Magic, witches, and demons have drawn interest and fear throughout human history. In this comprehensive primary source reader, Martha Rampton traces the history of our fascination with magic and witchcraft from the first through to the seventeenth century. In over 80 readings presented chronologically, Rampton demonstrates how understandings of and reactions toward magic changed and developed over time, and how these ideas were influenced by various factors such as religion, science, and law. The wide-ranging texts emphasize social history and include early Merovingian law codes, the Picatrix, Lombard's Sentences, The Golden Legend, and A Midsummer Night's Dream. By presenting a full spectrum of source types including hagiography, law codes, literature, and handbooks, this collection provides readers with a broad view of how magic was understood through the medieval and early modern eras. Rampton's introduction to the volume is a passionate appeal to students to use tolerance, imagination, and empathy when travelling back in time. The introductions to individual readings are deliberately minimal, providing just enough context so that students can hear medieval voices for themselves.

The Sense of Sound is a radical recontextualization of French song, 1260-1330. Situating musical sound against sonorities of the city, madness, charivari, and prayer, it argues that the effect of verbal confusion popular in music abounds with audible associations, and that there was meaning in what is often heard as nonsensical.

An Introduction to the Crusades, part of the Companions to Medieval Studies series, is an accessible guide to studying the complex history of the Crusades. The book begins by defining the Crusades, giving the political and social context of Byzantium, Western Europe, the Islamic States, and Jewish communities to set the scene for crusading from the eleventh century to the end of the medieval period. It then immerses the reader in the logistics of crusading and the day-to-day life of a crusader, explaining arms and armor, strategy and tactics, and siege warfare. Topics explored in depth include women on crusade, pilgrimage, the Mongols, crusade charters, and the use of crusader rhetoric throughout history. A case study chapter on the negotiations for Jerusalem between Saladin and Richard I provides insight into the process of historical inquiry and methods for engaging with primary sources. The book is pedagogically grounded through the inclusion of questions for reflection, sixteen images, four maps, a detailed chronology, a glossary, a "Who's Who" of the crusading world, and a bibliography.

Cities of Strangers Oxford University Press

Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

Making Lives in Medieval Europe A&C Black

"Carole Rawcliffe continues with her mission to clean up the Middle Ages. In earlier work she has already given us scholarly yet sympathetic portrayals of English medicine, hospitals, and welfare for lepers. Now she widens her scope to public health. Her argument is clear, simple and convincing. Through the efforts of crown and civic authorities, mercantile elites and "popular" interests, English towns and cities aspired to a far healthier, less polluted environment than previously supposed. All major sources of possible infection were regulated, from sounds and smells to corrupt matter - and to immorality. Once again Professor Rawcliffe has overturned a well-established orthodoxy in the history of pre-modern health and healing. Her book is a magnificent achievement." Peregrine Horden, Royal Holloway University of London. This first full-length study of public health in pre-Reformation England challenges a number of entrenched assumptions about the insanitary nature of urban life during "the golden age of bacteria". Adopting an interdisciplinary approach that draws on material remains as well as archives, it examines the medical, cultural and religious contexts in which ideas about the welfare of the communal body developed. Far from demonstrating indifference, ignorance or mute acceptance in the face of repeated onslaughts of epidemic disease, the rulers and residents of English towns devised sophisticated and coherent strategies for the creation of a more salubrious environment; among the plethora of initiatives whose origins often predated the Black Death can also be found measures for the improvement of the water supply, for better food standards and for the care of the sick, both rich and poor. Carole Rawcliffe is Professor of Medieval History, University of East Anglia.

The national bestselling hit hailed by the New York Times as a "vibrant medieval mystery...[it] outdoes the competition." In medieval Cambridge, England, Adelia, a female forensics expert, is summoned by King Henry II to investigate a series of gruesome murders that has wrongly implicated the Jewish population, yielding even more tragic results. As Adelia's investigation takes her behind the closed doors of the country's churches, the killer prepares to strike again.

Life in a Medieval Village Crabtree Publishing Company

What was it like to be disabled in the Middle Ages? How did people become disabled? Did welfare support exist? This book discusses social and cultural factors affecting the lives of medieval crippled,

deaf, mute and blind people, those nowadays collectively called "disabled." Although the word did not exist then, many of the experiences disabled people might have today can already be traced back to medieval social institutions and cultural attitudes. This volume informs our knowledge of the topic by investigating the impact medieval laws had on the social position of disabled people, and conversely, how people might become disabled through judicial actions; ideas of work and how work could both cause disability through industrial accidents but also provide continued ability to earn a living through occupational support networks; the disabling effects of old age and associated physical deteriorations; and the changing nature of attitudes towards welfare provision for the disabled and the ambivalent role of medieval institutions and charity in the support and care of disabled people.

A Companion to Britain in the Later Middle Ages University of Toronto Press

Since the publication of the first edition of *The Crusades: A Reader*, interest in the Crusades has increased dramatically, fueled in part by current global interactions between the Muslim world and Western nations. The second edition features an intriguing new chapter on perceptions of the Crusades in the modern period, from David Hume and William Wordsworth to World War I political cartoons and crusading rhetoric circulating after 9/11. Islamic accounts of the treatment of prisoners have been added, as well as sources detailing the homecoming of those who had ventured to the Holy Land—including a newly translated reading on a woman crusader, Margaret of Beverly. The book contains sixteen images, study questions for each reading, and an index.
