BEARD MCCULLOUGH

Cryo-EM structure of a neuronal functional amyloid implicated in memory persistence in Drosophila Pulmonary Physiology 8e Lange Physiology We present a consecutive retrospective COVID-19 cohort with findings of frequent pulmonary thromboembolism (17%), high pulmonary artery pressure (60%) and lung MRI perfusion disturbances. COVID-19 pathophysiology may be driven by an imbalance in the renin-angiotensin-aldosterone system The goal of this column is to

provide you with the resources you need to excel in medical school. For more clinical resources, visit Emily Cooper's blog, Med-Source, which she maintains as a "one ...Essential Resources for the Boards: USMLE Step 1 and systemic physiology. We utilized a model of central fluid percussion injury (CFPI) in adult male rats treated with a single subcutaneous bolus of Bup-SR-Lab or saline 15 min post-injury. Buprenorphine alters microglia and astrocytes acutely following diffuse traumatic brain injury All healthy animals and plants are colonized by many microorganisms, notably bacteria (1, 2). This symbiotic microbiome plays a notable role in host physiology and evolution. Specifically, the ...Coadaptation between host genome and microbiome under long-term

xenobiotic-induced selection Manuscripts accepted for publication will immediately (within 48 hours of acceptance) be published online in the Articles in Press section of the AJRCCM website. Articles in Press establish ...American Journal of Respiratory and Critical Care Medicine The criteria for exclusion from the study were an age of less than 18 years, pregnancy, or the presence of an acute cerebral vascular event, acute coronary syndrome, acute pulmonary edema ...Early Goal-Directed Therapy in the Treatment of Severe Sepsis and Septic Shock the Simplified Acute Physiology Score (SAPS) II (on a scale from 0 to 163, with higher scores indicating more severe organ dysfunction), 27 and the SOFA score 25; and interventions, including the ...Hydrocortisone

The Intestinal Barrier in Multiple Sclerosis: Implications for Pathophysiology and Therapeutics

To this end, Sharma and colleagues derived heart cells from human induced pluripotent stem cells and then examined how a battery of anticancer tyrosine kinase inhibitors altered their physiology. By ...

Buprenorphine alters microglia and astrocytes acutely following diffuse traumatic brain injury

In a study of 12 jejunal biopsies from multiple sclerosis patients, Lange and Shiner (1976 ... Canada 4 Department of Physiology and Pharmacology, Cumming School of Medicine, University of ...

Sleep and the athlete: narrative review and 2021 expert consensus recommendations

The goal of this column is to provide you with the resources you need to excel in medical school. For more clinical resources, visit Emily Cooper's blog, Med-Source, which she maintains as a "one ...

Early Goal-Directed Therapy in the Treatment of Severe Sepsis and Septic Shock

Efficacy of low doses of natural PGF2a has been reported for bitches with pyometra (Lange et al., 1997). Such a treatment protocol is effective provided that prostaglandins are administered 2-3 times ...

A Factor XIIa Inhibitory Antibody Provides Thromboprotection in Extracorporeal Circulation Without Increasing Bleeding Risk

The criteria for exclusion from the study were an age of less than 18 years, pregnancy, or the presence of an acute cerebral vascular event, acute coronary syndrome, acute pulmonary edema ...

American Journal of Respiratory and Critical Care Medicine

British Hypothesis The Dutch hypothesis is in contrast to the "British hypothesis," where asthma and chronic obstructive pulmonary disease (COPD) are seen as distinct entities generated by different ...

Coadaptation between host genome and microbiome under long-term xenobiotic-induced selection

the Simplified Acute Physiology Score (SAPS) II (on a scale from 0 to 163, with higher scores indicating more severe organ dysfunction), 27 and the SOFA score 25; and interventions,

including the ...
