INFORMATION TECHNOLOGY CONTROL AND AUDIT, FIFTH EDITION

Information Technology
Auditing Information
Technology Control and
Audit, Fifth Edition
"Messrs. Gow and Kells
have made an invaluable
contribution, writing in an
amused tone that
nevertheless
acknowledges the firms'
immense power and the
seriousness of their
neglect of traditional
responsibilities. 'The Big
Four' will appeal to all
those interested in the
future of the profession--
and of capitalism itself."
—Jane Gleeson-White,
Wall Street Journal With
staffs that are collectively
larger than the Russian
army and combined
revenues of over \$130
billion a year, the Big Four

accounting
firms—Deloitte,
PricewaterhouseCoopers,
Ernst & Young, and
KPMG—are a keystone of
global commerce. But
leading scholar Ian Gow
and award-winning author
Stuart Kells warn that a
house of cards may be
about to fall. Stretching
back to the Medicis in
Renaissance Florence, this
book is a fascinating story
of wealth, power, and
luck. The founders of the
Big Four lived surprisingly
colorful lives. Samuel
Price, for example,
married his own niece.
Between the world wars,
Nicholas Waterhouse
collected postage stamps
while also hosting
decadent parties in his
fashionable London home.
All four firms have
endured major calamities
in recent decades. There
have been hundreds of
court cases and legal
prosecutions for failed
audits, tax scandals, and
breaches of
independence. The firms
have come so close to
“extinction level events”

that regulators have
required them to prepare
“living wills.” And today,
the Big Four face an
uncertain future—thanks
to their push into China,
their vulnerability to
digital disruption and
competition, and the
hazards of providing
traditional services in a
new era of transparency.
This account of the past,
present, and likely future
of the Big Four is essential
reading for anyone
perplexed or fascinated
by professional services,
working or considering
working in the industry, or
simply curious about the
fate of the global
economy.
