The difficulties in moving towards corporate sustainability raise the question of how environmental and social management can be integrated better with economic business goals. Over the last decade, the relationship between environmental and economic performance, and more recently the interaction between sustainability performance and business competitiveness, have received considerable attention in both theory and practice. However, to date, only partial aspects of the relationship between sustainability performance, competitiveness and economic performance have been studied from a theoretical as well as an empirical perspective. And, to date, no unique relationship has prevailed in empirical studies. A number of explanations have been put forward to explain this, including methodological reasons, such as the lack of statistical data, the low quality of that data, or the fact that such data is often available for short time periods only. Other theoretical explanations have been developed, such as the influence of different corporate strategies or the relatively small influence of environmental or sustainability issues as one factor among many on the economic or financial success of firms. So, how should the business case for sustainability be managed? This is the starting point for this book, which compiles insights on a large number of aspects of the link between sustainability performance, business competitiveness and economic success in an attempt to provide a comprehensive and structured view of this relationship. The book provides an unrivalled body of knowledge on the state of theory and practice in this field and identifies prospective future fields of work. The book includes: conceptual frameworks for the interaction of social, environmental and economic issues in business environments; case studies of companies that have successfully integrated social, environmental and economic issues; analyses of the causal and empirical relationship between environmental and/or social performance, business performance and firm-level competitiveness; concepts and tools useful for improving business value with proactive operational strategies; assessment of the factors influencing operational sustainability strategies and their economic impact; and comparisons of interactions between sustainability performance and firm competitiveness across

industry sectors and countries. Managing the Business Case for Sustainability is the definitive work in its field: the most comprehensive book yet published on the theory and practice of managing sustainability performance, competitiveness, environmental, social and economic performance in an integrated way. It will be essential reading for managers, academics, consultants, fund managers, governments and government agencies, NGOs and international bodies who need a broad and comprehensive overview of the business case for sustainability.

This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Jakou výstavu měla speciální série vozů Aston Martin, nazvaná Alfred Dunhill? Jak souvisí logo Maserati s fontánou z 16. století? Je slovo Aero spojeno jen s českou automobilkou, nebo najdeme vozy tohoto jména i v jiných částech světa? Co přesně jsou „daňové koně“? Vymysleli název Citroën Elysée Číňané? Jak ovlivnil vývoj automobilového průmyslu fakt, že zakladatelé značek Ferrari a Lamborghini spolu nevycházelí? Ing. Jiří Fiala (publicista, automobilový historik a sběratel automobilové literatury) a doc. Petr Strossa (vědec, expert přes jazyky a dorozumívání s počítači) předkládají všem automobilovým fanatikům unikátní výkladový slovník jmen značek a jejich typů, který obsahuje hesla o přibližně 1600 značkách a více než 5000 typech a modelech. Čtenáři v knize najdou mimo jiné základní

informace o výrobcích automobilů, jejich filozofii označování typů, používání interních kódů či recyklování názvů vozů. Dozvědí se, proč se jeden automobil prodával pod různými názvy, proč se některá jména nesměla používat nebo jakých dosáhly jednotlivé vozy sportovních úspěchů. Vůbec poprvé je u nás pak publikován systém kódů sovětských vozidel a přehled čínských značek a výrobců. Zvláštní pozornost je věnována znakům (logům) všech důležitých značek, jejich vzniku a proměnám v čase. Celá tato speciální problematika je navíc zasazena do kontextu společenských a geopolitických událostí a okořeněná množstvím pozoruhodných historek a kuriozit souvisejících s auty, jejich jmény a výrobci.

It focuses on the long-term effect resettlement and relocation has on the lives and livelihoods of urban internal displacement of populations (IDPs) primarily from urban poor classes. It also discusses the concerns faced by the displacement in post-war Sri Lanka. It examines the impacts of conflict on poverty and recovery in peri-urban settings. It emphasizes the role of agency of urban IDPs in strengthening their own well-being. It draws attention to how the agency of urban IDPs is compromised by the displacement processes and the weak local level governance structures in the cities. The book is intended for researchers, graduate students, and teachers of Geography, Social Policy, Refugees and Migration Studies, History, International Development, Urban Studies, and South Asian Studies.
