Jim Reynolds  
Jr. founded  
Loop Capital  
in 1997 as an  
investment

bank  
specializing in  
bond sales for  
municipalities.  
Ten years  
later, with  
thirteen

offices and almost 100 employees, Loop Capital was a national company and had brokered more than \$800 billion of underwritings in equity, tax-exempt, and taxable fixed income markets. In the process of building its municipal finance and equity trading businesses, Loop Capital had developed close relationships with a number of government officials, large institutional money managers, and corporate

executives. These customers began asking Loop Capital for help with other financial services, leading the firm to build corporate finance, tax-exempt, and taxable fixed-income platforms so it could offer a wider array of investment services. Municipal and corporate finance as well as equity, taxable, and tax-exempt trading were generating positive cash flow. In a field where failures were frequent,

Loop Capital was thriving, and Reynolds saw great but untapped potential in the company's future. Over the past several years, Loop Capital had served as financial advisor to several municipalities that wanted to lease or sell public assets such as airports, toll roads, and seaports. Now he confronted several intriguing questions: Should he launch a \$700 million infrastructure fund to invest

in the types of deals the firm had helped structure? Did it make sense to invest in order to staff, market, and support the start-up of this new fund? If the fund was launched, should Loop Capital commit to the 1% investment likely to be required as the fund's general partner? Learn how to start a new financial services firm/investment bank venture. Learn how an investment banking firm

becomes successful at doing a few things well. Assess risks of expanding into a new line of business with a different business model. Examine differences between investment banking and fund management, and between high-growth entrepreneurs hip and lifestyle entrepreneurs hip. Examine the significance, if any, of being a minority entrepreneur. **The**

Marquis Who's Who  
In a hilarious comedy of errors that Booklist has dubbed "a good choice for fans of John Green," high school matchmaker Shane Chambliss is content finding love for his

classmates—until love finally finds him. What if the secrets of dating and love were revealed in one simple formula? That's the tantalizing proposition high school senior Shane Chambliss offers the hopeless and hapless guys who come to him for relationship advice. After the girl of his dreams breaks his heart, Shane devises a mysterious formula called the Galgorithm

and establishes himself as the resident dating guru at Kingsview High School. But his attempts to master the art of romance go outrageously awry. As Shane tries to navigate the ensuing drama, he must follow his heart, abandon all the rules, and ignore his own advice in a quest for true love. What he discovers, no formula could ever predict... McGraw Hill Professional  
This ground-breaking book presents a complete methodology

for adaptive programming in any object-oriented programming language. Lieberherr's adaptive method signals a new approach to object-oriented program design that goes beyond object encapsulation and hard-coded navigation paths to achieve more flexible interactions among objects. Programmers using this method work at a higher, schematic

level of abstraction; graph notation represents the class structure and a "propagation pattern" language tells how to distribute meaningful methods - including navigation - across the structure. Using this method, programmers can easily adapt and modify programs as they evolve. This book can be used with any object-oriented programming environment, or with the

Demeter Tools Version 5.5, a complete, professional software system for creating and maintaining adaptive programs. *Loop Capital* Simon and Schuster

The answers for perfect teeth, unblemished skin, and pristine hair are in this book. Dr. Price was 75 years ahead of his time. In this book, he demonstrates that isolated groups of people living in accordance with Nature have the best overall physical and mental health. Diseases inflicting “modern” humans are unheard of in most of these study groups. Dr. Weston Andrew Price, DDS, was called the “Isaac Newton of Nutrition” and the “Darwin of Nutrition.” This edition of Dr. Price’s classic is modernized with the epub format. It is easier to read on smartphones and tablets. It also includes updated statistics and additional images. Dr. Price shows that illness, disease, behavior, criminality, anemia, voice, and even cheek-line, are all within the domain of Nutrition. “If civilized man is to survive, he must incorporate the fundamentals of primitive nutritional wisdom into his modern lifestyle.” —Dr. Weston A. Price, DDS [Gardening in the Tropics](#) North Atlantic Books Urban gardeners.

Native seed-saving collectives. Ecovillage developments. What is the connection between these seemingly disparate groups? The ecological design system of permaculture is the common thread that weaves them into a powerful, potentially revolutionary—or reevolutionary—movement. Permaculture is a philosophy based on common ethics of sustainable

cultures throughout history that have designed settlements according to nature's patterns and lived within its bounds. As a movement that has been building momentum for the past 40 years, it now is taking form as a growing network of sites developed with the intention of regenerating local ecologies and economies. Permaculture strategies can be used by individuals, groups, or

nations to address basic human needs such as food, water, energy, and housing. As a species, humans are being called forth to evolve, using our collective intelligence to meet the challenges of the future. Yet if we are to survive our collective planetary crisis, we need to revisit history, integrating successful systems from sustainable cultures. To boldly confront our position on the brink of

the earth's carrying capacity and make changes that incorporate the wisdom of the past is truly revolutionary. *Sustainable Revolution* features the work of a worldwide network of visionaries, including journalists, activists, indigenous leaders and permaculturists such as David Holmgren, Vandana Shiva, Charles Eisenstein, Starhawk, Erik Assadourian, Victoria Tauli-Corpuz, Albert Bates, and Geoff Lawton. This beautifully photographed collection of profiles, interviews, and essays features 60 innovative community-based projects in diverse climates across the planet. Edited by anthropologist Juliana Birnbaum Fox and award-winning activist filmmaker Louis Fox, it can be read as an informal ethnography of an international culture that is modeling solutions on the cutting edge of social and environmental change. The research presented in the book frames the permaculture movement as a significant ally to marginalized groups, such as the urban poor and native communities resisting the pressures of globalization. *Sustainable Revolution* uplifts and inspires with its amazing array of dynamic

activists and thriving, vibrant communities. From the Trade Paperback edition.
