonging to the "superconscious" plane of mentation-a plane above the ordinary plane of consciousness, just as the

subconscious is a plane below it, and the "psychic" plane parallel to it. The superconscious plane is a plane of "above consciousness," just as the subconscious is a plane "below consciousness."How to develop and unfold the superconscious: that is what Atkinson will try to teach to the minds that are prepared.

IntroBooks

“A must-read for anyone interested in incorporating meditation into their lifestyle.” --Sanjay Gupta, MD, chief

medical correspondent for CNN
Heartfulness is an ideal, a spiritual way of living by and from the heart that is inclusive of all ideologies, beliefs, and religions. In this heart-centered book, a student in conversation with his teacher, Kamlesh D. Patel—affectionately known as Daaji, the fourth and current spiritual guide of the century-old Heartfulness tradition—present a unique method of meditation with the power to facilitate an immediate, tangible spiritual experience, irrespective of a person’s faith. Our modern, fast-paced world can be an overwhelming place. Every day, we’re bombarded with messages telling us that in order to be happy, fulfilled, and worthy, we must be better, do more, and accumulate as much material wealth as possible. Most of us move

through our busy lives with our minds full of these ideas, multitasking as we strive to navigate the responsibilities and expectations we must meet just to make it through the day. But what if there is another way? What if, rather than letting the busyness of life overtake our minds, we learn to be heartfelt instead? Based on Daaji's own combination of approaches and practices for the modern seeker—which draws from the teachings of Sahaj Marg, meaning “Natural Path”—Heartfulness is a contemporized version of the ancient Indian practice of Raja Yoga, a tradition that enables the practitioner to realize the higher Self within. While many books describe refined states of being, *The Heartfulness Way* goes further, providing a pragmatic course to experience those

states for oneself, which, per the book's guiding principle, is “greater than knowledge.” Heartfulness meditation consists of four elements—relaxation, meditation, cleaning, and prayer—and illuminates the ancient, defining feature of yogic transmission (or pranahuti), the utilization of divine energy for spiritual growth and transformation. Using the method, detailed practices, tips, and practical philosophy offered in this book, you'll reach new levels of attainment and learn to live a life more deeply connected to the values of the Heartfulness way—with acceptance, humility, compassion, empathy, and love.

The term subconscious reflects an

etymological root of the French subconscious as introduced by the renowned psychologist Pierre Janet (1859–1947), who claimed that a strong perception lay beneath the layers of the conscious mind's critical-thought mechanisms that he labeled the subconscious mind. The adjective is described in the strict psychological perception as functioning or appearing outside the territory of consciousness. Edwin A. Locke and Amy L. Kristof reiterate that there is a restriction to what can be kept in conscious contextual memory. It needs an alternate warehouse of one's knowledge and past experience, which they classify as the subconscious. In 1893, Sigmund Freud interpreted the word subconscious to characterize thoughts and desires which

are not available to one's conscious frame of mind. However, he discarded the term in preference to the unconscious. Peter Gay suggests that the application of the word subconscious where the unconscious is intended to be a uniform and revealing error is construed as another school of thought that has also been duly recognized.

If only you can tap into the invisible powers of your mind, you will achieve 80% to 90% of your goals and become much more successful. Each and every year, many people set new resolutions, hoping that things will change in the course of the year. But here is the fact: if you don't make changes in your mind, there will be no changes in life. From

childhood, we have been programmed. Our life is a reflection of our old conditioning and programming. We set goals, dream dreams and declare bold visions, but they never come to reality. The road to success is not in setting goals, but rather understand what your old programming and the reprogramming your mind to live the life you desire to live. If you don't take advantage of your mind, your chances of reaching your personal and professional goals will be very low. But if you take control of your mind, understand what your past condition, remove all the old files that are causing you to repeat the cycles of failure and struggle, you will see yourself moving closer to success like it has never happened before. In this book, you will learn hidden secrets about

the mind and how to make it work for you. The conscious, subconscious and super conscious parts of the mind have their role to play in your success. If you understand how your subconscious works and operates, you can be able to use it to get what you want in your life. The super conscious mind is the silent part of the mind, irrational and nonjudgmental, but the effects of it are astronomical. Learning how we have been programmed since childhood by society to fail will move you out of any cycle of failure and frustration you are going through. By leveraging the power of the super conscious mind, you will receive insights and ideas to achieve any goal you. Not only will you achieve your goals, but you will also develop a growth mindset which will catapult you to even

higher realms of success. One of the habits of highly successful people are setting and achieving goals. Most people set goals, but most of them go un-achieved. You don't want to just set goals, but get them achieved. By discovering the same secret goal setting formula successful people used to set and achieve any goal, you will be far ahead of your peers in reaching success because you know how to get what you want. Inside you will find: * How the mind works and how to gain control over it * How the conscious, subconscious and super conscious part interrelates * The power of mindset influences our success in life * What set highly successful people apart from the failures in life * Understand the reason why you are still struggling and how developing a growth

mindset can help get to the next level * The mystery behind the subconscious mind * How to reprogram your subconscious And much more....

This book is about the family of the mindthe conscious (mother and revealed), subconscious (child and magical), and superconscious (Universal Master Mind)and the relative symbols and signs in Hindu mythology. The author calls upon ancient Persian epic poetry, and a correlation between Persian, Armenian cultural Heroes and a Hindu Mythology. And there is even some touch of Native American belief. Readers will learn about the individual souls journey, how it relates to the eternal spirit, and how there is a drop of that eternal spirit within each of us. The reader will also learn about the importance of kundalini energy, a primordial energy recognized by yogis since ever, and its physical and emotional role in healing, as an

extension to our mind family. And the yogic Treasure Island, the astral and light body map recalled with its original Sanskrit terminology for a full energetic benefit. But the starthe protagonistof this book, and of our personal journey, and evolution, is our inner tender child. As we have grown up, we have disconnected from this main source of joy and love, and have forgotten and wounded this important part of our being. Therefore, we are being hurt! Only when we acknowledge, remember, embrace, come home to, and heal our inner children from the inside out, our powerful cosmic children (Inner Cherub & Cupids) will write a new destiny full of happiness so we may live with peace and joy and spread the light all around. We can be the cocreators of our happily

ever after tale.

This eBook edition of "The Subconscious & The Superconscious Planes of Mind" has been formatted to the highest digital standards and adjusted for readability on all devices. Extract: "The great problems of modern psychology are found to consist largely of the phenomena of the

mental operations and activities on planes other than those of ordinary consciousness. While the terminology of the subject is still in a state of transition, nevertheless certain terms have sprung into common use and are employed tentatively by those who write and teach of these wonderful regions of the mind."

William Walker Atkinson (1862-1932) was a prolific writer. His works treat themes related to the mental world, occultism, divination, psychic reality, and mankind's nature. They constitute a basis for what Atkinson called "New Psychology" or "New Thought".

The subconscious mind is a huge repository system, and it does not know what reality is, other than what you tell it. Then it will repeat those thoughts, beliefs, patterns, and create your outer reality. Everything starts with a thought. So what did you tell your subconscious, especially when you were young? I had allowed others to program me—my parents, teachers, churches, governments, society. The subconscious then created aspects, sub-personalities that developed their own view of reality.

Do you remember every decision that you made and thought was real? I didn't, yet one decision I did when I was twenty months affected me until I was about forty-seven years old. That decision was "I can't do what I want." I kept being blocked by my own subconscious mind because of what I had told it. There are many other examples in the book of how decisions can affect life, decisions about money, relationships, intimacy, weight /diets, diseases, cancer, arthritis, fibromyalgia, anxieties, depression, etc. I hope you find some answers by reading this book.

How to awaken the Ureaus--the serpent power of spiritual transcendence within each of us--and connect to the

superconscious of the universe • Reveals the biochemistry of how the body's melanin provides the template for the subtle energy body or light body • Shows how embracing the dark light consciousness of the awakened Ureaus opens a portal to the sacred darkness of the superconscious • Provides illustrated instructions for meditation practices, breathing exercises, and yoga postures to safely awaken Ureaus/Kundalini energy Within each of us lies the potential to activate a personal connection to the superconscious. Called "Ureaus" in ancient Egyptian texts and "Kundalini" in ancient Hindu yoga traditions, our innate serpent power of spiritual transcendence inhabits the base of the spine in its dormant state. When awakened, it unfurls along the spinal

column to the brain, connecting individual consciousness to the consciousness of the universe enfolded within the dark matter of space. At the root of creativity and spiritual genius across innumerable cultures and civilizations, this intelligent force reveals portals that enfold time, space, and the luminous matrix of reality itself. Combining physics, neuroscience, and biochemistry with ancient traditions from Africa and India, Edward Bruce Bynum, Ph.D., explores the ancient Egyptian science of the Ureaus and reveals how it is intimately connected to dark matter and to melanin, a light-sensitive, energy-conducting substance found in the brain, nervous system, and organs of all higher life-forms. He explains how the dark light of melanin serves as the biochemical

infrastructure for the subtle energy body, just as dark matter, together with gravity, holds the galaxies and constellations together. With illustrated instructions, he shows how to safely awaken and stabilize the spiritual energy of the Ureaus through meditation practices, breathing exercises, and yoga postures as well as how to prepare the subtle body for transdimensional soul travel. By embracing the dark light of the shining serpent within, we overcome our collective fear of the vast living darkness without. By embracing the dark, we transcend reality to the dimension of light.
