This book examines the relationship

between Chinese college-level test takers' strategy use and reading test performance using a Structural Equation Modelling Approach. With a large sample of Chinese college-level test takers, the book investigates the underlying structure of the EFL reading test. It suggests implications for classroom teachers and testing researchers about the relationship between metacognitive and cognitive strategy use in testing contexts.

Discourse and Context in Language Teaching Routledge

This book brings together current research by leading international

scholars on the often contentious nature of language policies and their practical outcomes in North America, Australia and Europe. It presents a range of perspectives from which to engage with a variety of pressing issues raised by multilingualism, multiculturalism, immigration, exclusion, and identity. A recurrent theme is that of tension and conflict: between uniformity and diversity, between official policies and real day-to-day life experiences, but also between policies in schools and the corporate world and their implementation. Several chapters present research about language policy issues that has previously not been fully or easily available to an English-language audience. Many of the chapters also provide up-to-date

analyses of language policy issues in particular regions or countries, focusing on recent developments.

The United States is formally represented around the world by approximately 14,000 Foreign Service officers and other personnel in the U.S. Department of State. Roughly one-third of them are required to be proficient in the local languages of the countries to which they are posted. To achieve this language proficiency for its staff, the State Department's Foreign Service Institute (FSI) provides intensive language instruction and assesses the proficiency of personnel before they are posted to a foreign country. The requirement for language proficiency is established in law and is incorporated in

personnel decisions related to job placement, promotion, retention, and pay. A Principled Approach to Language Assessment: Considerations for the U.S. Foreign Service Institute evaluates the different approaches that exist to assess foreign language proficiency that FSI could potentially use. This report considers the key assessment approaches in the research literature that are appropriate for language testing, including, but not limited to, assessments that use task-based or performance-based approaches, adaptive online test administration, and portfolios.

Understanding Language Testing presents an introduction to language

tests and the process of test development that starts at the very beginning. Assuming no knowledge of the field, the book promotes a practical understanding of language testing using examples from a variety of languages. While grounded on solid theoretical principles, the book focuses on fostering a true understanding of the various uses of language tests and the process of test development, scoring test performance, analyzing and interpreting test results, and above all, using tests as ethically and fairly as possible so that test takers are given every opportunity to do their best, to learn as much as possible, and feel positive about their language learning. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is

the ideal book for both beginning students of linguistics and language education, or anyone in a related discipline looking for a first introduction to language testing.

This comprehensive account of performance-based assessment of L2 lexical proficiency analyzes and compares two of the primary methods of evaluation used in the field and unpacks the ways in which they tap into different dimensions of one model of lexical competence and proficiency. This book builds on the latest research on performance-based assessment, which has most recently pointed to the application of more quantitative

measures to L2 data, to systematically explore the qualitative method of using human raters in assessment exercises and the quantitative method of using automatic computation of statistical measures of lexis and phraseology.

Supported by an up-to-date review of the existing literature, both approaches' unique features are highlighted but also compared to one another to provide a holistic overview of performance-based assessment as it stands today at both the theoretical and empirical level.

These findings are exemplified in a concluding chapter, which summarizes results from an empirical study looking at a range of lexical and phraseological features and human raters' scores of over 150 essays written by both L2 learners of English and native speakers.

Taken together, the volume challenges existing tendencies within the field which attempt to use one method to validate one another by demonstrating their capacity to indicate very different elements of lexical proficiency, thereby offering a means by which to better conceptualize performance-based assessment of L2 vocabulary in the future. This book will be of interest to students and researchers working in second language acquisition and applied linguistics research, particularly those interested in issues around assessment, vocabulary acquisition, and language proficiency.

The Gettysburg Address is a speech by U.S. President Abraham Lincoln, one of the best-known in American history. It was delivered by Lincoln during the American Civil War, on the afternoon of Thursday, November 19, 1863, at the dedication of the Soldiers' National Cemetery in Gettysburg, Pennsylvania, four and a half months after the Union armies defeated those of the Confederacy at the Battle of Gettysburg. Abraham Lincoln's carefully crafted address, secondary to other presentations that day, was one of the greatest and most influential statements of national purpose. In just over two minutes, Lincoln reiterated the principles of human equality espoused by the Declaration of Independence and proclaimed the Civil War as a struggle

for the preservation of the Union sundered by the secession crisis, with "a new birth of freedom" that would bring true equality to all of its citizens. Lincoln also redefined the Civil War as a struggle not just for the Union, but also for the principle of human equality. Beginning with the now-iconic phrase "Four score and seven years ago"—referring to the United States Declaration of Independence in 1776—Lincoln examined the founding principles of the United States as stated in the Declaration of Independence. In the context of the Civil War, Lincoln also memorialized the sacrifices of those who gave their lives at Gettysburg and extolled virtues for the listeners (and the nation) to ensure the survival of America's representative democracy:

that "government of the people, by the people, for the people, shall not perish from the earth." Despite the speech's prominent place in the history and popular culture of the United States, the exact wording and location of the speech are disputed. The five known manuscripts of the Gettysburg Address in Lincoln's hand differ in a number of details, and also differ from contemporary newspaper reprints of the speech.

Golding's iconic 1954 novel, now with a

new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Local Language Testing: Design, Implementation, and Development describes the language testing practice that exists in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in the language testing and assessment literature. Covering both theory and practice, the book focuses on the advantages of local tests, fosters and encourages their use, and provides suggested ideas for their development and maintenance. The authors include examples of operational tests with well-proven track records and discuss: the ability of local tests to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and

research; local testing practices grounded in the theoretical principles of language testing, drawing from experiences with local testing and providing practical examples of local language tests, illustrating how they can be designed to effectively function within and across different institutional contexts; examples of how local language tests and assessments are developed for use within a specific context and how they serve a variety of purposes (e.g., entry-level proficiency testing, placement testing, international teaching assistant testing, writing assessment, and program evaluation). Aimed at language program directors, graduate students, and researchers involved in language program development and evaluation, this is a

timely book in that it focuses on the advantages of local tests, fosters and encourages their use, and outlines their development and maintenance. It constitutes essential reading for language program directors, graduate students, and researchers involved in language program development and evaluation.

Today, English Language Teaching (ELT), especially English as a Second Language (ESL) and English as a Foreign Language (EFL), has been witnessing unprecedented changes in curriculum, teaching methodology, and the application of learning theories. This has created a demand for teachers who can

teach English to learners of varied cultural, socio-economic and psychological backgrounds. This book discusses the modern trends, innovations, as well as the difficulties and challenges in teaching and learning ESL in a non-native context. The book, with contributions from many experts (each one specializing in a particular field) from countries such as UK, USA, Australia, New Zealand, India, Nigeria, Sri Lanka, China, and Japan, provides new methods, strategies and application-oriented solutions to overcome the problems in a practical way. The book deals with all topics pertinent to ESL and these are reinforced by a large number of examples and quotations from different sources. What distinguishes the text is its focus on

modern innovations and use of technology in ELT/CLT (communicative language teaching). Teachers, teacher-trainees (B.Ed./M.A. Education/M.Ed.), and teacher-educators who are concerned with teaching English as a Second Language (ESL) should find this book immensely helpful.
