Lorelei, a young woman living in the early 1920s, decides to keep a diary after receiving a blank journal from a “gentleman friend.” Lorelei has an apartment in New York paid for by a Chicago businessman named Gus Eisman. When he’s in town, Mr. Eisman spends his time “educating” Lorelei by going out to dinner, taking in shows, and then escorting her to her apartment to “talk about the topics of the day until quite late.” When he isn’t in town, Lorelei does much the same with the other men she has charmed. Joined by her best friend Dorothy, Lorelei embarks on a journey to Europe in order to meet Mr. Eisman and continue her education. As the diary unfolds, we learn more about Lorelei’s past and her cynical, rather mercenary approach towards romance. Originally published as a series of sketches known as “the Lorelei stories” in Harper’s Bazaar, *Gentlemen Prefer Blondes* was published as a novel in 1925. Despite lukewarm initial reviews, it quickly became a success, becoming the second-best seller of 1926. Since then it has been adapted several times, most famously as the 1953 film starring Marilyn Monroe. Edith Wharton called it “the great American novel,” and it has been praised by numerous other authors including James Joyce and F. Scott Fitzgerald. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Brain Candy for expectant parents! Pregnancy is an adventure. Lots of books tell you the basics—“the baby is the size of [insert fruit here].” But pregnant science writer Jena Pincott began to wonder just how a baby might tinker with her body—and vice versa—and chased down answers to the questions she wouldn’t ask her doctor, such as:

- Does stress sharpen your baby’s mind—or dull it?
- Can you predict your baby’s temperament?
- Why are babies born in the darker months of the year more likely to grow up to be novelty-loving risk takers?
- Are bossy, dominant women more likely to have boys?
- How can the cells left behind by your baby affect you years later?

This is a different kind of pregnancy book—thoughtful, fun, and filled with information you won’t find anywhere else.

How long does it take to decide if a person is hot? Is your lover more likely to get you pregnant than your husband? Can men tell when a woman is fertile? If you’ve ever wondered how scientists measure love—or whether men really prefer blondes over brunettes—this smart, sexy book provides real answers to these and many other questions about our most baffling dating and mating behaviors. Based on the latest research in biology, evolutionary psychology, neuroscience, and cognitive science, *Do Gentlemen Really Prefer Blondes?* dares to explain the science behind sex—and opens a fascinating window on the intriguing phenomenon of love and attraction. Covering the areas of bodies, brains, and behavior, this eye-opening guide reveals the genetic, hormonal, and psychological secrets behind what makes us tick sexually. For example, do you know why a man’s body chemistry and behavior change when he’s in a committed relationship? And why, when he becomes a daddy, his testosterone level seems to plummet? And did you know...

- When a couple first fall in love, their brains are indistinguishable from those of the clinically insane
- You can tell a lot about a person’s sexual chemistry just by looking at his or her hands
- Your genes influence whose body odors you prefer
- Being around breast-feeding women may increase a woman's sex drive

Viewed through the lens of science and instinct, your love life might be seen in a completely different way. *Do Gentlemen Really Prefer Blondes?* provides both an in-depth exploration into our sexual psyches—and fresh advice for men and women who want to discover the secrets of successful relationships. From the Hardcover edition.

What if memory and learning could improve after eating certain foods—such as blueberries—high in plant chemicals called flavonols? What if primal ways of moving the body strengthen kids' working memory and mental flexibility? What if receiving the right types of touch translate into better emotional control and self-regulation? These and many more questions led Pincott to simple, all-natural “biohacks”—or experiments inspired by current research and theory—complete with instructions on how to undertake them to help your own children strengthen their wits, guts, and grit.

"I adored Anita, as did the entire fashion and literary world. She was four feet nine inches of lithe, slender, dramatic chic."—Carol Channing "This book celebrates a character as memorable as any Anita Loos created in her writing. She was an indomitable, wise-cracking prodigy who not only helped create Hollywood, but managed to survive it."—John Sayles "If we can't have the wonderful Anita Loos-smart, witty, literate and fun- writing today's Hollywood movies, at least we can get

reacquainted with her and her work through this delightful book. Filled with previously unpublished material, it shows that while gentlemen may have preferred blondes, everyone else in town wisely preferred the irresistible Ms. Loos."—Kenneth Turan, film critic for the Los Angeles Times "This is a wonderful book about a talented, fascinating, and groundbreaking woman. Her life epitomizes a certain era in show business and describes a Hollywood in which few women were allowed to rise to the top. Anita Loos did and we were all the beneficiaries. I loved the book!"—Peter Duchin "Not only is it valuable to have these delightful Anita Loos pieces, but the biographical chapters are fascinating too."—Kevin Brownlow, author of *David Lean: A Biography*

"Kissing your hand may make you feel very very good, but a diamond and sapphire bracelet lasts forever." Anita Loos first published the diaries of the gold-digging blonde Lorelei Lee in the flapper days of 1925, forging a new archetype for the modern world. *Gentlemen Prefer Blondes* follows Lorelei and her best friend, Dorothy, from Hollywood to Manhattan to Paris and London, pursued by eager suitors all the while. In "the Central of Europe," with a new diamond tiara in her handbag, Lorelei meets a traveling American millionaire who just might be the one. She retires her diary, but not for long, because, as she writes in the opening pages of *But Gentlemen Marry Brunettes*, "it is bright ideas that keep the home fires burning, and prevent a divorce from taking all of the bloom off Romance." **Anita Loos' Gentlemen Prefer Blondes** Penguin

Q: Do Gentlemen Really Prefer Blondes? A: Marilyn Monroe, Scarlet Johansson and Gwyneth Paltrow would be happy to know that they do. During the Ice Age, when even cavemen were in short supply, the blonde woman really did get her man - simply because her light coloured hair made her stand out. Plus scientists have recently discovered that natural blondes have higher oestrogen levels. In short, golden (preferably long) hair shouts : 'I am young, sexy - and fertile' to every member of the male species within a few miles. Q: When s the best time to seduce my man? A: Your other half will definitely get more possessive and more attracted to you when you re ovulating and at your most fertile. You ll spend time on your make-up and choose next day s outfit before you go to bed. Your lips will be fuller, and your skin will be radiant because of the high levels of oestrogen being pumped through your blood. But don t get carried away by how sexy you feel. You are also more likely to be unfaithful during this period and your boyfriend is also likely to run away with another equally fertile member of the female species. Q: How do I get him to change his wild lifestyle? A: Get pregnant. Shocking but true. Fathers have lower testosterone levels than single men which means that they are more easy-going and less confrontational, they take fewer life threatening risks, and they are far less likely to have an affair with the leggier, skinnier blonde from the office.

In this highly informative and entertaining book, the founder of the vibrant new field of evolutionary consumption illuminates the relevance of our biological heritage to our daily lives as consumers. While culture is important, the author shows that innate evolutionary forces deeply influence the foods we eat, the gifts we offer, the cosmetics and clothing styles we choose to make ourselves more attractive to potential mates, and even the cultural products that stimulate our imaginations (such as art, music, and religion). The book demonstrates that most acts of consumption can be mapped onto four key Darwinian drives—namely, survival (we prefer foods high in calories); reproduction (we use products as sexual signals); kin selection (we naturally exchange gifts with family members); and reciprocal altruism (we enjoy offering gifts to close friends). The author further highlights the analogous behaviors that exist between human consumers and a wide range of animals. For anyone interested in the biological basis of human behavior or simply in what makes consumers tick—marketing professionals, advertisers, psychology mavens, and consumers themselves—this is a fascinating read.
