Herbert Press

A world without plants is a world without life, both literally and figuratively. Besides forming the very basis of human survival on Earth, they are also an important source of creative inspiration, ingenuity, and expression. From scientific explorers like Sir Joseph Banks who travelled across the globe in search of never-seen before species to impressionist painters like Édouard Manet who sought to capture the subtle beauty of everyday objects, many artists and illustrators have used flora as a powerful means to convey the essence of our very existence. Botanical Inspiration is a timeless collection of artwork and illustrations that feature flora and its many facets through a variety of visual concepts, styles, and techniques. It speaks to lovers of both nature and creativity as a universal language in itself, thoughtfully interpreted by some of today's most intriguing and interesting talents.

Botanical Illustration for Beginners Watson-Guption

Drawing with graphite and coloured pencils enables the artist to capture every detail of a plant, and to enjoy, study and celebrate their wonderful forms. Whether the illustration is a striking monotone or vibrant with colour, pencils give you absolute precision. This book, written and illustrated by an award-winning botanical artist, introduces and explains the drawing skills behind the art. Each chapter concentrates on a different aspect of the plant, working upwards from the root system to include the stem, leaves, flowers and fruit. Fungi have also been included due to their close association with plants. With tips and advice throughout, the techniques are supported by step-by-step projects, clear exercises and over 300 colour illustrations. The author explores the techniques of using graphite and coloured pencils, with practical help on lighting, posture and keeping plants fresh. There is instruction on composition, colour charts and mixing, and advice on portraying texture and hairs, and achieving bloom on fruit, with simple explanations of botany to aid the artist's understanding. Lavishly illustrated with 307 colour images.

Throughout the nineteenth and twentieth centuries, wall charts were a familiar classroom component, displaying scientific images at a large scale, in full color. But it's only now that they've been superseded as a teaching tool that we have begun to realize something their ubiquity hid: they are stunning examples of botanical art at its finest. This beautifully illustrated oversized book gives the humble wall chart its due, reproducing more than two hundred of them in dazzling full color. Each wall chart is accompanied by captions that offer accessible information about the species featured, the scientists and botanical illustrators who created it, and any particularly interesting or innovative features the chart displays. And gardeners will be pleased to discover useful information about plant anatomy and morphology and species differences. We see lilies and tulips, gourds, aquatic plants, legumes, poisonous plants, and carnivorous plants, all presented in exquisite, larger-than-life detail. A unique fusion of art, science, and education, the wall charts gathered here offer a glimpse into a wonderful scientific heritage and are sure to thrill naturalists, gardeners, and artists alike.

Field Book of Western Wild Flowers Rockport Publishers

Originally developed in the 18th century as a visual supplement to botanical nomenclature, botanical illustration and art uniquely fuse art and science by documenting the parts, details, and life cycles of plant species. In *Drawing and Painting Botanicals for Artists*, eminent botanical artist and veteran workshop instructor Karen Kluglein reveals her secrets for rendering leaves, flowers, berries, and branches both accurately and beautifully. The book begins with a brief history of the art form, followed by guidance on developing observational skills for this genre, key botanical terms and concepts, and the differences among botanical illustration, botanical art, and flower painting. The chapters that follow offer detailed guidance and demonstrations for drawing and painting botanicals in a variety of mediums: Drawing. Explore loose gestural drawing, precise measuring and rendering, and working from photographs with graphite, colored pencil, finepoint markers, pen and ink, and silverpoint. Painting. Master color mixing, washes, layering, gradations, values, and adding details in watercolor, gouache, and acrylic, plus guidance on adding “personality” to your work and knowing when a painting is done. *Drawing and Painting Botanicals for Artists* shows artists at all skill levels how to translate careful observations into stunning works of art.

### **An Illustrated History**

George Weidenfeld & Nicholson

*Botanical Illustration* - the complete guide explains the processes and methods behind this beautiful art genre. It highlights the importance of the requisite skills of close observation, accurate drawing and attention to detail. Leigh Ann Gale is a leading botanical artist and tutor, and she generously demonstrates her approach in this book. Her worked example of fuchsia magellanica clearly shows the varied stages of an illustration. Along with step-by-step instructions to a range of subjects, this book is beautifully illustrated with over 350 images, diagrams and paintings of her and her students' work. This book is a source of inspiration as well as a definitive guide, and the contents include: introduction to botany and a comprehensive botanical glossary; a case study demonstrating each stage of a worked example, including the selection and preparation of a subject, observational drawings, composition skills and painting processes; step-by-step instruction covering many subjects, from creating shine on leaves and berries, to painting white flowers and depicting hairs on leaves and stems; a guide to colour theory and how to mix colours accurately to match your specimens and make the most of your watercolour palette; and ideas on how to continue, and develop your own style of botanical illustration. This book will be of great interest to all botanical artists, natural history artists, watercolourists, gardeners and natural historians and is lavishly illustrated with 391 colour images.

### **Color for the Botanical Painter**

Anova Books

This is the story of one woman's journey from amateur painter to botanical artist, told through the sketchbooks and paintings she produced for the Distance Learning Diploma Course run by the Society of Botanical Artists. Packed with advice and tips, this book will serve as a guide and inspiration to anyone wanting to embark on life as a botanical artist. This book is both a showcase of Mary Ann Scott's work and a record of her achievements, including first-hand accounts of the joys and challenges she faced as she progressed. It contains work from every assignment she undertook, from her first attempts at drawing a tulip to the triumphant paintings she made for her diploma portfolio. Along the way are delicate floral compositions, juicy fruit and vegetables, botanical dissections, and her adventures out in the field. Margaret Stevens's comments on each assignment are also included, giving an insight into the assessment process and an all-round view of Mary Ann's successes and (very rare) failures. The book ends with a glorious selection of Mary Ann's ongoing work as a botanical artist.

Recording the world of plant and animal life and documenting the strange beauty of the natural world have been human passions ever since the first cave paintings. While there are many histories of botanical art featuring beautiful paintings and finished drawings, the artists' preparatory sketches, first impressions, and scribbled notes on paper are rarely seen. But it is often these early attempts that give us real insight into the firsthand experiences and adventures of the botanists, artists, collectors, and explorers behind them. This exquisite visual compendium of botanical sketches by eighty artists from around the world brings these personal and vividly spontaneous records back into the light. Filled with remarkable images from the fifteenth to the twentieth centuries, sourced from the unparalleled collections of the Royal Botanic Gardens, Kew Library, Art & Archives, and other libraries, museums, and archives, *Botanical Sketchbooks* also provides fascinating biographical portraits of the intriguing characters featured within, including such renowned artists, scientists, and amateur botanists as Leonardo da Vinci, Georg Dionysius Ehret, Carl Linnaeus, Maria Sibylla Merian, Mark Catesby, and Helen and Margaret Shelley (sisters of the novelist Mary Shelley), among many others.
