Between the State and the Schoolhouse examines the Common Core State Standards from the initiative's promising beginnings to its disappointing outcomes. Situating the standards in the long history of state and federal efforts to shape education, the book describes a series of critical lessons that highlight the political

and structural challenges of large-scale, top-down reforms. Education policy expert Tom Loveless argues that there are too many layers between the state and the classroom for a national standards approach to be effective. Specifically, he emphasizes the significant gap between states' roles in designing education policy and teachers' roles as implementers of policy. In addition, he asserts that top-down policies are unpredictable, subject to political and ideological pressures, and vulnerable to the pendulum effect as new reforms emerge in response to previous ones. One of the most ambitious education reforms of the past century, the Common Core aimed to raise student success, prepare larger numbers of students for both college and careers, and close achievement gaps. Yet, as Loveless documents, a decade later there remains a lack of significant positive impact on student learning. Between the State and the Schoolhouse marks an important contribution to the debate over the standards movement and the role of federal and state governments in education reform.

The consensus among educators nationwide is that in-depth instruction paired with focused assessment of essential concepts and skills are far more effective than superficially covering every concept and skill in the standards. Educators are faced with the task of teaching all standards while meeting the extraordinary range of student learning needs. Prioritizing the Common Core offers

common sense solutions to the dilemmas teachers face today in implementing the new, more rigorous national standards. Chapters present a rationale for prioritizing the Common Core, a step-by-step process for prioritizing standards in language arts and mathematics, strategies for soliciting feedback and input from everyone in the district or school prior to the final determination of the Priority Standards, and detailed summaries of the process schools in six different districts used to identify their Priority Standards, with accompanying commentary by those who directed the work.
