The green revolution in India about 50 years ago transformed India's image then as begging bowl to bread basket. This transformation during the 1960s took just about 4 years. The yield increases achieved in wheat and then in rice which occurred in just about half decade is far in excess of the yield increases during the preceding 4000 years. This remarkable feat was achieved with the leadership of the author using the dwarf wheat types which had been produced by Norman Borlaug in Mexico. The research and development of green revolution of wheat and rice at the Indian Agricultural Research Institute, New Delhi was led by the author along with his team of students and co-workers. He has published over 100 papers on green revolution and the ever-green revolution which is a refinement of the former. This book is a compilation of just about 40 of his numerous research papers, monographs and books published by him on this subject. The papers in this book bring out the scientific basis of the modification of the plant type so as to be responsive to exogenous addition of chemical fertilizers and irrigation. The ideal plant type enables capture of adequate sunlight and using the chemical fertilizers added to the soil, produce substantial photosynthetic starch. And because the plants have short and thick culm, they are able to withstand enormous amounts of grains in their ears. This indeed was the basis of breaking the yield barriers associated with native varieties. The book also brings out that green revolution had established the food security at the national level but not at the individual household levels of millions of resource-poor rural small and marginal farming, fishing and landless families. Further green revolution was commodity-centric and the manner of its practice led to environmental degradation and social inequities. This author realized as early as 1972 that system of agriculture in India should be designed to fight both the famines of food and rural livelihoods. In pursuit of it, this author further designed an evergreen revolution with systems approach. What this means is providing concurrent attention to ecological foundations of agriculture and the livelihoods of the rural people. The book also brings out that green revolution was a team effort involving scientists, policy makers, administrators, farmers and students. This book is an outstanding example of green revolution providing a breathing space by putting the cereal grain production rate ahead of the population growth rate and then when food security has been adequately established, the system is changed to achieve productivity in perpetuity without causing environmental and social harm.

Twice filmed (with Michael Redgrave and Albert Finney) and frequently revived. Andrew Crocker-Harris' wife Millie has become embittered and fatigued by her husband's lack of passion and ambition. On the verge of retirement, and divorce, Andrew is forced to come to terms with the platitude his life has become. Then John Taplow, a previously unnoticed pupil, gives Andrew an unexpected parting gift: a second-hand copy of Robert Browning's translation of Agamemnon - a gift which offers not only a opportunity for redemption, but the chance to gain back some dignity. This volume also contains Harlequinade, a farce about a touring theatre troupe, written to accompany The Browning Version in a double-bill under the joint title, Playbill. Cliché and reality are rooted in India's long history. No invader or British Raj is ruling us. We have our own government but are we anywhere near to what we were in our glorious past? If Mohenjo-Daro and Harappa had highly precise science of civil engineering and architecture then why can't we have clean and orderly cities now where people can live with basic dignity without unruly traffic and filthy streets? If Megasthenese said that in India thefts were extremely rare, that Indians honoured truth as a virtue, why today even after paying a bribe one is unsure if his work gets done? If Marco-polo rated Indians to be the best merchants in the world and the most truthful, then why in these times we think of our politicians, industrialists and bureaucrats as self-servers, obstructive, corrupt and always blocking the economic reforms? If we were straight forward, if it was love of truth and justice that Indians were known for, then why can't we insist loudly and clearly and courageously to defend our claim? If no one ever accused us of falsehood then why can't we redeem that same rule of law and decency? Why is there such deep rooted corruption and why an ever pervasive flair for free riding? Why are we ever ready to blame anyone but ourselves for our collective plight? How, where, what went wrong? Will our grandchildren also inherit a corrupt and inefficient system of governance? Is it that words come easier to us, actions come harder? If as people of one nation we have lost our sensitivity to the misery and mediocrity around us, then what value system we are passing on to the next generation; scepticism, oppression and corruption? Sometimes; questions are too complicated, especially if we fear the answers, sometimes; the worst battle we have to fight is between what we know and what we feel.

Sharad Pawar is one of India's key public figures. Through his five-decade-long career, during which he has never lost an election, he has served as chief minister of Maharashtra four times and as India's defence minister and minister for agriculture. On two occasions he came close to becoming the country's prime minister. He has often bucked the trend, preferring policy and pragmatism over populism, and won admiration for his administrative acumen and consensual politics. Eyewitness-at the highest levels-to India's and Maharashtra's history since the 1960s, he shares in this memoir his reflections on coalition politics, the loss of democracy in the Congress Party (with which he began his political life), the state of agriculture and industry in the country, and the absolute necessity of social harmony and a liberal, inclusive ethos for India's future. As he does this, he also gives us rare information about many crises and turning points: Emergency and its impact on national and regional politics; the fall of the Chandrashekhar government in 1991; the signing of the Punjab Accord between Rajiv Gandhi and H.S. Longowal; the Babri Masjid demolition; the Mumbai bomb blasts of 1993; the devastating earthquake in Latur; the controversy over the Enron power project; and Sonia Gandhi's dramatic decision to give up the chance to occupy the country's highest office. Throughout, the narrative also contains candid and fascinating assessments of some of the biggest names in Indian politics, among them, Indira, Rajiv and Sonia Gandhi, Y.B. Chavan, Morarji Desai, Biju Patnaik, Atal Bihari Vajpayee, Chandrashekhar, P.V. Narasimha Rao, George Fernandes and Bal Thackeray. 'On My Terms' is a rich, insightful and remarkably frank memoir by one of India's most experienced and influential political leaders, and a valuable document of the country's recent political history.

Gender Equality, the fifth UN Sustainable Development Goal (SDG 5), aims for the elimination of all forms of discrimination against women and girls. It thereby addresses all forms of violence, unpaid and unacknowledged care and domestic work, as well as the need for equal opportunities for leadership. Thus, the areas in which changes with regard to gender equality on a global scale are needed are very broad. In this volume, we focus on three main areas of inquiry, 'Sexuality', 'Politics of Difference' and 'Care, Work and Family', and raise the following transversal questions: How can gender be addressed in an intersectional perspective, linking gender to further categories of difference, which are involved in discrimination? In which ways are binary notions of gender taking part in inequality regimes and by which means can these binaries be questioned? How can we measure, control and portray progress with regard to gender equality and how do we, in doing so, define gender? Which multi-, inter- or transdisciplinary perspectives are needed for understanding the diversity of gender, in order to support a transition to 'gender equality'? Transitioning to Gender Equality is part of MDPI's new Open Access book series Transitioning to Sustainability. With this series, MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world. Transitioning to Sustainability aims to add to the conversation about regional and global sustainable development according to the 17 SDGs. Set to be published in 2020/2021, the book series is intended to reach beyond disciplinary, even academic boundaries.

Paid work is absolutely central to the culture and politics of capitalist societies, yet today's work-centred world is becoming increasingly hostile to the human need for autonomy, spontaneity and community. The grim reality of a society in which some are overworked, whilst others are condemned to intermittent work and unemployment, is progressively more difficult to tolerate. In this thought-provoking book, David Frayne questions the central place of work in mainstream political visions of the future, laying bare the ways in which economic demands colonise our lives and priorities. Drawing on his original research into the lives of people who are actively resisting nine-to-five employment, Frayne asks what motivates these people to disconnect from work, whether or not their resistance is futile, and whether they might have the capacity to inspire an alternative form of development, based on a reduction and social redistribution of work. A crucial dissection of the work-centred nature of modern society and emerging resistance to it, *The Refusal of Work* is a bold call for a more humane and sustainable vision of social progress.

The stamping out of difference, the quelling of diversity and the burial of argument is, in fact, most un-Indian. Anyone who seeks to end that dialogue process is ignoring Indianness and patriotism. The liberal Indian argues for the rights of the marginalized in the tradition of Gandhi for trust, mutual understanding and bridge-building. Real patriotism lies in old-fashioned ideas of accommodation, friendship and generosity; not in force, muscle flexing and dominance. Why I Am a Liberal is Sagarika Ghose's impassioned meditation on why India needs to be liberal.

You Know, Sex Context

Political institutions and practices such as the state, parliament, citizenship and nationality, the vote, the military, and the making and implementation of laws have traditionally been treated as if they were un-gendered and guided exclusively by objective reasoning and rationality. Rationality and reason, though, have been habitually ascribed to masculinity, a fact which has often been ignored in favour of the apparent gender-inclusiveness of the realm of politics. In contrast to this view, this book explores the interdependence of the construction of masculinities, on the one hand, and the emerging, maintenance, and modification of concepts such as the state, citizenship, nationality and nationalism, democracy and militarism on the other. Illustrating the great amount of research activity in the field of political masculinities, the book offers many perspectives in its attempt to shed light on different modes of representing and constructing political masculinities across time and space. Findings from the fields of political science, history, media studies, literature, and film studies, as well as cultural studies, encourage an interdisciplinary debate of political masculinities in Europe and the United States from the nineteenth to the twenty-first century.
