#### CONTEXT, SOCIAL MOVEMENTS AND THE DIGITAL

SAGE

Comprehensive Behavior Management: Schoolwide, Classroom, and Individualized Approaches supports teachers in preventing management problems and responding to unwanted behavior when it occurs in classrooms. The text offers a comprehensive presentation of three levels of behavior management strategies: individual, classroom, and schoolwide, all three of which contribute to a positive learning environment. A social learning emphasis in which human behavior is viewed within an ecological framework is integrated throughout the text. Application of this information is supported by a range of pedagogical devices such as vignettes, examples, strategies, and activities to show teachers how to manage behavior effectively. The analysis and applications in this text cover both general education and special education strategies.

#### MODELING AND OPTIMIZATION

SAGE

Providing a practical and step-by-step guide to collecting and managing qualitative data, this book focuses on the three most often used forms of qualitative methods: participant observation, in-depth interviews, and focus groups. Designed to be very applied, this textbook includes many checklists and tips for how to use each technique while doing research. It also includes numerous real-life examples and cases so that the reader will benefit from seeing the broader picture. *Collecting Qualitative Data: A Field Manual* is intended both for beginning researchers and the more experienced research collector.

*Review of the Mexican National Civil Protection System* SAGE

This interdisciplinary book challenges current approaches to "environmental problems" that perpetuate flawed but deeply embedded cultural beliefs about the role of science and technology in society. The authors elucidate and interrogate a cultural history of solutionism that typifies expectations that science can, should, and will reduce risk to people and property by containing and controlling biophysical phenomena. Using historical analysis, eco-evolutionary principles, and case studies on floods, radioactive waste, and epidemics, the authors show that perceived solutions to "environmental problems" generate new problems, leading to problem-solution cycles of increasing scope and complexity. The authors encourage readers to challenge the ideology of solutionism by considering the potential of language, social action and new paradigms of sustainability to shape management systems. This book will appeal to scholars in multi- and interdisciplinary fields such as Environment Studies, Environmental Science, Environmental Policy, and Science, Technology, and Society Studies.

*Digital Communication Management* OECD Publishing  
*Communication for Social Change: Context, Social Movements and the Digital* is a critical introduction to communication for social change (CSC) theory. The book presents refreshingly new perspectives and specifically makes the case for CSC theory to factor in context, leanings from social movements and a critique of the digital technology. This book offers perspectives on the historical continuities within this field of study along with the departures that have been hastened and shaped by confluences between ideas and practice as well as by digital technology and social movements. It introduces readers to a raft of new theorists of CSC and puts forth new thinking, new ideas, and a new basis for theorisation of communication for social change.

*Communication* SAGE

The director of communication is an impassioned profession that discovers which strategies are the best and the most intelligent. There are few manuals, and there are some that offer general and sparsely updated information about the change that new

technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

In recent decades, asylum has emerged as a highly politicized European issue. The term 'asylum seeker' has suffered a negative perception and has been associated with notions of illegality and criminality in mainstream media. These misconceptions have been supported by politicians as a distraction from economic and political uncertainties with the result that asylum seekers have been deprived of significant rights. This book examines the effect of recent attempts of harmonization on the identification and protection of refugees. It considers the extent of obligations on the state to admit and protect refugees and examines the 1951 Refugee Convention. The motivations of European legislators and legislation concerning asylum procedures and reception conditions are also analysed. Proposals and initiatives for refugee movements and determinations are examined and assessed. The author makes suggestions for better protection of refugees while responding to the security concerns of States, and questions whether European law and policy is doing enough to uphold the fundamental right to seek and enjoy asylum as set out in the Universal Declaration of Human Rights. This book takes a bold look at a controversial issue and generates discussion for those involved in the fields of human rights, migrational and transnational studies, law and society and international law.

International Conference on Industrial Engineering and Engineering Management is sponsored by Chinese Industrial Engineering Institution, CMES, which is the unique national-level academic society of Industrial Engineering. The conference is held annually as the major event in this area. Being the largest and the most authoritative international academic conference held in China, it supplies an academic platform for the experts and the entrepreneurs in International Industrial Engineering and Management area to exchange their research results. Many experts in various fields from China and foreign countries gather together in the conference to review, exchange, summarize and promote their achievements in Industrial Engineering and Engineering Management fields. Some experts pay special attention to the current situation of the related techniques application in China as well as their future prospect, such as Industry 4.0, Green Product Design, Quality Control and Management, Supply Chain and logistics Management to cater for the purpose of low-carbon, energy-saving and emission-reduction and so on. They also come up with their assumption and outlook about the related techniques' development. The proceedings will offer theatrical methods and technique application cases for experts from college and university, research institution and

enterprises who are engaged in theoretical research of Industrial Engineering and Engineering Management and its technique's application in China. As all the papers are feathered by higher level of academic and application value, they also provide research data for foreign scholars who occupy themselves in investigating the enterprises and engineering management of Chinese style.

The public service in South Africa faces an enormous challenge in improving service delivery not only to meet the citizens' expectations but to ensure quality life for the nation. The urgent need exists to establish what went wrong and how can the situation be turned around. The book established the root causes and the link between two key challenges identified by the government; management weaknesses and the absence of a strong performance culture. It offers critical approaches to cleanse and humanise the workplace, restore sanity, level-headedness. Reflection, Introspection, Self-Interrogation and Self-therapy are key in this whole equation.
