Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations. However, many of these new traders lose their money in attempting to do so. The reason for this is often because these new traders lack any fundamental understanding of financial markets, they cannot interpret any data, and they have no strategy for trading. Trading in markets is really about deploying strategies and managing risks. Indeed, successful traders are those who have strategies which they have proved to be consistent in granting them more financial gains than financial losses. The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets, and assist them in gaining the technical skills required to profit from trading. It represents a beginner's guide to trading, with a core focus on stocks and currencies.

*The Truth About Day Trading Stocks* A realistic guide to day trading today's stock market In terms of the potential for heavy financial losses, day trading is a high-risk profession. No one should contemplate day trading without giving thought to the ways he can lose, and all the ways to lessen or avoid them. Yet many people enter the game with unrealistic expectations, unaware of what it takes to succeed. Seminars and software alone do not make a successful day trader, cautions author Josh DiPietro. Instead, a trader must learn hard lessons of self-discipline, consistency, and staying in the game for the long haul to have a real chance of success. In *The Truth About Day Trading Stocks*, DiPietro offers the amateur day trader a brutally honest look at the pitfalls of day trading—and how to hopefully avoid them. Written in an engaging and sometimes humorous tone, *The Truth About Day Trading Stocks* draws on the author's own experiences as a day trader to offer a clear-cut departure from typical "golden goose" strategies promising instant wealth. Instead, he attempts to slow down the dangerous fervor of the average amateur and demonstrate the ways you can become a professional and not lose your shirt in the process. *The Truth About Day Trading Stocks* shows how trading decisions are bent and shaped by emotions, and why it is critical to know yourself, understand risk, and remember that increasing your skill level is a gradual, ongoing process—there's always more to learn! After dispensing with popular illusions, DiPietro proceeds to offer realistic, practical trading advice—comparing pay-per-trade with pay-per-share brokers, determining which works best and when, offering suggestions on how to avoid the prospect of perfect trades turning ugly, and more. At the end of the book, he also includes a section called "Rules to Remember," a list of over eighty rules, simply stated and easy to grasp, to benefit amateurs' performance. Throughout the book, the author describes his development of acute self-awareness while figuring out how to succeed. Through that blunt self-portrayal, the goal of *The Truth About Day Trading Stocks* is to help you create a disciplined mind-set and apply it to your own successful trading style.

Do you want to learn how to day trade for a living? If yes, then keep reading. Day trading is a form of trading where trades are opened and closed on the same day, enabling the trader to capitalize on marginal gains earned through the day to day volatility of the market. When you are a day trader, your goal is to identify what stocks are likely to shift into favor that day so that you can conduct your trades accordingly. Generally, day traders will buy their stocks in the morning and hold onto those stocks until later in the day when the marginal gains have accumulated enough to earn a significant profit. Then, they will close the trade by selling the stocks before the end of the day so that they are not left holding any stocks after the market closes. Utilizing the day trading strategy means that your goal is to always be free of stocks in the evening to ensure that you are not exposing yourself to the risk of overnight price changes. As with any form of trading, you want to minimize your risk by never staying in the market longer than you intended to, as doing so could expose you to unforeseen changes that can lead to significant losses. Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a

beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. When I first laid my eyes on a candlestick chart, it reminded me of my music sheets. I was intrigued by a simple pattern-like representation of the collective economic psyche. Intrigued and hooked. But I would soon discover that 'simple' should not be used in the same sentence as 'price action' and 'candlestick charts'. My story: I spent 25 years as a highly skilled session musician. But as the music industry became ravaged by internet piracy, gigs became tougher, fees became cheaper and more annoying as the years went by. I placed my first trade in 2007. I had no idea what I was doing. Although I initially made \$4,000 I watched this bleed down to nothing over the very next week. I soon realised that the markets are nothing like 'point and click' like some brokers would lead you to believe. In fact, learning how to day trade consistently and profitably will be the most difficult high-income skill you will ever learn. Complexity-wise, it's right up there with performing brain surgery, becoming an Olympic-level athlete, a nuclear engineer, grand chess master or a highly skilled musician. Having said that, I enjoyed my journey to finding my alpha, finding my edge as a day trader immensely. I like puzzles. I enjoy intellectual stimulation. I thrive under high-pressure situations. If you are anything like me, then I invite you into my day trading method. It is primarily based on my own concept of systematic swing extremes. But it also incorporates heavy use of the market profile. Market profile is by far the most commonly used tool of professional prop traders. It has served me exquisitely well during my prop trading years when I traded crude oil futures and ES-mini (S&P500 futures). My approach isn't technical analysis. A more accurate term would be 'Market Mechanics' analysis. I look at statistical data, distribution curves and swing extremes to find high probability opportunities multiple times in one day. In this book, you won't find RSI, Moving Averages or MACD divergence. Instead, you will find some flow diagrams, statistical means, TPOs, and distribution curves - but without any complicated equations! It took me 6 long years of

painstakingly backtesting and forward testing to develop a systematic trading method. My method is based on statistical probabilities, taking advantage of either norms OR abnormalities. This book isn't about  $a+b=c$ . Instead, think of it as learning the language of order flow. Recognising higher odds opportunities as they arise over a trading session. My skills eventually blossomed when I gained an apprenticeship in Chicago. I was trading next to some pretty legendary CME traders. My own career now spans 14 years across London and Chicago based companies. My true potential really came into focus when I paired up supply demand with the market profile strategies. To this day I am the only trader who managed to come up with a systematic way of marrying these two professional tools of price and volume analysis. In this book, you will discover how to interpret and capitalise on day-to-day sentiment for short term trading income. If you're ready to leave the confusion behind and move forward with your trading skills, this book is for you: an intermediate trader who is struggling with finding their edge and consistency

The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.

To invest successfully or trade in Stocks, Options, Forex, or even Mutual Funds, it is imperative to know AND understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'Every book on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20! This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge! Mutual Funds? Most people think they do not need this information because they have a Mutual

Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.
